"Section 1. Minnesota Statutes 2016, section 115.03, subdivision 1, is amended to read:

Subdivision 1. **Generally.** The agency is hereby given and charged with the following powers and duties:

(a) to administer and enforce all laws relating to the pollution of any of the waters of the state;

(b) to investigate the extent, character, and effect of the pollution of the waters of this state and to gather data and information necessary or desirable in the administration or enforcement of pollution laws, and to make such classification of the waters of the state as it may deem advisable;

(c) to establish and alter such reasonable pollution standards for any waters of the state in relation to the public use to which they are or may be put as it shall deem necessary for the purposes of this chapter and, with respect to the pollution of waters of the state, chapter 116;

(d) to encourage waste treatment, including advanced waste treatment, instead of stream low-flow augmentation for dilution purposes to control and prevent pollution;

(e) to adopt, issue, reissue, modify, deny, or revoke, enter into or enforce reasonable orders, permits, variances, standards, rules, schedules of compliance, and stipulation agreements, under such conditions as it may prescribe, in order to prevent, control or abate water pollution, or for the installation or operation of disposal systems or parts thereof, or for other equipment and facilities:

(1) requiring the discontinuance of the discharge of sewage, industrial waste or other wastes into any waters of the state resulting in pollution in excess of the applicable pollution standard established under this chapter;

(2) prohibiting or directing the abatement of any discharge of sewage, industrial waste, or other wastes, into any waters of the state or the deposit thereof or the discharge into any municipal disposal system where the same is likely to get into any waters of the state in violation of this chapter and, with respect to the pollution of waters of the state, chapter 116, or standards or rules promulgated or permits issued pursuant thereto, and specifying the schedule of compliance within which such prohibition or abatement must be accomplished;

(3) prohibiting the storage of any liquid or solid substance or other pollutant in a manner which does not reasonably assure proper retention against entry into any waters of the state that would be likely to pollute any waters of the state;

(4) requiring the construction, installation, maintenance, and operation by any person of any disposal system or any part thereof, or other equipment and facilities, or the reconstruction, alteration, or enlargement of its existing disposal system or any part thereof, or the adoption of other remedial measures to prevent, control or abate any discharge or deposit of sewage, industrial waste or other wastes by any person;

(5) establishing, and from time to time revising, standards of performance for new sources taking into consideration, among other things, classes, types, sizes, and categories of sources, processes, pollution control technology, cost of achieving such effluent reduction, and any nonwater quality environmental impact and energy requirements. Said standards of performance for new sources shall encompass those standards for the control of the discharge of pollutants which reflect the greatest degree of effluent reduction which the agency determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants. New sources shall encompass buildings, structures, facilities, or installations from which there is or may be the discharge of pollutants, the construction of which is commenced after the publication by the agency of proposed rules prescribing a standard of performance which will be applicable to such source. Notwithstanding any other provision of the law of this state, any point source the construction of which is commenced after May 20, 1973, and which is so constructed as to meet all applicable standards of performance for new sources shall, consistent with and subject to the provisions of section 306(d) of the Amendments of 1972 to the Federal Water Pollution Control Act, not be subject to any more stringent standard of performance for new sources during a ten-year period beginning on the date of completion of such construction or during the period of depreciation or amortization of such facility for the purposes of section 167 or 169, or both, of the Federal Internal Revenue Code of 1954, whichever period ends first. Construction shall encompass any placement, assembly, or installation of facilities or equipment, including contractual obligations to purchase such facilities or equipment, at the premises where such equipment will be used, including preparation work at such premises;

(6) establishing and revising pretreatment standards to prevent or abate the discharge of any pollutant into any publicly owned disposal system, which pollutant interferes with, passes through, or otherwise is incompatible with such disposal system;

(7) requiring the owner or operator of any disposal system or any point source to establish and maintain such records, make such reports, install, use, and maintain such monitoring equipment or methods, including where appropriate biological monitoring methods, sample such effluents in accordance with such methods, at such locations, at such intervals, and in such a manner as the agency shall prescribe, and providing such other information as the agency may reasonably require;

