

Judge Dehn's Staggered Sentencing Program

List of Offenders Sentenced Prior to July 15, 2002, the Date of the Driver's License Check for Recidivism

Note that, as used in this table, the term "DWI" actually refers to "Impaired Driving Incident," where "incident date" is the date of the arrest.

Actual (Aggregate) Survival T -----

Total Days = 49,127

Mean Days = 805.4

Total Months = 1615.1

Survival time is calculated as the number of days from the triggering impaired driving incident date to the date of the first subsequent impaired driving incident, if any, or to the date of the driver's license record check (i.e., the follow-up cutoff date for the study).
An "incident" is defined as an arrest.
