Subd. 5. Refunds. Any producer may, by use of forms provided by the commissioner, and upon presentation of such proof as the commissioner requires, have the checkoff fee refunded, provided the checkoff fee was remitted on a timely basis. The producer must submit refund requests to the commissioner by February 28 each year for checkoff fees paid in the previous calendar year. For checkoff fees paid between January 1, 2007, and January 1, 2008, refunds shall not be issued until January 15, 2008.

Sec. 12. Minnesota Statutes 2004, section 90.14, is amended to read:

90.14 AUCTION SALE PROCEDURE.

(a) All state timber shall be offered and sold by the same unit of measurement as it was appraised. The sale shall be made to the person who (1) bids the highest price for all the several kinds of timber as advertised, or (2) if unsold at public auction, to the person who purchases at any subsequent sale authorized under section 90.101, subdivision 1. No tract shall be sold to any person other than the purchaser in whose name the bid was made. The commissioner may refuse to approve any and all bids received and cancel a sale of state timber for good and sufficient reasons.
(b) The purchaser at any sale of timber shall, immediately upon the approval of the bid, or, if unsold at public auction, at the time of purchase at a subsequent sale under section 90.101, subdivision 1, pay to the commissioner a down payment of 15 percent of the appraised value. In case any purchaser fails to make such payment, the purchaser shall be liable therefor to the state in a civil action, and the commissioner may reoffer the timber for sale as though no bid or sale under section 90.101, subdivision 1, therefor had been made.

(c) In lieu of the scaling of state timber required by this chapter, a purchaser of state timber may, at the time of payment by the purchaser to the commissioner of 15 percent of the appraised value, elect in writing on a form prescribed by the attorney general to purchase a permit based solely on the appraiser's estimate of the volume of timber described in the permit, provided that the commissioner has expressly designated the availability of such option for that tract on the list of tracts available for sale as required under section 90.101. A purchaser who elects in writing on a form prescribed by the attorney general to purchase a permit based solely on the appraiser's estimate of the volume of timber described on the permit does not have recourse to the provisions of section 90.281.

(d) In the case of a public auction sale conducted by a sealed bid process, tracts shall be awarded to the high bidder, who shall pay to the commissioner a down payment of 15 percent of the appraised value within ten business days of receiving a written award notice. If a purchaser fails to make the down payment, the purchaser is liable for the down payment to the state and the commissioner may offer the timber for sale to the next highest bidder as though no higher bid had been made.

(e) Except as otherwise provided by law, at the time the purchaser signs a permit issued under section 90.151, the purchaser shall make a bid guarantee payment to the commissioner in an amount equal to 15 percent of the total purchase price of the permit less the down payment amount required by paragraph (b). If the bid guarantee payment is not submitted with the signed permit, no harvesting may occur, the permit cancels, and the down payment for timber forfeits to the state. The bid guarantee payment forfeits to the state if the purchaser and successors in interest fail to execute an effective permit.

Sec. 13. [90.145] PURCHASER QUALIFICATIONS AND REGISTRATION.

Subdivision 1. Purchaser qualifications. (a) In addition to any other requirements imposed by this chapter, the purchaser of a state timber permit issued under section 90.151 must meet the requirements in paragraphs (b) to (d).

(b) The purchaser and the purchaser's agents, employees, subcontractors, and assigns must comply with general industry safety standards for logging adopted by the commissioner of labor and industry under chapter 182. The commissioner shall require a purchaser to provide proof of compliance with the general industry safety standards.

(c) The purchaser and the purchaser's agents, subcontractors, and assigns must comply with the mandatory insurance requirements of chapter 176. The commissioner shall require a purchaser to provide a copy of the proof of insurance required by section 176.130 before the start of harvesting operations on any permit.

(d) Before the start of harvesting operations on any permit, the purchaser must certify that a foreperson or other designated employee who has a current certificate of completion from the Minnesota logger education program (MLEP), the Wisconsin Forest Industry Safety and Training Alliance (FISTA), or any similar program acceptable to the commissioner, is supervising active logging operations.