(8) notwithstanding any other provision of this chapter, and with respect to the pollution of waters of the state, chapter 116, requiring the achievement of more stringent limitations than otherwise imposed by effluent limitations in order to meet any applicable water quality standard by establishing new effluent limitations, based upon section 115.01, subdivision 13, clause (b), including alternative effluent control strategies for any point source or group of point sources to insure the integrity of water quality classifications, whenever the agency determines that discharges of pollutants from such point source or sources, with the application of effluent limitations required to comply with any standard of best available technology, would interfere with the attainment or maintenance of the water quality classification in a specific portion of the waters of the state. Prior to establishment of any such effluent limitation, the agency shall hold a public hearing to determine the relationship of the economic and social costs of achieving such limitation or limitations, including any economic or social dislocation in the affected community or communities, to the social and economic benefits to be obtained and to determine whether or not such effluent limitation can be implemented with available technology or other alternative control strategies. If a person affected by such limitation demonstrates at such hearing that, whether or not such technology or other alternative control strategies are available, there is no reasonable relationship between the economic and social costs and the benefits to be obtained, such limitation shall not become effective and shall be adjusted as it applies to such person;

(9) modifying, in its discretion, any requirement or limitation based upon best available technology with respect to any point source for which a permit application is filed after July 1, 1977, upon a showing by the owner or operator of such point source satisfactory to the agency that such modified requirements will represent the maximum use of technology within the economic capability of the owner or operator and will result in reasonable further progress toward the elimination of the discharge of pollutants; and

(10) requiring that applicants for wastewater discharge permits evaluate in their applications the potential reuses of the discharged wastewater;

(f) to require to be submitted and to approve plans and specifications for disposal systems or point sources, or any part thereof and to inspect the construction thereof for compliance with the approved plans and specifications thereof;

(g) to prescribe and alter rules, not inconsistent with law, for the conduct of the agency and other matters within the scope of the powers granted to and imposed upon it by this chapter and, with respect to pollution of waters of the state, in chapter 116, provided that every rule affecting any other department or agency of the state or any person other than a member or employee of the agency shall be filed with the secretary of state;

(h) to conduct such investigations, issue such notices, public and otherwise, and hold such hearings as are necessary or which it may deem advisable for the discharge of its duties under this chapter and, with respect to the pollution of waters of the state, under chapter 116, including, but not limited to, the issuance of permits, and to authorize any member, employee, or agent appointed by it to conduct such investigations or, issue such notices and hold such hearings;

(i) for the purpose of water pollution control planning by the state and pursuant to the Federal Water Pollution Control Act, as amended, to establish and revise planning areas, adopt plans and programs and continuing planning processes, including, but not limited to, basin plans and areawide waste treatment management plans, and to provide for the implementation of any such plans by means of, including, but not limited to, standards, plan elements, procedures for revision, intergovernmental cooperation, residual treatment process waste controls, and needs inventory and ranking for construction of disposal systems;

(j) to train water pollution control personnel, and charge such fees therefor as are necessary to cover the agency's costs. The fees under this paragraph are subject to legislative approval under section 16A.1283. All such fees received shall be paid into the state treasury and credited to the Pollution Control Agency training account;

(k) to impose as additional conditions in permits to publicly owned disposal systems appropriate measures to insure compliance by industrial and other users with any pretreatment standard, including, but not limited to, those related to toxic pollutants, and any system of user charges ratably as is hereby required under state law or said Federal Water Pollution Control Act, as amended, or any regulations or guidelines promulgated thereunder;

(l) to set a period not to exceed five years for the duration of any national pollutant discharge elimination system permit or not to exceed ten years for any permit issued as a state disposal system permit only;

(m) to require each governmental subdivision identified as a permittee for a wastewater treatment works to evaluate in every odd-numbered year the condition of its existing system and identify future capital improvements that will be needed to attain or maintain compliance with a national pollutant discharge elimination system or state disposal system permit; and

(n) to train subsurface sewage treatment system personnel, including persons who design, construct, install, inspect, service, and operate subsurface sewage treatment systems, and charge fees as necessary to pay the agency's costs. The fees under this paragraph are subject to legislative approval under section 16A.1283. All fees received must be paid into the state treasury and credited to the agency's training account. Money in the account is appropriated to the agency to pay expenses related to training.

The information required in clause (m) must be submitted in every odd-numbered year to the commissioner on a form provided by the commissioner. The commissioner shall provide technical assistance if requested by the governmental subdivision.

The powers and duties given the agency in this subdivision also apply to permits issued under chapter 114C.

