Subd. 5. [DRIVING LEFT OF ROADWAY CENTER; EXCEPTION.] (a) No vehicle shall be driven to the left side of the center of the roadway in overtaking and passing another vehicle proceeding in the same direction unless such left side is clearly visible and is free of oncoming traffic for a sufficient distance ahead to permit such overtaking and passing to be completely made without interfering with the safe operation of any vehicle approaching from the opposite direction or any vehicle overtaken. In every event the overtaking vehicle must return to the right-hand side of the roadway before coming within 100 feet of any vehicle approaching from the opposite direction;

(b) Except on a one-way roadway or as provided in paragraph (c), no vehicle shall, in overtaking and passing another vehicle or at any other time, be driven to the left half of the roadway under the following conditions:

(1) when approaching the crest of a grade or upon a curve in the highway where the driver's view along the highway is obstructed within a distance of 700 feet;

(2) when approaching within 100 feet of any underpass or tunnel, railroad grade crossing, intersection within a city, or intersection outside of a city if the presence of the intersection is marked by warning signs; or

(3) where official signs are in place prohibiting passing, or a distinctive centerline is marked, which distinctive line also so prohibits passing, as declared in the Manual on Uniform Traffic Control Devices adopted by the commissioner.
(c) Paragraph (b) does not apply to a self-propelled or towed implement of husbandry that (1) is escorted at the front by a registered motor vehicle that is displaying vehicular hazard warning lights visible to the front and rear in normal sunlight, and (2) does not extend into the left half of the roadway to any greater extent than made necessary by the total width of the right half of the roadway together with any adjacent shoulder that is suitable for travel.

(d) Paragraph (b) does not apply to a self-propelled or towed implement of husbandry that is operated to the left half of the roadway if such operation is not to a greater extent than is necessary to avoid collision with a parked vehicle, sign, or other stationary object located on the highway right-of-way:"

The bill was passed and its title agreed to.

S. F. No. 4 was reported to the House.

Davids moved to amend S. F. No. 4, the fifth unofficial engrossment, as follows:

Delete everything after the enacting clause and insert:

"Section 1. Minnesota Statutes 2004, section 239.791, subdivision 1, is amended to read:

Subdivision 1. [MINIMUM ETHANOL CONTENT REQUIRED.] (a) Except as provided in subdivisions 10 to 14, a person responsible for the product shall ensure that all gasoline sold or offered for sale in Minnesota must contain at least 10.0 percent denatured ethanol by volume.

(b) For purposes of enforcing the minimum ethanol requirement of paragraph (a), a gasoline/ethanol blend will be construed to be in compliance if the ethanol content, exclusive of denaturants and permitted contaminants, comprises not less than 9.2 percent by volume and not more than 10.0 percent by volume of the blend as determined by an appropriate United States Environmental Protection Agency or American Society of Testing Materials standard method of analysis of alcohol/ether content in motor fuels.

(c) The provisions of this subdivision are suspended during any period of time that subdivision 1a, paragraph (a), is in effect."
Sec. 2. Minnesota Statutes 2004, section 239.791, is amended by adding a subdivision to read:

Subd. 1a. [MINIMUM ETHANOL CONTENT REQUIRED.] (a) Except as provided in subdivisions 10 to 14, on August 30, 2013, and thereafter, a person responsible for the product shall ensure that all gasoline sold or offered for sale in Minnesota must contain at least 20 percent denatured ethanol by volume.

(b) For purposes of enforcing the minimum ethanol requirement of paragraph (a), a gasoline/ethanol blend will be construed to be in compliance if the ethanol content, exclusive of denaturants and permitted contaminants, comprises not less than 18.4 percent by volume and not more than 20 percent by volume of the blend as determined by an appropriate United States Environmental Protection Agency or American Society of Testing Materials standard method of analysis of alcohol content in motor fuels.

(c) No motor fuel shall be deemed to be a defective product by virtue of the fact that the motor fuel is formulated or blended pursuant to the requirements of paragraph (a) and no person shall be liable under any theory of liability in manufacturing, distributing, or retailing a fuel formulated or blended pursuant to the requirements of paragraph (a). Fuels formulated in compliance with this subdivision do not require special notification or warning to handlers or end users as to its proper use or handling. Nothing in this paragraph shall be construed to affect the liability of any person who actually spills or discharges any gasoline for damages resulting from such spill or discharge.

(d) This subdivision expires on December 31, 2010, if by that date:

(1) the commissioner of agriculture certifies and publishes the certification in the State Register that at least 20 percent of the volume of gasoline sold in the state is denatured ethanol; or

(2) federal approval has not been granted for the use of E20 as gasoline.