Subd. 2. Purchaser preregistration. To facilitate the sale of permits issued under section 90.151, the commissioner may establish a purchaser preregistration system. Any system implemented by the commissioner shall be limited in scope to only that information that is required for the efficient administration of the purchaser qualification provisions of this chapter and shall conform with the requirements of chapter 13.
Sec. 14. Minnesota Statutes 2004, section 90.151, subdivision 1, is amended to read:

Subdivision 1. **Issuance; expiration.** (a) Following receipt of the down payment for state timber required under section 90.14 or 90.191, the commissioner shall issue a numbered permit to the purchaser, in a form approved by the attorney general, by the terms of which the purchaser shall be authorized to enter upon the land, and to cut and remove the timber therein described as designated for cutting in the report of the state appraiser, according to the provisions of this chapter. The permit shall be correctly dated and executed by the commissioner and signed by the purchaser. If a permit is not signed by the purchaser within 60 days from the date of purchase, the permit cancels and the down payment for timber required under section 90.14 forfeits to the state.

(b) The permit shall expire no later than five years after the date of sale as the commissioner shall specify or as specified under section 90.191, and the timber shall be cut within the time specified therein. All cut timber, equipment, and buildings not removed from the land within 90 days after expiration of the permit shall become the property of the state.

(c) The commissioner may grant an additional period of time not to exceed 120 days for the removal of cut timber, equipment, and buildings upon receipt of such request by the permit holder for good and sufficient reasons. The commissioner may grant a second period of time not to exceed 120 days for the removal of cut timber, equipment, and buildings upon receipt of a request by the permit holder for hardship reasons only.

(d) No permit shall be issued to any person other than the purchaser in whose name the bid was made.

Sec. 15. Minnesota Statutes 2004, section 90.151, subdivision 6, is amended to read:

Subd. 6. **Notice and approval required.** The permit shall provide that the permit holder shall not start cutting any state timber nor clear building sites nor logging roads until the commissioner has been notified and has given prior approval to such cutting operations. Approval shall not be granted until the permit holder has completed a presale conference with the state appraiser designated to supervise the cutting. The permit holder shall also give prior notice whenever permit operations are to be temporarily halted, whenever permit operations are to be resumed, and when permit operations are to be completed.

Sec. 16. Minnesota Statutes 2004, section 90.151, is amended by adding a subdivision to read:

Subd. 15. **Liquidated damages.** The permit may include a schedule of liquidated damage charges for breach of permit terms by the permit holder. The damage charges shall be limited to amounts that are reasonable in light of the anticipated or actual harm caused by the breach, the difficulties of proof of loss, and the inconvenience or nonfeasibility of otherwise obtaining an adequate remedy.

Sec. 17. Minnesota Statutes 2004, section 103I.005, subdivision 9, is amended to read:

Subd. 9. **Exploratory boring.** "Exploratory boring" means a surface drilling done to explore or prospect for oil, natural gas, apatite, diamonds, graphite, gemstones, kaolin clay, and metallic minerals, including iron, copper, zinc, lead, gold, silver, titanium, vanadium, nickel, cadmium, molybdenum, chromium, manganese, cobalt, zirconium, beryllium, thorium, uranium, aluminum, platinum, palladium, radium, tantalum, tin, and niobium, and a drilling or boring for petroleum.

mitigation measures are employed to abate noise, (2) an existing or newly constructed segment of a highway, provided that all reasonably available noise mitigation measures, as approved by the commissioners of the Department of Transportation and Pollution Control Agency, are employed to abate noise, (3) except for the cities of Minneapolis and St. Paul, an existing or newly constructed segment of a road, street, or highway under the jurisdiction of a road authority of a town, statutory or home rule charter city, or county, except for roadways for which full control of access has been acquired, (4) skeet, trap or shooting sports clubs, or (5) motor vehicle race events conducted at a facility specifically designed for that purpose that was in operation on or before July 1, 1983.

Motor vehicle race events exempted from state standards under this subdivision are exempt from claims based on noise brought under section 561.01 and chapters 116B and 116D. Nothing herein shall prohibit a local unit of government or a public corporation with the power to make rules for the government of its real property from regulating the location and operation of skeet, trap or shooting sports clubs, or motor vehicle race events conducted at a facility specifically designed for that purpose that was in operation on or before July 1, 1983.