Sec. 2. Minnesota Statutes 2016, section 115.77, subdivision 1, is amended to read:

Subdivision 1. **Fees.** The agency shall collect fees in amounts necessary, but no greater than the amounts necessary, to cover the reasonable costs of reviewing applications and issuing certifications. The fees under this subdivision are subject to legislative approval under section 16A.1283.

Sec. 3. Minnesota Statutes 2016, section 115.84, subdivision 2, is amended to read:

Subd. 2. **Rules.** The agency may adopt rules to govern certification of laboratories according to this section. ~~Notwithstanding section 16A.1283, the agency may adopt rules establishing fees.~~

Sec. 4. Minnesota Statutes 2016, section 115.84, subdivision 3, is amended to read:

Subd. 3. **Fees.** (a) Until the agency adopts a rule establishing fees for certification, the agency shall collect fees from laboratories registering with the agency, but not accredited by the commissioner of health under sections 144.97 to 144.99, in amounts necessary to cover the reasonable costs of the certification program, including reviewing applications, issuing certifications, and conducting audits and compliance assistance. The fees under this paragraph are subject to legislative approval under section 16A.1283.

(b) Fees under this section must be based on the number, type, and complexity of analytical methods that laboratories are certified to perform.

(c) Revenue from fees charged by the agency for certification shall be credited to the environmental fund.

Sec. 5. Minnesota Statutes 2017 Supplement, section 116.07, subdivision 4d, is amended to read:

Subd. 4d. **Permit fees.** (a) The agency may collect permit fees in amounts not greater than those necessary to cover the reasonable costs of developing, reviewing, and acting upon applications for agency permits and implementing and enforcing the conditions of the permits pursuant to agency rules. Permit fees shall not include the costs of litigation. The fee schedule must reflect reasonable and routine direct and indirect costs associated with permitting, implementation, and enforcement. The agency may impose an additional enforcement fee to be collected for a period of up to two years to cover the reasonable costs of implementing and enforcing the conditions of a permit under the rules of the agency. Water fees under this paragraph are subject to legislative approval under section 16A.1283. Any money collected under this paragraph shall be deposited in the environmental fund.

(b) Notwithstanding paragraph (a), the agency shall collect an annual fee from the owner or operator of all stationary sources, emission facilities, emissions units, air contaminant treatment facilities, treatment facilities, potential air contaminant storage facilities, or storage facilities subject to a notification, permit, or license requirement under this chapter, subchapters I and V of the federal Clean Air Act, United States Code, title 42, section 7401 et seq., or rules adopted thereunder. The annual fee shall be used to pay for all direct and indirect reasonable costs, including legal costs, required to develop and administer the notification, permit, or license program requirements of this chapter, subchapters I and V of the federal Clean Air Act, United States Code, title 42, section 7401 et seq., or rules adopted thereunder. Those costs include the reasonable costs of reviewing and acting upon an application for a permit; implementing and enforcing statutes, rules, and the terms and conditions of a permit; emissions, ambient, and deposition monitoring; preparing generally applicable regulations; responding to federal guidance; modeling, analyses, and demonstrations; preparing inventories and tracking emissions; and providing information to the public about these activities.

(c) The agency shall set fees that:

(1) will result in the collection, in the aggregate, from the sources listed in paragraph (b), of an amount not less than \$25 per ton of each volatile organic compound; pollutant regulated under United States Code, title 42, section 7411 or 7412 (section 111 or 112 of the federal Clean Air Act); and each pollutant, except carbon monoxide, for which a national primary ambient air quality standard has been promulgated;

(2) may result in the collection, in the aggregate, from the sources listed in paragraph (b), of an amount not less than \$25 per ton of each pollutant not listed in clause (1) that is regulated under this chapter or air quality rules adopted under this chapter; and

(3) shall collect, in the aggregate, from the sources listed in paragraph (b), the amount needed to match grant funds received by the state under United States Code, title 42, section 7405 (section 105 of the federal Clean Air Act).

The agency must not include in the calculation of the aggregate amount to be collected under clauses (1) and (2) any amount in excess of 4,000 tons per year of each air pollutant from a source. The increase in air permit fees to match federal grant funds shall be a surcharge on existing fees. The commissioner may not collect the surcharge after the grant funds become unavailable. In addition, the commissioner shall use nonfee funds to the extent practical to match the grant funds so that the fee surcharge is minimized.