Sec. 3. [239.7911] [PETROLEUM REPLACEMENT PROMOTION.]

Subdivision 1. [PETROLEUM REPLACEMENT GOAL.] The petroleum replacement goal of the state of Minnesota is that at least 20 percent of the liquid fuel sold in the state is derived from renewable sources by December 31, 2015.

Subd. 2. [PROMOTION OF RENEWABLE LIQUID FUELS.] (a) The commissioner of agriculture, in consultation with the commissioners of commerce and the Pollution Control Agency, shall identify and implement activities necessary for the widespread use of renewable liquid fuels in the state. Beginning November 1, 2005, and continuing through 2015, the commissioners, or their designees, shall work with representatives from the renewable fuels industry, petroleum retailers, refiners, automakers, small engine manufacturers, and other interested groups, to develop annual recommendations for administrative and legislative action.

(b) The activities of the commissioners under this subdivision shall include, but not be limited to:

(1) developing recommendations for incentives for retailers to install equipment necessary for dispensing renewable liquid fuels to the public;

(2) obtaining federal approval for the use of E20 as gasoline;

(3) developing recommendations for ensuring that motor vehicles and small engine equipment have access to an adequate supply of fuel;

(4) working with the owners and operators of large corporate automotive fleets in the state to increase their use of renewable fuels; and
working to maintain an affordable retail price for liquid fuels.

[EFFECTIVE DATE.] This section is effective the day following final enactment.

Sec. 4. [REPORT ON E20 FUEL.]

The commissioner of agriculture, in consultation with the commissioners of employment and economic development and the Pollution Control Agency, shall review the information and data collected in the evaluation of any federal waiver request for the use of E20 fuel in Minnesota. The commissioner shall use existing budgetary and staff resources in conducting the review. The review must include:

1. issues involving the use of E20 fuel if such fuel is mandated in Minnesota;
2. effects of E20 on development of Minnesota's ethanol industry; and
3. effects of E20 on Minnesota consumers.

The commissioner shall present an initial report to the legislative committees having jurisdiction over agriculture and environment policy and finance on the findings of the review to the legislature by January 15, 2009, and present an updated report to those committees on January 15, 2011.

Amend the title accordingly

Davids, Juhnke, Holberg and Otremba moved to amend the Davids amendment to S. F. No. 4, the fifth unofficial engrossment, as follows:

Page 2, line 34, after the period insert "The United States Environmental Protection Agency's failure to act on an application shall not be deemed approval of the use of E20, or a waiver under section 211(f)(4) of the Clean Air Act, United States Code, title 42, section 7545, subsection (f), paragraph (4)."

The motion prevailed and the amendment to the amendment was adopted.

The question recurred on the Davids amendment, as amended, to S. F. No. 4, the fifth unofficial engrossment. The motion prevailed and the amendment, as amended, was adopted.

The Speaker called Abrams to the Chair.

Hornstein, Cox and Peterson, A., moved to amend S. F. No. 4, the fifth unofficial engrossment, as amended, as follows:

Page 4, after line 13, insert:

"Sec. 5. Minnesota Statutes 2004, section 116D.04, subdivision 2a, is amended to read:

Subd. 2a. [WHEN PREPARED.] Where there is potential for significant environmental effects resulting from any major governmental action, the action shall be preceded by a detailed environmental impact statement prepared by the responsible governmental unit. The environmental impact statement shall be an analytical rather than an encyclopedic document which describes the proposed action in detail, analyzes its significant environmental
impacts, discusses appropriate alternatives to the proposed action and their impacts, and explores methods by which adverse environmental impacts of an action could be mitigated. The environmental impact statement shall also analyze those economic, employment and sociological effects that cannot be avoided should the action be implemented. To ensure its use in the decision-making process, the environmental impact statement shall be prepared as early as practical in the formulation of an action. No mandatory environmental impact statement may be required for an ethanol plant, as defined in section 41A.09, subdivision 2a, paragraph (b), that produces less than 125,000,000 gallons of ethanol annually and is located outside of the seven-county metropolitan area, except that an environmental impact statement is mandatory for an ethanol plant that is fueled by a coal-fired boiler, except for a plant that has a permit application pending before the Pollution Control Agency on April 1, 2005.

(a) The board shall by rule establish categories of actions for which environmental impact statements and for which environmental assessment worksheets shall be prepared as well as categories of actions for which no environmental review is required under this section.

