### Overview

Minnesota's health and safety revenue program allows a school district to develop a plan and receive revenue through a partially equalized levy to eliminate health and safety hazards in school facilities. The 2003 Legislature limited health and safety revenue for certain purposes and clarified the uses of health and safety revenue for heating and ventilation system modifications.

This bill allows the St. Peter school district to receive health and safety revenue for the purpose of installing an energy recovery system as part of the high school pool ventilation project.

### Section

- 1 Health and safety revenue; St. Peter.** Authorizes Independent School District No. 508, St. Peter, to include in its qualifying list of uses of health and safety revenue the costs associated with installing an energy recovery system as part of the high school pool ventilation project.