(b) The form shall require the following information:

(1) the number of minors or women for whom a guardian has been appointed under sections 524.5-301 to 524.5-317 because of a finding of incompetency for whom the physician or an agent of the physician provided the notice described in section 144.343, subdivision 2; of that number, the number of notices provided personally as described in section 144.343, subdivision 2, paragraph (a), and the number of notices provided by mail as described in section 144.343, subdivision 2, paragraph (b); and of each of those numbers, the number who, to the best of the reporting physician's or reporting facility's information and belief, went on to obtain the abortion from the reporting physician or reporting physician's facility, or from the reporting facility;

(2) the number of minors or women for whom a guardian has been appointed under sections 524.5-301 to 524.5-317 because of a finding of incompetency upon whom the physician performed an abortion without providing the notice described in section 144.343, subdivision 2; and of that number, the number who were emancipated minors, and the number for whom section 144.343, subdivision 4, was applicable, itemized by each of the limitations identified in paragraphs (a), (b), and (c) of that subdivision;

(3) the number of abortions performed by the physician for which judicial authorization was received and for which the notification described in section 144.343, subdivision 2, was not provided;

(4) the county the female resides in; the county where the abortion was performed, if different from the female's residence; and, if a judicial bypass was obtained, the judicial district it was obtained in;

(5) the age of the female;

(6) the race of the female;

(7) the process the physician or the physician's agent used to inform the minor female, or a woman for whom a guardian has been appointed under sections 524.5-301 to 524.5-317 because of a finding of incompetency, of the judicial bypass; whether court forms were provided to her; and whether the physician or the physician's agent made the court arrangement for the minor female, or a woman for whom a guardian has been appointed under sections 524.5-301 to 524.5-317 because of a finding of incompetency; and

(8) how soon after visiting the abortion facility the minor female, or a woman for whom a guardian has been appointed under section 524.5-301 to 524.5-317 because of a finding of incompetency, went to court to obtain a judicial bypass.

Subd. 2. **Forms to physicians and facilities.** Physicians and facilities required to report under subdivision 3 shall obtain reporting forms from the commissioner.

Subd. 3. **Submission.** (a) The following physicians or facilities must submit the forms to the commissioner no later than April 1 for abortions performed on minors or women for whom a guardian has been appointed in the previous calendar year:

(1) a physician who provides, or whose agent provides, the notice described in section 144.343, subdivision 2, or the facility at which the notice is provided; and

(2) a physician who knowingly performs an abortion upon a minor, or a woman for whom a guardian has been appointed under sections 524.5-301 to 524.5-317 because of a finding of incompetency, or a facility at which such an abortion is performed.
(b) The commissioner shall maintain as confidential data which alone or in combination may constitute information that would reasonably lead, using epidemiologic principles, to the identification of:

(1) an individual who has had an abortion, who has received judicial authorization for an abortion, or to whom the notice described in section 144.343, subdivision 2, has been provided; or

(2) a physician or facility required to report under paragraph (a).

Subd. 4. Failure to report as required.  (a) Reports that are not submitted more than 30 days following the due date shall be subject to a late fee of $500 for each additional 30-day period or portion of a 30-day period overdue. If a physician or facility required to report under this section has not submitted a report, or has submitted only an incomplete report, more than one year following the due date, the commissioner of health shall bring an action in a court of competent jurisdiction for an order directing the physician or facility to submit a complete report within a period stated by court order or be subject to sanctions. If the commissioner brings such an action for an order directing a physician or facility to submit a complete report, the court may assess reasonable attorney fees and costs against the noncomplying party.

(b) Notwithstanding section 13.39, data related to actions taken by the commissioner to enforce any provision of this section is private data if the data, alone or in combination, may constitute information that would reasonably lead, using epidemiologic principles, to the identification of:

(1) an individual who has had an abortion, who has received judicial authorization for an abortion, or to whom the notice described in section 144.343, subdivision 2, has been provided; or

(2) a physician or facility required to report under subdivision 3.