(d) To cover the reasonable costs described in paragraph (b), the agency shall provide in the rules promulgated under paragraph (c) for an increase in the fee collected in each year by the percentage, if any, by which the Consumer Price Index for the most recent calendar year ending before the beginning of the year the fee is collected

exceeds the Consumer Price Index for the calendar year 1989. For purposes of this paragraph the Consumer Price Index for any calendar year is the average of the Consumer Price Index for all-urban consumers published by the United States Department of Labor, as of the close of the 12-month period ending on August 31 of each calendar year. The revision of the Consumer Price Index that is most consistent with the Consumer Price Index for calendar year 1989 shall be used.

(e) Any money collected under paragraphs (b) to (d) must be deposited in the environmental fund and must be used solely for the activities listed in paragraph (b).

(f) Permit applicants who wish to construct, reconstruct, or modify a project may offer to reimburse the agency for the costs of staff time or consultant services needed to expedite the preapplication process and permit development process through the final decision on the permit, including the analysis of environmental review documents. The reimbursement shall be in addition to permit application fees imposed by law. When the agency determines that it needs additional resources to develop the permit application in an expedited manner, and that expediting the development is consistent with permitting program priorities, the agency may accept the reimbursement. The commissioner must give the applicant an estimate of costs to be incurred by the commissioner. The estimate must include a brief description of the tasks to be performed, a schedule for completing the tasks, and the estimated cost for each task. The applicant and the commissioner must enter into a written agreement detailing the estimated costs for the expedited permit decision-making process to be incurred by the agency. The agreement must also identify staff anticipated to be assigned to the project. The commissioner must not issue a permit until the applicant has paid all fees in full. The commissioner must refund any unobligated balance of fees paid. Reimbursements accepted by the agency are appropriated to the agency for the purpose of developing the permit or analyzing environmental review documents. Reimbursement by a permit applicant shall precede and not be contingent upon issuance of a permit; shall not affect the agency's decision on whether to issue or deny a permit, what conditions are included in a permit, or the application of state and federal statutes and rules governing permit determinations; and shall not affect final decisions regarding environmental review.

(g) The fees under this subdivision are exempt from section 16A.1285."

The utility subject to section 116C.779 shall operate a program to provide solar energy production incentives for solar energy systems of no more than a total aggregate nameplate capacity of ~~20~~ 40 kilowatts direct current per premise. The owner of a solar energy system installed before June 1, 2018, is eligible to receive a production incentive under this section for any additional solar energy systems constructed at the same customer location, provided that the aggregate capacity of all systems at the customer location does not exceed 40 kilowatts. The program shall be operated for eight consecutive calendar years commencing in 2014. \$5,000,000 shall be allocated in each of the first four years, \$15,000,000 in the fifth year, \$10,000,000 in each of the sixth and seventh years, and \$5,000,000 in the eighth year from funds withheld from transfer to the renewable development account under section 116C.779, subdivision 1, paragraphs (b) and (e), and placed in a separate account for the purpose of the solar production incentive program operated by the utility and not for any other program or purpose. The solar system must be sized to less than 120 percent of the customer's on-site annual energy consumption when combined with other distributed generation resources and subscriptions provided under section 216B.1641 associated with the premise. The production incentive must be paid for ten years commencing with the commissioning of the system. The utility must file a plan to operate the program with the commissioner of commerce. The utility may not operate the program until it is approved by the commissioner. A change to the program to include projects up to a nameplate capacity of 40 kilowatts or less does not require the utility to file a plan with the commissioner. Any plan approved by the commissioner of commerce must not provide an increased incentive scale over prior years unless the commissioner demonstrates that changes in the market for solar energy facilities require an increase.

An order of suspension under this paragraph may be issued by the commissioner, upon review of the ~~results of the audit report~~, review of the applicable provisions of this chapter, and after providing the agency a reasonable opportunity to respond to the audit's findings.