(b) The responsible governmental unit shall promptly publish notice of the completion of an environmental assessment worksheet in a manner to be determined by the board and shall provide copies of the environmental assessment worksheet to the board and its member agencies. Comments on the need for an environmental impact statement may be submitted to the responsible governmental unit during a 30 day period following publication of the notice that an environmental assessment worksheet has been completed. The responsible governmental unit's decision on the need for an environmental impact statement shall be based on the environmental assessment worksheet and the comments received during the comment period, and shall be made within 15 days after the close of the comment period. The board's chair may extend the 15 day period by not more than 15 additional days upon request of the responsible governmental unit.

(c) An environmental assessment worksheet shall also be prepared for a proposed action whenever material evidence accompanying a petition by not less than 25 individuals, submitted before the proposed project has received final approval by the appropriate governmental units, demonstrates that, because of the nature or location of a proposed action, there may be potential for significant environmental effects. Petitions requesting the preparation of an environmental assessment worksheet shall be submitted to the board. The chair of the board shall determine the appropriate responsible governmental unit and forward the petition to it. A decision on the need for an environmental assessment worksheet shall be made by the responsible governmental unit within 15 days after the petition is received by the responsible governmental unit. The board's chair may extend the 15 day period by not more than 15 additional days upon request of the responsible governmental unit.

(d) Except in an environmentally sensitive location where Minnesota Rules, part 4410.4300, subpart 29, item B, applies, the proposed action is exempt from environmental review under this chapter and rules of the board, if:

1. the proposed action is:
   1. an animal feedlot facility with a capacity of less than 1,000 animal units; or
   2. an expansion of an existing animal feedlot facility with a total cumulative capacity of less than 1,000 animal units;

2. the application for the animal feedlot facility includes a written commitment by the proposer to design, construct, and operate the facility in full compliance with Pollution Control Agency feedlot rules; and

3. the county board holds a public meeting for citizen input at least ten business days prior to the Pollution Control Agency or county issuing a feedlot permit for the animal feedlot facility unless another public meeting for citizen input has been held with regard to the feedlot facility to be permitted. The exemption in this paragraph is in addition to other exemptions provided under other law and rules of the board.
(e) The board may, prior to final approval of a proposed project, require preparation of an environmental assessment worksheet by a responsible governmental unit selected by the board for any action where environmental review under this section has not been specifically provided for by rule or otherwise initiated.

(f) An early and open process shall be utilized to limit the scope of the environmental impact statement to a discussion of those impacts, which, because of the nature or location of the project, have the potential for significant environmental effects. The same process shall be utilized to determine the form, content and level of detail of the statement as well as the alternatives which are appropriate for consideration in the statement. In addition, the permits which will be required for the proposed action shall be identified during the scoping process. Further, the process shall identify those permits for which information will be developed concurrently with the environmental impact statement. The board shall provide in its rules for the expeditious completion of the scoping process. The determinations reached in the process shall be incorporated into the order requiring the preparation of an environmental impact statement.

(g) Whenever practical, information needed by a governmental unit for making final decisions on permits or other actions required for a proposed project shall be developed in conjunction with the preparation of an environmental impact statement.

(h) An environmental impact statement shall be prepared and its adequacy determined within 280 days after notice of its preparation unless the time is extended by consent of the parties or by the governor for good cause. The responsible governmental unit shall determine the adequacy of an environmental impact statement, unless within 60 days after notice is published that an environmental impact statement will be prepared, the board chooses to determine the adequacy of an environmental impact statement. If an environmental impact statement is found to be inadequate, the responsible governmental unit shall have 60 days to prepare an adequate environmental impact statement."

The Speaker resumed the Chair.

Anderson, B., moved to amend S. F. No. 4, the fifth unofficial engrossment, as amended, as follows:

Page 2, after line 34, insert:

"(e) Not later than December 31, 2005, the governor shall petition the United States Consumer Product Safety Commission to solicit information from national experts and stakeholders and issue an advisory opinion under Code of Federal Regulations, title 16, section 1000.7, as to whether E20 gasoline, when used in existing motorcycles, outboard engines, snowmobiles, lawn and garden products, and other consumer equipment powered by small spark ignited engines, is likely to create a "substantial product hazard" or an "unreasonable risk of injury" such as fuel leaks, increased engine temperature, the gumming and sticking of throttles, governors or ignition shut-off switches, or the unintended engagement of cutting blades. This subdivision expires on December 31, 2010, unless by that date, the United States Consumer Product Safety Commission has issued an advisory opinion that the use of E20 fuels will not increase the risk of hazards to consumers operating existing off-road consumer products."