Subd. 5. Public records.  (a) By September 30 of each year, the commissioner of health shall issue a public report providing statistics for each item listed in subdivision 1 for the previous calendar year compiled from reports submitted according to this section. (2) the number of cases in which the court appointed a guardian ad litem;

(3) the number of cases in which the court appointed counsel;

(4) the number of cases in which the judge issued an order authorizing an abortion without notification, including:

(i) the number of petitions or motions granted by the court because of a finding of maturity and the basis for that finding; and

(ii) the number of petitions or motions granted because of a finding that the abortion would be in the best interest of the minor and the basis for that finding;

(5) the number of denials from which an appeal was filed;

(6) the number of appeals that resulted in a denial being affirmed; and

(7) the number of appeals that resulted in reversal of a denial.
(b) The report shall provide the statistics for all previous calendar years for which a public report was required to be issued, adjusted to reflect any additional information from late or corrected reports.

(c) The commissioner shall ensure that all statistical information included in the public reports are presented so that the data cannot reasonably lead, using epidemiologic principles, to the identification of:

(1) an individual who has had an abortion, who has received judicial authorization for an abortion, or to whom the notice described in section 144.343, subdivision 2, has been provided; or

(2) a physician or facility who has submitted a form to the commissioner under subdivision 3.

Subd. 6. Modification of requirements. The commissioner of health may, by administrative rule, alter the dates established in subdivisions 3 and 5, consolidate the forms created according to subdivision 1 with the reporting form created according to section 145.4131, or consolidate reports to achieve administrative convenience or fiscal savings, to allow physicians and facilities to submit all information collected by the commissioner regarding abortions at one time, or to reduce the burden of the data collection, so long as the report described in subdivision 5 is issued at least once a year.

Subd. 7. Suit to compel statistical report. If the commissioner of health fails to issue the public report required under subdivision 5, any group of ten or more citizens of the state may seek an injunction in a court of competent jurisdiction against the commissioner, requiring that a complete report be issued within a period stated by court order. Failure to abide by the injunction shall subject the commissioner to sanctions for civil contempt.

Subd. 8. Attorney fees. If judgment is rendered in favor of the plaintiff in any action described in this section, the court shall also render judgment for a reasonable attorney fee in favor of the plaintiff against the defendant. If the judgment is rendered in favor of the defendant and the court finds that plaintiff's suit was frivolous and brought in bad faith, the court shall render judgment for a reasonable attorney fee in favor of the defendant against the plaintiff.

Subd. 9. Severability. If any one or more provision, section, subdivision, sentence, clause, phrase, or word of this section or the application thereof to any person or circumstance is found to be unconstitutional, the same is hereby declared to be severable and the balance of this section shall remain effective notwithstanding such unconstitutionality. The legislature intends that it would have passed this section, and each provision, section, subdivision, sentence, clause, phrase, or word thereof irrespective of the fact that any one provision, section, subdivision, sentence, clause, phrase, or word be declared unconstitutional.

Subd. 10. Supreme Court jurisdiction. The Minnesota Supreme Court has original jurisdiction over an action challenging the constitutionality of this section and shall expedite the resolution of the action.

Subdivision 1. **Scope.** Terms used in sections 216B.68 to 216B.688 have the meanings given them in this section and section 216B.02.

Subd. 2. **Agency.** "Agency" means the Minnesota Pollution Control Agency.

Subd. 3. **Dry scrubbed unit.** "Dry scrubbed unit" means a targeted unit at which pollution control technology that uses a spray dryer and fabric filter system to remove pollutants from air emissions is installed or will be installed by December 31, 2007.

Subd. 4. **Federal mercury regulations.** "Federal mercury regulations" means the federal clean air mercury rule as of January 1, 2006, published in Code of Federal Regulations, title 40, parts 60, 63, 70, and 72.
Subd. 5. **Mercury emissions reduction.** "Mercury emissions reduction" means the amount of mercury reduced from the emissions of a targeted or supplemental unit, relative to the emissions baseline from that unit established under section 216B.681, expressed as a percentage.