(c) A statutory or home rule charter city, pursuant to an ordinance or charter provision establishing standards to be applied uniformly within its jurisdiction, may prohibit or impose reasonable conditions upon the conversion of buildings occupied wholly or partially for (i) residential use or (ii) residential rental purposes to the common interest community form of ownership only if there exists within the city a significant shortage of suitable rental dwellings available to low and moderate income individuals or families or to establish or maintain the city's eligibility for any federal or state program providing direct or indirect financial assistance for housing to the city. Prior to the adoption of an ordinance pursuant to the authority granted in this subsection, the city shall conduct a public hearing. Any ordinance or charter provision adopted pursuant to this subsection shall not apply to any existing or proposed conversion common interest community (i) for which a bona fide loan commitment for a consideration has been issued by a lender and is in effect on the date of adoption of the ordinance or charter provision, or (ii) for which a notice of conversion or intent to convert required by section 515B.4-111, containing a termination of tenancy, has been given to at least 75 percent of the tenants and subtenants in possession prior to the date of adoption of the ordinance or charter provision.

(d) For purposes of providing marketable title, a statement in the declaration that the common interest community is not subject to an ordinance or that any conditions required under an ordinance have been complied with shall be prima facie evidence that the common interest community was not created in violation of the ordinance.

(e) A violation of an ordinance or charter provision adopted pursuant to the provisions of subsection (b) or (c) shall not affect the validity of a common interest community. This subsection shall not be construed to in any way limit the power of a city to enforce the provisions of an ordinance or charter provision adopted pursuant to subsection (b) or (c).

(f) Any ordinance or charter provision enacted hereunder that prohibits the conversion of buildings to the common interest community form of ownership shall not be effective for a period exceeding 18 months.

Sec. 4. Minnesota Statutes 2016, section 515B.2-113, is amended to read:

515B.2-113 ALTERATION OF UNITS.

(a) Subject to the provisions of the declaration and applicable law, a unit owner may, at the unit owner's expense, make any improvements or alterations to the unit, provided: (i) that they do not impair the structural integrity or mechanical systems, affect the common elements, or impair the support of any portion of the common interest

community; (ii) that prior arrangements are made with the association to ensure that other unit owners are not disturbed; (iii) that the common elements are not damaged; and (iv) that the common elements and other units are protected against mechanics' liens.

(b) Subject to the provisions of applicable law, a unit owner of a unit ~~in residential use~~ that is used as a dwelling, whether primary, secondary, or seasonal, may, at the unit owner's expense, make improvements or alterations to the unit as necessary for the full enjoyment of the unit by any person residing in the unit who has a disability, as provided in the Fair Housing Amendments Act, United States Code, title 42, section 3601, et seq., and the Minnesota Human Rights Act, chapter 363A, and any amendments to those acts. This subsection applies to all common interest communities subject to this chapter, chapter 515, or 515A, notwithstanding any contrary provision of section 515B.1-102.

(c) The declaration, bylaws, rules, and regulations, or agreements with the association may not prohibit the improvements or alterations referred to in subsection (b), but may reasonably regulate the type, style, and quality of the improvements or alterations, as they relate to health, safety, and architectural standards. In addition, improvements or alterations made pursuant to subsection (b) must comply with subsection (a)(i), (ii), (iii), and (iv).

(d) The unit owner's rights under this section may not be waived.

(e) Subsection (b) does not apply to restrictions on improvements or alterations imposed by statute, rule, or ordinance.

(f) Subject to the provisions of the declaration and applicable law, a unit owner may, at the unit owner's expense, after acquiring title to an adjoining unit or an adjoining part of an adjoining unit, with the prior written approval of the association and first mortgagees of the affected units, remove or alter any intervening partition or create apertures therein, even if the partition is part of the common elements, if those acts do not impair the structural integrity or mechanical systems or lessen the support of any portion of the common interest community. The adjoining unit owners shall have the exclusive license to use the space occupied by the removed partition, but the use shall not create an easement or vested right. Removal of partitions or creation of apertures under this subsection is not an alteration of boundaries. The association may require that the owner or owners of units affected replace or restore any removed partition, that the unit owner comply with subsection (a)(i), (ii) and (iii), and that the unit owner pay all fees and costs incurred by the association in connection with the alteration.

Sec. 5. Minnesota Statutes 2016, section 515B.4-111, is amended to read:

515B.4-111 CONVERSION PROPERTY.

