

Constitutional Amendment Investment Goals

- Meet all Constitutional and legal requirements.
- Use existing funding systems, state agencies and entities to distribute the funds rather than creating new bureaucracy.
- Increase the percentage of Minnesotans who participate in the enjoyment, use and maintenance of our cultural and outdoors resources.
- Create a ___-year plan for each fund based on current science and public engagement with outcomes achieved in a reasonable amount of time.
- Prevent pollution and restore impaired waters.
- Provide every Minnesotan greater access to arts and cultural activities, arts education opportunities, clean water (including quality drinking water), a fully restored outdoors environment with hunting and fishing opportunities, outdoor recreation, public broadcasting signals and celebrations of Minnesota's traditions and history.
- Develop and use indicators of success and accountability, meeting the public's demands for open and transparent processes.
- Strive toward meeting statewide priorities and values, emphasizing geographical and regional fairness within each fund.
- Give priority to projects that improve the state or regional economy, creating jobs and leveraging non-state money.
- Increase outreach and encourage participation in the legislative and grant making process resulting in a wider variety of Minnesotans receiving funds.
- Develop innovative uses of funds that work across traditional boundaries and encourage cooperation among multiple interest groups.
- Communicate through visible identification the direct results of Constitutional amendment investments.