Subd. 6. **Qualifying facility.** "Qualifying facility" means an electric generating power plant in Minnesota that, as of January 1, 2006, had a total net dependable capacity in excess of 500 megawatts from all coal-fired electric generating units at the power plant.

Subd. 7. **Startup period.** "Startup period" means a period of one year after the date mercury control equipment is installed at a targeted unit under an approved mercury emissions reduction plan, or such longer period as the commission may approve after consultation with the Pollution Control Agency, if a longer period is necessary to optimize equipment performance for mercury reduction.

Subd. 8. **Targeted unit.** "Targeted unit" means a coal-fired electric generation unit greater than 100 megawatts at a qualifying facility.

Subd. 9. **Wet scrubbed unit.** "Wet scrubbed unit" means a targeted unit at which pollution control technology that uses water or solutions to remove pollutants from air emissions is installed.

Sec. 6. **[216B.681] MONITORING.**

By July 1, 2007, a public utility that owns or operates a qualifying facility shall install, maintain, and operate continuous mercury emission monitoring systems or other method of monitoring approved by the agency on each targeted unit and, where applicable, on each supplemental unit pursuant to section 216B.6851. The monitoring systems must use methods set forth in federal mercury regulations or such other methods as may be approved by the agency. The public utility shall report to the agency as public data the quality assured data produced from monitoring implemented pursuant to this section on a quarterly basis in a form prescribed by the agency. The data from at least six months' monitoring must be used to establish a baseline for mercury emissions reductions under sections 216B.68 to 216B.688.

Sec. 7. **[216B.682] MERCURY EMISSIONS REDUCTION PLANS.**

Subdivision 1. **Dry scrubbed units.** (a) By December 31, 2007, a public utility that owns a dry scrubbed unit at a qualifying facility shall develop and submit to the agency and the commission a plan for mercury emissions reduction at each such unit. At each dry scrubbed unit owned and operated by the utility, the plan must propose to employ the available technology for mercury removal that is most likely to result in the removal of at least 90 percent of the mercury emitted from the unit.

(b) A plan submitted under this subdivision must provide for mercury emissions reduction at each dry scrubbed unit to be implemented by December 31, 2010. A public utility that owns two dry scrubbed targeted units must submit a plan that provides for implementation at one unit by December 31, 2009, and at the other unit by December 31, 2010.

Subd. 2. **Wet scrubbed units.** (a) By December 31, 2009, a public utility that owns a wet scrubbed unit at a qualifying facility shall develop and submit to the agency and the commission a plan for mercury emissions reduction at each such unit. At each wet scrubbed unit owned by the utility, the plan must propose to employ the available technology for mercury removal that is most likely to result in the removal of at least 90 percent of the mercury emitted from the unit.

(b) A plan submitted under this subdivision must provide for mercury emissions reduction at each wet scrubbed unit to be implemented by December 31, 2014.
Subd. 3. **Mercury emissions plans generally.** (a) In each plan submitted under this section, a utility shall present information assessing that plan’s ability to optimize human health benefits and achieve cost efficiencies. Each plan must provide the cost, technical feasibility, and mercury emissions reduction expected for the utility’s preferred technology option and each alternative considered. The utility shall demonstrate that it has considered achieving the mercury emissions reduction required under this section through multiple pollutant control technology.

(b) A plan submitted under this section may also:

(1) provide measures to reduce the cost and maximize the flexibility of each option proposed or considered; and

(2) specify permit targets or conditions proposed by the public utility for each mercury emission control option proposed or considered, including, but not limited to, numeric emission targets, percent removal expectations, emission control technology installation and operation requirements or work practice standards, and potential changes in the performance of the mercury emissions reduction technology over time.

(c) The utility may submit an emissions rate rider to the commission under section 216B.683 to recover the costs associated with plans filed under this section.

Sec. 8. **[216B.683] COST RECOVERY AND FINANCIAL INCENTIVES.**

Subdivision 1. **Emissions reduction riders.** (a) A public utility required to file a mercury emissions reduction plan under sections 216B.68 to 216B.688 may also file for approval of emissions reduction rate riders pursuant to section 216B.1692, subdivision 3, for its mercury control and other environmental improvement initiatives under sections 216B.68 to 216B.688.

