

## ISSUE BRIEF

### Health Care Access Fund Overview and Forecast Changes

March 2016

*The February 2016 state budget forecast projects a balance in the Health Care Access Fund (HCAF) of \$463.6 million for FY 2016, \$609.8 million for FY 2017, \$877.2 million for FY 2018, and \$1.166 billion for FY 2019. This Issue Brief discusses the HCAF fund balance statement, current (February 2016) forecast changes and recent legislation affecting the fund.*

#### HCAF Overview

The Health Care Access Fund was established in statute in 1992<sup>1</sup>. The fund was enacted as part of the legislation which authorized the MinnesotaCare health insurance program to increase access to health care for lower income Minnesotans. MinnesotaCare financing remains a primary activity of the HCAF but other uses, including paying directly for a portion of the state Medical Assistance program, have been added to the fund's activities. (Note: See page 5 of this Issue Brief for a copy of the February 2016 HCAF statement.)

#### Fund Sources

Fund sources include the balance forward (if any) from the prior year, transfers in (if any) and revenues to the fund. Revenues come primarily from two taxes, the health care provider tax<sup>2</sup> and the gross premium tax<sup>3</sup>. There are also several smaller sources of revenue to the fund including MinnesotaCare premiums and investment income. In detail, sources of revenue to the fund are:

**Health Care Provider Tax** - The largest source of revenue to the HCAF is a 2 percent tax on gross revenues of health care providers, hospitals, surgical centers and wholesale drug distributors. For FY 2016, the provider tax is projected to provide \$599.7 million in revenue to the fund.

**Gross Premium Tax** – The next largest source of revenue to the HCAF is a 1 percent tax on the gross premiums of health maintenance organizations, nonprofit health service plan corporations and community integrated service networks. For FY 2016 the gross premium tax is projected to account for \$90.1 million in revenue to the fund.

<sup>2</sup> Minnesota Statutes chapter 295.52

<sup>3</sup> Minnesota Statutes chapter 297I.05, subdivision. 5

MinnesotaCare Enrollee Premiums - Premiums and cost sharing revenue paid by MinnesotaCare enrollees is the third largest source of revenue to the fund. As of January 2015 MinnesotaCare became the state's Basic Health Plan (BHP) under the Affordable Care Act (ACA) and all premiums remain with the state. Prior to January 1, 2015, the state had a waiver agreement with the federal government where premium revenue was shared between the state and federal government. For FY 2016, MinnesotaCare premiums are projected to account for \$40.4 million in revenue to the fund. Because of technical problems many MinnesotaCare enrollees did not received premium notices during 2015. The Department of Human Services says the billing issue will be corrected during FY 2016, however, this problem has reduced actual premium collections and lowers the base line projection for premiums going forward in the HCAF. The February 2016 forecast accounts for lower expected premium revenue.

Federal Match on Administrative Costs - For FY 2016 the federal government is projected to provide \$13.6 million in matching funds to the HCAF.

Interest Income - By law interest on balances in the fund accrue to the fund. For FY 2016 there is projected to be \$3.18 million in interest on the fund.

Non-add federal revenue – These (bracketed) lines in the fund balance are shown in both the revenues and uses sections. These funds total \$329.6 million in FY 2016 and are not counted in the HCAF totals but do affect HCAF expenditures. In the revenues section the figure indicates the amount of revenue to the state Federal Fund from the state Basic Health Plan federal match (and, for FY 2016 and earlier, reimbursement under the old federal MinnesotaCare waiver that has now expired). This revenue to the state Federal Fund must be used for MinnesotaCare program costs. In the HCAF uses section the same (bracketed) figure indicates the amount of MinnesotaCare costs that are paid with federal funds (reducing state MinnesotaCare net expenditures from the HCAF by the same amount).

### Fund Uses

Fund uses include appropriations and transfers out. In detail, expenditure items are:

MinnesotaCare - The direct appropriation for MinnesotaCare operations. Projected to be \$133.3 million in FY 2016. The fund balance statement indicates the projected direct appropriated cost of the program (program costs less federal and premium revenue). The variance from the amount appropriated in Laws 2016, Chapter 71 for the FY 2016-17 biennium is typically corrected through forecast adjustment legislation in the second year of the biennium.

MinnesotaCare Premiums - The same figure that is listed for premiums in the sources section of the fund balance statement which is appropriated to fund MinnesotaCare operations, \$40.4 million for FY 2016.

Medical Assistance - Beginning in FY 2014 there have been direct appropriations out of the HCAF to fund a portion of the cost of the Medical Assistance program. This is part of the on-going cost of program operations rather than the effect of Medical Assistance expansion under

the ACA (see General Fund Transfers). The February 2016 forecast amount for this is \$588.2 million. Like MinnesotaCare appropriations, the actual appropriations for FY 2016-17 will likely be adjusted to match forecast numbers during the 2016 legislative session.