A roll call was requested and properly seconded.

The question was taken on the Anderson, B., amendment and the roll was called. There were 92 yeas and 41 nays as follows:

The motion did not prevail and the amendment was not adopted.

Erhardt moved to amend S. F. No. 4, the fifth unofficial engrossment, as amended, as follows:

Delete everything after the enacting clause and insert:

"Section 1. [16C.137] [MINIMIZING ENERGY USE; RENEWABLE FUELS.]

Subdivision 1. [GOALS AND ACTIONS.] (a) Using 2005 as a baseline, the state of Minnesota shall reduce the use of gasoline by on-road vehicles owned by state departments by 25 percent by 2010 and 50 percent by 2015 and reduce the use of petroleum-based diesel fuel in diesel-fueled vehicles by ten percent by 2010 and 25 percent by 2015.

(b) To meet the goals established in paragraph (a), each state department will, whenever legally, technically, and economically feasible, subject to the specific needs of the department and responsible management of agency finances:

(1) ensure that at least 75 percent of purchases of new on-road vehicles, excluding emergency and law enforcement vehicles:

(i) use "cleaner fuels" as that term is defined in section 16C.135, subdivision 1, clauses (1), (3), and (4); or

(ii) have fuel efficiency ratings that exceed 30 miles per gallon for city usage or 35 miles per gallon for highway usage, including but not limited to hybrid electric cars and hydrogen-powered vehicles;

(2) increase its use of renewable transportation fuels, including ethanol, biodiesel, and hydrogen, from agricultural products; and

(3) increase its use of Web-based Internet applications and other electronic information technologies to enhance the access to and delivery of government information and services to the public, and reduce the reliance on the department's fleet for the delivery of the information and services.

Subd. 2. [SMARTFLEET COMMITTEE.] (a) The commissioner of administration, or the commissioner's designee, shall chair a SmartFleet Committee consisting of representatives designated by the commissioners of the Pollution Control Agency, the Departments of Agriculture, Transportation, and Commerce, and other state
departments that wish to participate. To ensure effective and efficient state participation, the SmartFleet Committee must assist state departments in implementing the requirements of this section, including providing information, guidance, sample policies and procedures, and technical and planning assistance.

(b) The SmartFleet Committee must evaluate the goals and directives established in this section by December 2006 and periodically thereafter. The committee must make recommendations to the governor and appropriate committees of the legislature on February 1 of each year for new or adjusted goals and directives, in light of the progress the state has made implementing this section, and of the availability of new or improved technologies.

(c) For the systematic and efficient monitoring of progress in implementing this section by the SmartFleet Committee, the Department of Administration shall implement a fleet reporting and information management system. Each department will use this management system to demonstrate its progress in complying with this section.

Subd. 3. [EXCLUSION.] Petroleum-based diesel fuel used in a vehicle that a department has retrofit to use ultra low sulfur diesel fuel and to add additional emissions control technologies is excluded when evaluating progress toward the reduction goals established in subdivision 1. This exclusion applies only to vehicles purchased before the model year in which the federal Environmental Protection Agency's new clean diesel emission reduction rules take effect.

[EFFECTIVE DATE.] This section is effective the day following final enactment.

Sec. 2. Minnesota Statutes 2004, section 41A.09, subdivision 2a, is amended to read:

Subd. 2a. [DEFINITIONS.] For the purposes of this section, the terms defined in this subdivision have the meanings given them.

(a) "Ethanol" means fermentation ethyl alcohol derived from agricultural products, including potatoes, cereal grains, cheese whey, and sugar beets; forest products; or other renewable resources, including residue and waste generated from the production, processing, and marketing of agricultural products, forest products, and other renewable resources, that:

(1) meets all of the specifications in ASTM specification D4806-01; and

(2) is denatured as specified in Code of Federal Regulations, title 27, parts 20 and 21.

(b) "Ethanol plant" means a plant at which ethanol is produced.

(c) "Commissioner" means the commissioner of agriculture.

(d) "E85 fuel handling and dispensing equipment" means capital investments made primarily for the receipt, storage, handling, pumping, and delivery of E85 petroleum products as defined in section 296A.01, subdivision 19.