(b) In addition to the cost recovery provided by section 216B.1692, subdivision 3, the emissions reduction rate riders may include recovery of costs associated with (1) the purchase and installation of continuous mercury emission monitoring systems, (2) costs associated with the purchase and installation of emission reduction equipment, (3) construction work in progress, (4) ongoing operation and maintenance costs associated with the utility’s emission control initiatives, including, but not limited to, the cost of any sorbent or emission control reagent injected into the unit, (5) any project costs incurred before plan approval that are demonstrated to the commission’s satisfaction to be part of the plan, and (6) any studies undertaken by the utility in support of the emissions reduction plan.

(c) The utility may propose to phase in the emissions reduction riders to recover these costs over the development and life of the projects.

Subd. 2. **Performance-based incentives.** A mercury emissions reduction rider approved by the commission may include performance-based financial incentives if the commission determines that the incentives will increase the likelihood that the utility will exceed 90 percent mercury emissions reductions, provided the incentives do not impose excessive costs on the utility’s consumers when added to the costs recovered under subdivision 1. These incentives may include increased returns on investments or other performance-based incentives. The commission may structure the financial incentives to escalate for each additional increment of mercury emissions reduction achieved by the utility above the 90 percent mercury emissions reduction.

Subd. 3. **Other provisions.** (a) Section 216B.1692 applies to plans and emissions control riders proposed under sections 216B.68 to 216B.688, except that:

(1) projects included in a plan approved under sections 216B.68 to 216B.688 are deemed to be qualifying projects for the purposes of section 216B.1692; and
(2) section 216B.1692, subdivisions 5, paragraph (c), and 6, do not apply to plans or riders submitted under sections 216B.68 to 216B.688.

(b) Commission approval of an emissions reduction plan under this section includes approval of an emissions reduction rider associated with that plan if submitted by the utility.

Sec. 9. [216B.684] ENVIRONMENTAL ASSESSMENT.

The Pollution Control Agency shall evaluate a utility's mercury emissions reduction plans filed under sections 216B.682 and 216B.6851 and submit its evaluation to the Public Utilities Commission within 180 days of the date the plan is filed with the agency and commission. In its review, the agency shall (1) assess whether the utility's plan meets the requirements of section 216B.682 or 216B.6851, as applicable, (2) evaluate the environmental and public health benefits of each option proposed or considered by the utility, including benefits associated with reductions in pollutants other than mercury, (3) assess the technical feasibility and cost-effectiveness of technologies proposed or considered by the utility for achieving mercury emissions reduction, and (4) advise the commission of the appropriateness of the utility's plan. In preparing its assessment, the agency may request additional information from the utility, especially with regard to alternative technologies or configurations applicable to the specific unit, and the estimated costs of those alternatives.

Sec. 10. [216B.685] COMMISSION APPROVAL.

Subdivision 1. Commission review and evaluation. The Public Utilities Commission shall review and evaluate a utility's mercury emissions reduction plans and associated emissions reduction riders submitted under section 216B.682 or pursuant to subdivision 2, paragraph (b). In its review, the commission shall consider the environmental and public health benefits, the agency's assessment of technical feasibility, competitiveness of customer rates, and cost-effectiveness of the utility's proposed mercury control initiatives in light of the Pollution Control Agency's report under section 216B.684.

Subd. 2. Commission approval. (a) Within 180 days of receiving the agency's report on a utility's plan filed under section 216B.682, subdivision 1 or 2, the commission shall order the implementation of a utility's mercury emissions reduction plan and associated emissions reduction rider that complies with the requirements of the applicable subdivision of section 216B.682, unless the commission determines that the plan as proposed fails to provide for increased environmental and health benefits or would impose excessive costs on the utility's customers.

(b) If the commission is unable to approve the utility's plan and associated emissions reduction riders as proposed, it shall direct the utility to amend and resubmit its proposed plan in light of the record developed on the proposed plan or, at the utility's option, to file a new plan consistent with the requirements of the applicable subdivision of section 216B.682.