Department of Human Services - Administrative costs appropriated to DHS, \$33.7 million for FY 2016.

Department of Health - Appropriation primarily for the Statewide Health Improvement Program (SHIP), \$36.5 million in FY 2016.

University of Minnesota - \$2.2 million annually for primary care physician training.

Department of Revenue - \$1.7 million for administration of fund tax sources.

Non-add federal revenue – These (bracketed) lines in the fund balance are shown in both the revenues and uses sections. These funds total \$329.6 million in FY 2016 and are not counted in the HCAF totals but do affect HCAF expenditures. In the revenues section the figure indicates the amount of revenue to the state Federal Fund from the state Basic Health Plan federal match (and, for FY 2016 and earlier, reimbursement under the old federal MinnesotaCare waiver that has now expired). This revenue to the state Federal Fund must be used for MinnesotaCare program costs. In the HCAF uses section the same (bracketed) figure indicates the amount of MinnesotaCare costs that are paid with federal funds (reducing state MinnesotaCare net expenditures from the HCAF by the same amount).

### General Fund Transfers

Medical Assistance - Minnesota Statutes<sup>4</sup> requires that up to \$96 million per biennium is transferred to the general fund to pay for the cost of a rate increase in the Medical Assistance program first implemented in 2003. In practice \$48 million is transferred each year if fund balances allow.

Medical Assistance Expansion - In 2013 Medical Assistance eligibility was expanded under the Affordable Care Act to include both new populations and higher incomes<sup>5</sup>. The law included a transfer of funds from the HCAF to the General Fund in FY 2014-17 so that there was no General Fund cost for the expansion legislation during those years. The 2013 law included provisions to reduce these transfers in each forecast to the correct amount if it was less than the original transfer appropriation. The transfer amount for FY 2016 is forecast to be \$30.8 million.

### Non General Fund Transfers

DHS IT Systems transfer - Statutory transfer to the Special Revenue Fund for DHS computer systems costs. \$14.2 million for FY 2016.

<sup>5</sup> Law of MN 2013 chapter 1

### Current Forecast Changes

The February 2016 forecast shows improvement to HCAF balances, in both the current and next biennium, compared to projections from the November 2015 forecast. The HCAF is currently projected to have a balance of \$609.8 million at the end of the FY 2016-17 biennium and \$1.166 billion at the end of the FY 2018-19 biennium.

#### Revenues

Compared to the November 2015 fund statement, tax revenues for the FY 2016-17 biennium are down by \$6 million and for the FY 2018-19 biennium down by \$7 million

#### Costs

Compared to November 2015, the February 2016 projection of the net state cost of MinnesotaCare for FY 2016-17 is lower by \$29 million. In FY 2018-19 MinnesotaCare costs decrease by \$1 million from the November projection.

### Recent Legislation Affecting the HCAF

Several recent legislative changes have an impact, or potential impact, to the fund. In the 2011 session legislation was passed that ends the provider tax on December 31, 2019<sup>6</sup>. The provider tax is collected on a calendar year basis, however, state fiscal years begin on July 1 and end on June 30. Thus, the last full year of tax collections is calendar 2019 and the date the tax is repealed is halfway through FY 2020. The last year of the planning horizon for the November 2015 forecast is FY 2019. The provider tax is projected to account for \$703.2 million that year. In the following year, FY 2020, the provider tax will collect only six months of revenue (July 1, 2019 – December 31, 2019). The first revenue and expenditure forecast that will include FY 2020 and the impact on the HCAF of the provider tax repeal will be issued in November 2016.

In addition, the 2011 session also passed legislation<sup>7</sup> that requires an analysis of fund revenues and uses each December. If the analysis shows that, on a biennial basis, the ratio of revenues to uses is greater than 125 percent then the provider tax must be reduced. The law requires that the tax rate would be adjusted down in increments of one-tenth of one percent to the extent that the biennial revenues do not exceed the 125percent standard. The law further specifies that any reduction under this provision would expire at the end of each calendar year and would be subject to annual redetermination by the Commissioner of Minnesota Management and Budget. As of the November 2015 forecast the ratio of revenues to uses does not meet the greater than 125 percent test for the FY 2016-17 biennium so no rate reduction is currently anticipated.

<sup>1</sup> For services beginning January 1, 2015, federal funding for MinnesotaCare is received through the Basic Health Program and is deposited in a Trust Fund within the state's Federal Fund for use for eligible expenditures.

<sup>2</sup> Amounts represent federal match on MinnesotaCare expenditures, which is accounted for in the state's Federal Fund.

<sup>3</sup> FY 2016 figure includes funding carried forward from previous years.