Sec. 3. Minnesota Statutes 2004, section 41A.09, subdivision 3a, is amended to read:

Subd. 3a. [ETHANOL PRODUCER PAYMENTS.] (a) The commissioner shall make cash payments to producers of ethanol located in the state that have begun production by June 30, 2000. For the purpose of this subdivision, an entity that holds a controlling interest in more than one ethanol plant is considered a single producer. The amount of the payment for each producer's annual production, except as provided in paragraph (c), is 20 cents per gallon for each gallon of ethanol produced on or before June 30, 2000, or ten years after the start of production,
whichever is later. Annually, within 90 days of the end of its fiscal year, an ethanol producer receiving payments under this subdivision must file a disclosure statement on a form provided by the commissioner. The initial disclosure statement must include a summary description of the organization of the business structure of the claimant, a listing of the percentages of ownership by any person or other entity with an ownership interest of five percent or greater, and a copy of its annual audited financial statements, including the auditor's report and footnotes. The disclosure statement must include information demonstrating what percentage of the entity receiving payments under this section is owned by farmers or other entities eligible to farm or own agricultural land in Minnesota under the provisions of section 500.24. Subsequent annual reports must reflect noncumulative changes in ownership of ten percent or more of the entity. The report need not disclose the identity of the persons or entities eligible to farm or own agricultural land with ownership interests, individuals residing within 30 miles of the plant, or of any other entity with less than ten percent ownership interest, but the claimant must retain information within its files confirming the accuracy of the data provided. This data must be made available to the commissioner upon request. Not later than the 15th day of February in each year the commissioner shall deliver to the chairs of the standing committees of the senate and the house of representatives that deal with agricultural policy and agricultural finance issues an annual report summarizing aggregated data from plants receiving payments under this section during the preceding calendar year. Audited financial statements and notes and disclosure statements submitted to the commissioner are nonpublic data under section 13.02, subdivision 9. Notwithstanding the provisions of chapter 13 relating to nonpublic data, summaries of the submitted audited financial reports and notes and disclosure statements will be contained in the report to the committee chairs and will be public data.

(b) No payments shall be made for ethanol production that occurs after June 30, 2010.

(c) If the level of production at an ethanol plant increases due to an increase in the production capacity of the plant, the payment under paragraph (a) applies to the additional increment of production until ten years after the increased production began. Once a plant's production capacity reaches 15,000,000 gallons per year, no additional increment will qualify for the payment.

(d) Total payments under paragraphs (a) and (c) to a producer in a fiscal year may not exceed $3,000,000.

(e) By the last day of October, January, April, and July, each producer shall file a claim for payment for ethanol production during the preceding three calendar months. A producer that files a claim under this subdivision shall include a statement of the producer's total ethanol production in Minnesota during the quarter covered by the claim. For each claim and statement of total ethanol production filed under this subdivision, the volume of ethanol production must be examined by an independent certified public accountant in accordance with standards established by the American Institute of Certified Public Accountants.

(f) Payments shall be made November 15, February 15, May 15, and August 15. A separate payment shall be made for each claim filed. Except as provided in paragraph (g), the total quarterly payment to a producer under this paragraph may not exceed $750,000.

(g) Notwithstanding the quarterly payment limits of paragraph (f), the commissioner shall make an additional payment in the fourth quarter of each fiscal year to ethanol producers for the lesser of: (1) 20 cents per gallon of production in the fourth quarter of the year that is greater than 3,750,000 gallons; or (2) the total amount of payments lost during the first three quarters of the fiscal year due to plant outages, repair, or major maintenance. Total payments to an ethanol producer in a fiscal year, including any payment under this paragraph, must not exceed the total amount the producer is eligible to receive based on the producer's approved production capacity. The provisions of this paragraph apply only to production losses that occur in quarters beginning after December 31, 1999.

(h) The commissioner shall reimburse ethanol producers for any deficiency in payments during earlier quarters if the deficiency occurred because of unallotment or because appropriated money was insufficient to make timely payments in the full amount provided in paragraph (a). Notwithstanding the quarterly or annual payment limitations
in this subdivision, the commissioner shall begin making payments for earlier deficiencies in each fiscal year that appropriations for ethanol payments exceed the amount required to make eligible scheduled payments. Payments for earlier deficiencies must continue until the deficiencies for each producer are paid in full.

(i) If, in any calendar year beginning after December 31, 2007, the appropriation for value-added agricultural products under this section is in excess of the amount required to make scheduled ethanol producer payments and deficiency payments for payments delayed because of unallotment or because appropriated funds in earlier fiscal years were insufficient, the commissioner may make grants in amounts not exceeding $15,000 per grant to distributors and retailers of motor fuels as defined in section 296A.01, subdivision 33, for up to 50 percent of the cost incurred for the installation of E85 fuel handling or dispensing equipment.