Subd. 3. Technical issues. The commission shall give due consideration to the assessment of the Pollution Control Agency on compliance issues under sections 216B.68 to 216B.688, technical feasibility of emission control technology, and environmental and public health benefits associated with emissions reductions.

Subd. 4. Other provisions. (a) Unless the utility proposes to do so, the commission may not require the replacement of existing pollution control equipment at a targeted or supplemental unit as a condition for approving a plan pursuant to this section or section 216B.6851.

(b) The commission may allow a utility up to two extensions of any deadline established under sections 216B.68 to 216B.688 or commission order under those sections, if the utility demonstrates the unavailability of necessary equipment or other extraordinary circumstances. An extension under this paragraph may last no longer than 12 months. The commission may not extend a deadline for final installation of pollution control equipment for longer than 12 months.
Subd. 5. **Equipment optimization required.** A commission order under this section must require the utility to optimize the operation of equipment installed under a plan approved under this section to obtain maximum mercury reductions and to report the utility's efforts and results annually to the Pollution Control Agency, until such time as the agency determines the reports to be no longer necessary.

Sec. 11. [216B.6851] **UTILITY OPTION.**

Subdivision 1. **Election.** A public utility with less than 200,000 customers subject to sections 216B.68 to 216B.688 that owns two wet scrubbed units at a qualifying facility may opt to be regulated under this section for those units in lieu of section 216B.682. Plans under this section are subject to section 216B.682, subdivision 3. Except where otherwise provided, all other provisions of sections 216B.68 to 216B.688 apply.

Subd. 2. **Supplemental unit.** "Supplemental unit" means a coal-fired electric generation unit at an electric generating power plant in Minnesota at which mercury emissions reduction measures are taken as part of an emissions reduction plan under this section.

Subd. 3. **Plan for 90 percent reduction required.** A public utility that elects to be regulated under this section must file a mercury emissions reduction plan that is designed to achieve total mercury reduction at targeted and supplemental units owned by the utility equivalent to a goal of 90 percent reduction of mercury emissions at the utility's targeted units by December 31, 2014.

Subd. 4. **Alternative plans.** The utility shall also submit one or more alternatives to the 90 percent reduction plan required under subdivision 3. Alternative plans must be designed to come as near as technically possible to achieving the goal established in subdivision 3 without imposing excessive costs on the utility's customers.

Subd. 5. **Early action; wet scrubbed units.** The utility electing for regulation under this section shall file an initial plan for mercury emissions reduction at one of its two wet scrubbed units on or before December 31, 2007. The plan must provide for mercury emissions reduction to be implemented at that unit by December 31, 2010. If the plan is approved by the commission, and implemented by the utility, the utility may have until July 1, 2011, to file its plans for reduction at its other wet scrubbed unit at the qualifying facility, and may have until December 31, 2014, to implement mercury emissions reduction at that unit.

Subd. 6. **Agency review and commission approval.** (a) The agency shall review the utility's plans as provided in section 216B.684.

(b) The Public Utilities Commission shall review and evaluate a utility's mercury emissions reduction plans submitted under this section. In its review, the commission shall consider the environmental and public health benefits, the agency's determination of technical feasibility, competitiveness of customer rates, and cost-effectiveness of the utility's proposed mercury control initiatives in light of the Pollution Control Agency's review under paragraph (a). Within 180 days of receiving the agency's report, the commission shall approve a utility's mercury emissions reduction plan that the commission reasonably expects will come closest to achieving total mercury reductions at targeted and supplemental units owned by the utility equivalent to a goal of 90 percent reduction of mercury emissions at the utility's targeted units by December 31, 2014, in a manner that provides for increased environmental and public health benefits without imposing excessive costs on the utility's customers. If the commission is unable to approve the utility's 90 percent reduction plan filed under subdivision 3, the commission, in consultation with the Pollution Control Agency, shall order the utility to implement the most stringent mercury control alternative proposed by the utility under this section that provides for increased environmental and public health benefits without imposing excessive costs on the utility's customers.
(c) At each targeted and supplemental unit included in a plan under this section, a utility shall propose to implement mercury emissions control measures that will result in the greatest reduction of mercury emitted from that unit that is technically feasible without imposing excessive costs.

