**751**

Providers who submitted a plan participated in QI training opportunities

**65%** of them commented on how the trainings were useful

**67%** of providers who submitted a plan visited the HCBS Improvement Website

*"The training broadened our perspective regarding possible in-house quality projects and ways to implement these boundaries."*

*Sharing information with other providers and brainstorming together was helpful.*

*The HCBS Website is very user friendly. Able to use examples from the website and implement them into a facility."*

**82%**

Providers found this Quality Improvement Initiative useful

*"Normally, quality improvement isn't something we think about. It forces us, in a helpful way, to think outside the box on the quality services and safety measures we can and should be taking on."*

*Helps make us more accountable for the care we provide and person centered approaches"*
