### Section

- 1 Structures in or adjacent to public waters.** Defines "watercraft storage structure" for storing boats and equipment, or float planes.

Amends Minnesota Statutes, section 103G.245, subdivision 4, by allowing a DNR public waters work permit for watercraft storage structures under certain conditions when also permitted by a local government unit. Conditions include when the structure: is in a historic use area; in existence prior to July 1, 2005; is not habitable or connected to a sewage system; and does not increase the total area of structures or their height.

Allows the repair or replacement of watercraft storage structures with a DNR permit also.

This section is effective the day following final enactment.