Sec. 4. Minnesota Statutes 2004, section 116D.04, subdivision 2a, is amended to read:

Subd. 2a. [WHEN PREPARED.] Where there is potential for significant environmental effects resulting from any major governmental action, the action shall be preceded by a detailed environmental impact statement prepared by the responsible governmental unit. The environmental impact statement shall be an analytical rather than an encyclopedic document which describes the proposed action in detail, analyzes its significant environmental impacts, discusses appropriate alternatives to the proposed action and their impacts, and explores methods by which adverse environmental impacts of an action could be mitigated. The environmental impact statement shall also analyze those economic, employment and sociological effects that cannot be avoided should the action be implemented. To ensure its use in the decision-making process, the environmental impact statement shall be prepared as early as practical in the formulation of an action. No mandatory environmental impact statement may be required for an ethanol plant, as defined in section 41A.09, subdivision 2a, paragraph (b), that produces less than 125,000,000 gallons of ethanol annually and is located outside of the seven-county metropolitan area, except that an environmental impact statement is mandatory for an ethanol plant that is fueled by a coal-fired boiler, except for a plant that has a permit application pending before the Pollution Control Agency on April 1, 2005.

(a) The board shall by rule establish categories of actions for which environmental impact statements and for which environmental assessment worksheets shall be prepared as well as categories of actions for which no environmental review is required under this section.

(b) The responsible governmental unit shall promptly publish notice of the completion of an environmental assessment worksheet in a manner to be determined by the board and shall provide copies of the environmental assessment worksheet to the board and its member agencies. Comments on the need for an environmental impact statement may be submitted to the responsible governmental unit during a 30 day period following publication of the notice that an environmental assessment worksheet has been completed. The responsible governmental unit's decision on the need for an environmental impact statement shall be based on the environmental assessment worksheet and the comments received during the comment period, and shall be made within 15 days after the close of the comment period. The board's chair may extend the 15 day period by not more than 15 additional days upon the request of the responsible governmental unit.

(c) An environmental assessment worksheet shall also be prepared for a proposed action whenever material evidence accompanying a petition by not less than 25 individuals, submitted before the proposed project has received final approval by the appropriate governmental units, demonstrates that, because of the nature or location of a proposed action, there may be potential for significant environmental effects. Petitions requesting the preparation of an environmental assessment worksheet shall be submitted to the board. The chair of the board shall determine the appropriate responsible governmental unit and forward the petition to it. A decision on the need for an environmental assessment worksheet shall be made by the responsible governmental unit within 15 days after the petition is received by the responsible governmental unit. The board's chair may extend the 15 day period by not more than 15 additional days upon request of the responsible governmental unit.
(d) Except in an environmentally sensitive location where Minnesota Rules, part 4410.4300, subpart 29, item B, applies, the proposed action is exempt from environmental review under this chapter and rules of the board, if:

(1) the proposed action is:

   (i) an animal feedlot facility with a capacity of less than 1,000 animal units; or

   (ii) an expansion of an existing animal feedlot facility with a total cumulative capacity of less than 1,000 animal units;

(2) the application for the animal feedlot facility includes a written commitment by the proposer to design, construct, and operate the facility in full compliance with Pollution Control Agency feedlot rules; and

(3) the county board holds a public meeting for citizen input at least ten business days prior to the Pollution Control Agency or county issuing a feedlot permit for the animal feedlot facility unless another public meeting for citizen input has been held with regard to the feedlot facility to be permitted. The exemption in this paragraph is in addition to other exemptions provided under other law and rules of the board.

(e) The board may, prior to final approval of a proposed project, require preparation of an environmental assessment worksheet by a responsible governmental unit selected by the board for any action where environmental review under this section has not been specifically provided for by rule or otherwise initiated.

(f) An early and open process shall be utilized to limit the scope of the environmental impact statement to a discussion of those impacts, which, because of the nature or location of the project, have the potential for significant environmental effects. The same process shall be utilized to determine the form, content and level of detail of the statement as well as the alternatives which are appropriate for consideration in the statement. In addition, the permits which will be required for the proposed action shall be identified during the scoping process. Further, the process shall identify those permits for which information will be developed concurrently with the environmental impact statement. The board shall provide in its rules for the expeditious completion of the scoping process. The determinations reached in the process shall be incorporated into the order requiring the preparation of an environmental impact statement.

(g) Whenever practical, information needed by a governmental unit for making final decisions on permits or other actions required for a proposed project shall be developed in conjunction with the preparation of an environmental impact statement.

