### Section

- 1 **Specific location data.** Makes "specific location data" public data in statutes.
- 2 **Specific location data.** Defines "specific location data" to mean data that enable persons to locate a protected wild animal, or endangered, threatened, or special concern plant or animal identified by the data.

Classifies this data as non-public if disclosure is likely to hinder:

- DNR management, propagation or research;
- facilitate the unfair chase or illegal taking, transport, or sale of a species; or
- decrease the likelihood of establishing a protected species of wildlife, or recovering a special concern, threatened, or endangered species.

Allows for the disclosure of nonpublic specific location data to promote public benefits like environmental review, research, education, conservation planning, or providing information to landowners about specific locations on their property.