Sec. 12. [216B.686] OTHER ENVIRONMENTAL IMPROVEMENT PLANS.

Subdivision 1. Utility filing. (a) In order to encourage a utility to address multiple pollutants, a utility required to submit mercury reduction plans under sections 216B.68 to 216B.688 may also propose plans for investments and related expenses in pollution control equipment to be installed at facilities in Minnesota needed to comply with state or federal emission control statutes or regulations that became effective after December 31, 2004.

(b) For each plan, the utility must show that the investments in pollution control equipment to be installed at facilities in Minnesota under the plan will provide for increased environmental and public health benefits, do not impose excessive costs on the utility's customers, and will achieve at least the pollution control required by applicable state or federal regulations.

Subd. 2. Emission reduction riders. A public utility that files a plan under this section may also file for approval of an emissions reduction rate rider under section 216B.683, subdivision 1.

Subd. 3. Agency review. (a) The Pollution Control Agency shall evaluate a utility's plans filed under this section and, within 180 days of receiving the filing, provide the commission with:

(1) verification that the emissions reduction project qualifies under subdivision 1;

(2) a description of the projected environmental benefits of the proposed project; and

(3) its assessment of the appropriateness of the proposed plans.

(b) In preparing its review under this subdivision, the agency may request additional information from the utility, especially with regard to alternative technologies or configurations applicable to a specific unit, and the estimated costs of those alternatives.

Subd. 4. Commission approval. The commission shall review and evaluate a utility's plans and associated emissions reduction riders for other environmental improvement initiatives submitted under this section. The commission shall consider the overall environmental and public health benefits, total costs, and competitiveness of customer rates. Within 180 days of receiving the agency's report prepared under subdivision 3, the commission shall approve the plan and associated emissions reduction rider if the commission finds that it meets the requirements of subdivision 1, paragraph (b).

Sec. 13. [216B.687] IMPLEMENTATION AND OPERATION.

Subdivision 1. Permit conditions for mercury reductions. The agency shall establish the mercury emissions reduction for each targeted unit included in a plan approved under section 216B.685, or where applicable, for each targeted and supplemental unit included in a plan approved under section 216B.6851.

Subd. 2. Enforcement by the agency. (a) Except as required by federal regulation, any mercury reduction incorporated into the permit for a targeted unit as established under a plan approved under section 216B.685, or where applicable, for each targeted and supplemental unit included in a plan approved under section 216B.6851, must be a state-only condition of the permit and will not be enforced by the agency during the startup period.
(b) After the startup period ends, the Pollution Control Agency shall incorporate into the permit the mercury reduction reasonably expected to be achieved at each unit or facility as an enforceable state-only reduction. For a qualifying facility with multiple units that has one or more units included in approved plans, the agency may establish the mercury emissions reduction for the facility covering all targeted and supplemental units at that facility after the startup periods for all units have concluded, and the actual mercury emissions for the units have been determined. In setting the reduction, the agency shall give due consideration to the results of monitoring before implementation of the plan, the results of monitoring during the startup period, and any factors that may impact the performance of the unit for the next five years.

Subd. 3. **Equipment optimization required.** The agency shall revise the unit's air permit every five years to ensure optimal mercury emissions reduction by equipment installed under an approved plan, in light of technical and operational advances made since the date of plan approval. In revising the unit's air permit, the agency may recommend, but shall not require, additional investments in pollution control equipment, or the removal of equipment installed pursuant to an approved plan. The utility may seek commission review of the costs associated with a permit requirement or request for equipment optimization proposed by the agency and, if review is requested, the revision is not effective until approved by the commission. The commission shall approve the revision unless the utility or other party shows that it will impose excessive consumer costs.

Sec. 14. [216B.688] **RELATIONSHIP TO STATE REGULATION.**

Except as otherwise provided for equipment optimization as specified in section 216B.687, a public utility implementing an approved mercury emissions reduction plan is not required to undertake additional investments or incur additional operating or maintenance costs to reduce mercury at a unit included in a plan approved under section 216B.685 or 216B.6851."