(h) An environmental impact statement shall be prepared and its adequacy determined within 280 days after notice of its preparation unless the time is extended by consent of the parties or by the governor for good cause. The responsible governmental unit shall determine the adequacy of an environmental impact statement, unless within 60 days after notice is published that an environmental impact statement will be prepared, the board chooses to determine the adequacy of an environmental impact statement. If an environmental impact statement is found to be inadequate, the responsible governmental unit shall have 60 days to prepare an adequate environmental impact statement.

Sec. 5. Minnesota Statutes 2004, section 239.791, subdivision 1, is amended to read:

Subdivision 1. [MINIMUM ETHANOL CONTENT REQUIRED.] (a) Except as provided in subdivisions 10 to 14, a person responsible for the product shall ensure that all gasoline sold or offered for sale in Minnesota must contain at least 10.0 percent denatured ethanol by volume.
(b) For purposes of enforcing the minimum ethanol requirement of paragraph (a), a gasoline/ethanol blend will be construed to be in compliance if the ethanol content, exclusive of denaturants and permitted contaminants, comprises not less than 9.2 percent by volume and not more than 10.0 percent by volume of the blend as determined by an appropriate United States Environmental Protection Agency or American Society of Testing Materials standard method of analysis of alcohol/ether content in motor fuels.

(c) This subdivision expires on the effective date of section 6.

Sec. 6. Minnesota Statutes 2004, section 239.791, is amended by adding a subdivision to read:

Subd. 1a. [MINIMUM ETHANOL CONTENT REQUIRED.] (a) Except as provided in subdivisions 10 to 14, a person responsible for the product shall ensure that all gasoline sold or offered for sale in Minnesota must contain at least 20 percent denatured ethanol by volume.

(b) For purposes of enforcing the minimum ethanol requirement of paragraph (a), a gasoline/ethanol blend will be construed to be in compliance if the ethanol content, exclusive of denaturants and permitted contaminants, comprises not less than 18.4 percent by volume and not more than 20 percent by volume of the blend as determined by an appropriate United States Environmental Protection Agency or American Society of Testing Materials standard method of analysis of alcohol content in motor fuels.

(c) No motor fuel shall be deemed to be a defective product by virtue of the fact that the motor fuel is formulated or blended pursuant to the requirements of paragraph (a) under any theory of liability except for negligence. This paragraph does not preclude an action for negligent acts. This paragraph does not affect a person whose liability arises under chapter 115, water pollution control; 115A, waste management; 115B, environmental response and liability; 115C, leaking underground storage tanks; or 299J, pipeline safety; under public nuisance law for damage to the environment or the public health; under any other environmental or public health law; or under any environmental or public health ordinance or program of a municipality as defined in section 466.01.

(d) This subdivision is effective ten years following express action on the application by the United States Environmental Protection Agency required by this subdivision, or 60 days after the governor publishes notice in the State Register that at least 60 percent of new model motor vehicles offered for sale in Minnesota are warranted for fuel with 20 percent ethanol by volume, whichever occurs first.

(e) Except as provided in paragraph (f), this subdivision expires on December 31, 2010, if by that date the commissioner of agriculture certifies and publishes the certification in the State Register that at least 20 percent of the volume of gasoline sold in the state is denatured ethanol.

(f) This subdivision expires on December 31, 2008, if by that date the United States Environmental Protection Agency has not acted on an application submitted under United States Code, title 42, section 7545(f)(4), by issuing an express determination that E20 gasoline:

(1) will not cause or contribute to the failure of any emission control device or system on vehicles, engines, fuel tanks, or off-road equipment to achieve compliance with the standards to which those vehicles, components, or equipment were certified under federal law over the useful life of the vehicles, components, or equipment;

(2) will not cause vehicle emissions and toxic emission to increase;

(3) will not cause or contribute to a degradation of vehicle, engine, fuel tank, or off-road equipment performance;
(4) is compatible with the materials used in in-use vehicles, engines, fuel tanks, or off-road equipment and with materials reasonably anticipated to be used in vehicles, engines, fuel tanks, or off-road equipment sold in the future; and

(5) will not require vehicle or off-road engine or equipment manufacturers to produce or distribute for Minnesota special products with unique features or special fuel calibrations that differ from products sold in other states.

For purposes of this subdivision, the United States Environmental Protection Agency's failure to act on an application shall not be deemed a waiver under section 211(f)(4) of the Clean Air Act, United States Code, title 42, section 7545, subsection (f), paragraph (4).

