### Section

- 1 Facility rate determination.** Amends § 256B.431, by adding subd.40. Requires a nursing facility located in Chisago County that received approval under the competitive moratorium exception process to relocate 108 beds to a new facility to have its operating rates established under interim and settle-up provisions in Minnesota Rules and this section, except that the spend-up and high-cost limits do not apply until the second rate year after filing a settle-up cost report. Classifies the facility in geographic group 3 for purposes of rate calculation and provides that the property rate is to be calculated using the procedures that apply to competitive moratorium exceptions. If the interim and settle-up rates are calculated prior to implementation of any new nursing home reimbursement system, the procedures in this subdivision apply. If the rates are calculated after implementation, the procedures of the new system apply.
