

House Research Simulation Report: Property Tax

Simulation #1W1

Date 6/29/2001

Steve Hinze, Legislative Analyst (651-296-8956)

DESCRIPTION

BASELINE: Preliminary Pay 2001

ALTERNATIVE: Projected Pay 2002: Special Session HF 1 (6/27)

This report compares property tax burdens payable in 2001 with property taxes payable in 2002 under the Special Session HF 1 (the omnibus tax bill), including most of the education finance provisions included in the tax bill. The baseline payable 2002 projections result from a joint House/Senate/ Revenue Dept. working group. The assumptions governing the simulation of the Tax bill is given on page iii.

KEY POINTS

- ! **Statewide, property taxes are projected to be \$613 million (or 12.2%) lower in pay 2002 than in pay 2001**, according to the simulation. The reductions are projected to be 14.7% in Greater Minnesota and 10.8% in the Metro area..
- ! **Property tax impacts by property type range from -37% to -7%**. Types of property with the greatest tax reductions are electric generation attached machinery (37.%), single-unit residential nonhomestead (24%), apartments (20%), residential homesteads (19.4%), and agricultural homesteads (17.0%). Seasonal-recreational property has the lowest percentage reduction (6.5%).

The simulations are estimates only. House Research strives to make property tax simulations accurate, but simulations are only approximations of reality. They depend upon judgements about how much local government officials will decide to levy, which are highly speculative. Generally the results are most accurate on a statewide level, and tend to be less accurate as the jurisdiction under scrutiny gets smaller.

ASSUMPTIONS:

BASELINE: **Preliminary Pay 2001**

- ! **Property values** (limited market values) are actual values reported by county assessors on the abstracts of assessment.
- ! **Local government levies** are from a survey of county auditors done by the Dept. of Revenue.
- ! **Tax increment financing (TIF) net tax capacities** are preliminary values from the abstracts of assessment submitted by county assessors to the Dept. of Revenue; the final figures will be reported later this year when the abstracts of tax lists are filed by county auditors.

ASSUMPTIONS:

ALTERNATIVE: Projected Pay 2002: Special Session HF 1 (6/27)

- ! **Market values** were developed from actual growth in property values between assessment year 1999 and assessment year 2000, with growth measured separately for growth on existing value and growth due to new construction. These results were augmented for Dakota and Hennepin Counties with preliminary information provided by the county assessor. Inflationary changes on properties subject to limited market value restraints were limited to the appropriate growth rate. Market value growth for property types with a tiered class rate structure were assumed to be split between tiers in the same percentages as the growth from pay 2000 to pay 2001, on a city-by-city and a class-by-class basis.
- ! Baseline **school district levies** were modeled under the direction of a joint House/Senate/Revenue Dept. working group. The baseline pay 2002 levies were developed to match statewide levy estimates by category developed by the Dept. of Children, Families and Learning. Approximately \$65 million of new referendum levies are assumed; they are distributed evenly across all districts that have not had a successful referendum recently. Final 2000 sales ratios were used in computing adjusted net tax capacities. Levy changes under the bill were modeled by the House Research Dept. according to the provisions of the bill using the same underlying assumptions as in the baseline. A portion of the new referendum levy authority resulting from the increased referendum limits in the bill was assumed to be levied, but not all of the increased authority.
- ! Baseline **county, city, and town levies** were modeled under the direction of a joint House/Senate/Revenue Dept. working group. The basic methodology employed is a two-year average of levy plus aid. In a few cases, the estimates were changed based upon discussions with individual local government officials. Levies were reduced in some cases based upon the levy limit provisions of the bill. LGA provisions in the bill were modeled by House Research. All jurisdictions are assumed to levy back all HACA and LGA aid losses. Adjustments were made to city levies based on the new Greater Minnesota transit aid.
- ! **Special taxing district levies** were generally increased by 13%, except for the metro-wide special taxing districts, which were modeled based upon individual levy categories and levy limits governing each category. Metro agency bonded debt levy estimates were provided by metro agency staff. The Metropolitan Council's levy for transit operations was eliminated.
- ! **The new homestead credit** was modeled; the estimated cost of the credit under the proposal is \$323 million.
- ! **The new agricultural credit** was modeled; the estimated cost of the credit under the proposal is \$17.6 million.
- ! Baseline **fiscal disparities** net tax capacities were modeled, and then reduced by the same percentage as the percentage class rate reduction for upper-tier C/I property.
- ! Baseline **tax increment financing** net tax capacities were assumed to grow at the same rate as the change in commercial-industrial net tax capacity, then reduced by the same percentage as the percentage class rate reduction for upper-tier C/I property.

SIMULATION PARAMETERS

	Baseline	Alternative
Residential Homestead:		
< \$76,000	1.0 %	1.0 %
\$76,000 - \$500,000	1.65	1.0
> \$500,000	1.65	1.25