(g) The minimum percentage of denatured ethanol that must be contained in gasoline sold or offered for sale in Minnesota under paragraph (a) is ten percent effective 90 days after the effective date of any federal law relating to (1) the federal excise tax rate on gasoline-ethanol blends, or (2) the deposit of revenues from the federal excise tax on gasoline-ethanol blends, that in the determination of the commissioner of transportation will result in a loss of federal transportation funds to Minnesota that is directly attributable to requiring a minimum of 20 percent denatured ethanol in gasoline sold or offered for sale in Minnesota.

(h) Not later than December 31, 2005, the governor shall petition the United States Consumer Product Safety Commission to solicit information from national experts and stakeholders and issue an advisory opinion under Code of Federal Regulations, title 16, section 1000.7, as to whether E20 gasoline, when used in existing motorcycles, outboard engines, snowmobiles, lawn and garden products, and other consumer equipment powered by small spark ignited engines, is likely to create a "substantial product hazard" or an "unreasonable risk of injury" such as fuel leaks, increased engine temperature, the gumming and sticking of throttles, governors or ignition shut-off switches, or the unintended engagement of cutting blades. This subdivision expires on December 31, 2010, unless by that date, the United States Consumer Product Safety Commission has issued an advisory opinion that the use of E20 fuels will not increase the risk of hazards to consumers operating existing off-road consumer products.

Sec. 7. [239.7911] [PETROLEUM REPLACEMENT PROMOTION.]

Subdivision 1. [PETROLEUM REPLACEMENT GOAL.] The petroleum replacement goal of the state of Minnesota is that at least 20 percent of the liquid fuel sold in the state is derived from renewable sources by December 31, 2015, subject to the provisions of section 239.791, subdivision 1a, paragraph (g).

Subd. 2. [PROMOTION OF RENEWABLE LIQUID FUELS.] (a) The commissioner of agriculture, in consultation with the commissioners of commerce and the Pollution Control Agency, shall identify and implement activities necessary for the widespread use of renewable liquid fuels in the state. Beginning November 1, 2005, and continuing through 2015, the commissioners, or their designees, shall work with representatives from the renewable fuels industry, petroleum retailers, refiners, automakers, small engine manufacturers, and other interested groups, to develop annual recommendations for administrative and legislative action.

(b) The activities of the commissioners under this subdivision shall include, but not be limited to:

(1) developing recommendations for incentives for retailers to install equipment necessary for dispensing renewable liquid fuels to the public;

(2) obtaining federal approval for the use of E20 as gasoline;

(3) developing recommendations for ensuring that motor vehicles and small engine equipment have access to an adequate supply of fuel;
(4) working with the owners and operators of large corporate automotive fleets in the state to increase their use of renewable fuels; and

(5) working to maintain an affordable retail price for liquid fuels.

[EFFECTIVE DATE.] This section is effective the day following final enactment.

Sec. 8. [REPORT ON E20 FUEL.]

The commissioner of agriculture, in consultation with the commissioners of employment and economic development and the Pollution Control Agency, shall review the information and data collected in the evaluation of any federal waiver request for the use of E20 fuel in Minnesota. The commissioner shall use existing budgetary and staff resources in conducting the review. The review must include:

(1) issues involving the use of E20 fuel if such fuel is mandated in Minnesota;

(2) effects of E20 on development of Minnesota’s ethanol industry; and

(3) effects of E20 on Minnesota consumers.

The commissioner shall present an initial report to the legislative committees having jurisdiction over agriculture and environment policy and finance on the findings of the review to the legislature by January 15, 2009, and present an updated report to those committees on January 15, 2011.

Sec. 9. [STATE VEHICLE FLEET FUEL REPORTS.]

Subd. 1. [REPORTS TO DEPARTMENT OF ADMINISTRATION.] Each state agency, as defined in Minnesota Statutes, section 16D.02, subdivision 7, must report annually to the Department of Administration, in a manner and at a time prescribed by the commissioner of administration, for the 12 months preceding the date of the report:

(1) the number of motor vehicles purchased or leased by the agency and the number that are capable of being propelled by cleaner fuels as defined in Minnesota Statutes, section 16C.135, subdivision 1; and

(2) total volume of fuel purchased for vehicles owned or leased by the agency and the total volume of each fuel that is a cleaner fuel.

Subd. 2. [REPORT TO LEGISLATURE.] The commissioner of administration shall report on January 15, 2007, and each January 15 in odd-numbered years thereafter, on total purchases and leases of motor vehicles by all state agencies and the number of such vehicles that are capable of being propelled by cleaner fuels, and total volume of fuel purchased by all state agencies and the total volume of cleaner fuels. The report must be made to the chairs of legislative committees having jurisdiction over government operations, state government finance, environmental policy and finance, natural resources policy and finance, and transportation policy and finance."