(a) A unit owner of a unit ~~occupied for residential use~~ in a common interest community containing conversion property shall not, for a period of one year following the recording of the declaration creating the common interest community, require any occupant ~~of the unit who was residing in the unit at the time the declaration was recorded~~ to vacate the unit unless the unit owner gives notice to the occupant in the manner described in this section. The notice shall be given no later than 120 days before the occupant is required to vacate the unit. The notice shall be sufficient as to all occupants of a unit if it is hand delivered or mailed to the unit to be vacated, addressed to the occupants thereof. If the holder of the lessee's interest in the unit has given the unit owner an address different than that of the unit, then the notice shall also be given to the holder of the lessee's interest at the designated address. The notice shall comply with the following requirements:

(1) The notice shall set forth generally the rights conferred by this section.

(2) The notice shall have attached a form of purchase agreement setting forth the proposed terms of sale of the unit to the holder of the lessee's interest as contemplated by subsection (d) and a statement of any significant restrictions imposed by the declaration on the use and occupancy of the unit.

(3) The notice shall state that the occupants of the ~~residential~~ unit may demand to be given 60 additional days before being required to vacate, if any of them, or any person residing with them, is (i) 62 years of age or older, (ii) a person with a disability as defined in section 268A.01, or (iii) a minor child on the date the notice is given. This demand must be in writing, contain reasonable proof of qualification, and be given to the declarant within 30 days after the notice of conversion is delivered or mailed.

(4) The notice shall be contained in an envelope upon which the following shall be boldly printed: "Notice of Conversion."

(b) Notwithstanding subsection (a), an occupant may be required to vacate a unit upon less than 120 days' notice by reason of nonpayment of rent, utilities or other monetary obligations, violations of law, waste, or conduct that disturbs other occupants' peaceful enjoyment of the premises. The terms of the tenancy may not be altered during the notice period, except that the holder of the lessee's interest or other party in possession may vacate and terminate the tenancy upon one month's written notice to the declarant. Nothing in this section prevents the unit owner and any occupant from agreeing to a right of occupancy on a month-to-month basis beyond the 120-day notice period, or to an earlier termination of the right of occupancy.

(c) No repair work or remodeling may be commenced or undertaken in the occupied units or common areas of the building during the notice period, unless reasonable precautions are taken to ensure the safety and security of the occupants.

(d) For 60 days after delivery or mailing of the notice described in subsection (a), the holder of the lessee's interest in the unit on the date the notice is mailed or delivered shall have an option to purchase that unit on the terms set forth in the purchase agreement attached to the notice. The purchase agreement shall contain no terms or provisions which violate any state or federal law relating to discrimination in housing. If the holder of the lessee's interest fails to sign a binding purchase agreement for the unit during that 60-day period, the unit owner may not offer to dispose of an interest in that unit during the following 180 days at a price or on terms more favorable to the offeree than the price or terms offered to the holder. This subsection and subsection (a)(2) do not apply to any unit in a conversion property if that unit will be restricted exclusively to nonresidential use or if the boundaries of the converted unit do not substantially conform to the boundaries of the residential unit before conversion.

(e) If a unit owner, in violation of subsection (b), conveys a unit to a purchaser for value who has no knowledge of the violation, the recording of the deed conveying the unit or, in a cooperative, the conveyance of the right to possession of the unit, extinguishes any right a holder of a lessee's interest who is not in possession of the unit may have under subsection (d) to purchase that unit, but the conveyance does not affect the right of the holder to recover damages from the unit owner for a violation of subsection (d).

(f) If a notice described in subsection (a) specifies a date by which a unit or proposed unit must be vacated or otherwise complies with the provisions of chapter 504B, the notice also constitutes a notice to vacate specified by that statute.

(g) An occupant of residing in space ~~for residential use~~ in a conversion property shall not have any of the rights set out in this section or under any municipal ordinance if the holder of the lessee's interest in the space received written notice of intent to convert to a common interest community (i) before signing a lease or a lease renewal or before occupying the space and (ii) less than two years before the common interest community is created.

(h) A notice of intent to convert to a common interest community shall identify the conversion property by both legal description and street address and state that (i) the declarant intends to convert the property to a planned community, condominium, or cooperative form of common interest community, specifying the intended form, and (ii) persons entering into leases subsequent to the receipt of the notice of intent to convert will not have the rights available to an occupant or a person holding the lessee's interest under this section.

(i) Nothing in this section permits a unit owner to terminate a lease in violation of its terms.

(j) Failure to give notice as required by subsection (a) is a defense to an action for possession."
