

House Research Simulation Report: Property Tax

Simulation #4A4

Date 12/16/2003

Steve Hinze, Legislative Analyst (651-296-8956)

DESCRIPTION

BASELINE: Final Pay 2003

ALTERNATIVE: Prelim Pay 2004: TNT Levies incl new referendums (revised 12/16)

This report compares proposed property taxes for taxes payable in 2004 to actual property taxes payable in 2003. It incorporates a few modest revisions compared to simulations 4A1 and 4A2. The 2004 taxes are based on proposed levies certified by each taxing jurisdiction to fulfill the requirements of the truth-in-taxation (TNT) process. The simulation also incorporates the results of referendum elections held this fall, (generally, fall referendum results are not incorporated into TNT levies). Final levies may be less than the proposed levies shown in this simulation, but cannot be higher. The market values used are actual for taxes payable in 2004, as reported by county assessors to the Dept. of Revenue. The breakout of market value between value on existing structures and new construction amounts is based on data reported by the counties to the Dept. of Revenue.

KEY POINTS

- **Statewide, property taxes would increase by \$356 million, or 7.1%**, if proposed levies were enacted, according to the simulation. Approximately \$129 million of the \$356 million increase is borne by new construction - property appearing on the tax rolls for the first time in 2004. The overall tax increases are 9.6% in Greater Minnesota and 5.8% in the Metro area.
- **Statewide property tax impacts by property type vary from -11.9% to +17.3%**. Impacts on the largest property types are 7.7% on existing residential homesteads, -3.7% on existing apartments, 0.8% on existing commercial-industrial property, and 5% on existing agricultural property.

The simulations are estimates only. House Research strives to make property tax simulations accurate, but simulations are only approximations of reality. They depend upon judgments about how much local government officials will decide to levy, which are highly speculative. Generally the results are most accurate on a statewide level, and tend to be less accurate as the jurisdiction under scrutiny gets smaller.

ASSUMPTIONS:**BASELINE: Final Pay 2003**

- **Property values** (limited market values) are actual values reported by county assessors on the abstracts of assessment.
- **Local government levies** are levies reported by county auditors on the abstracts of tax lists.

ALTERNATIVE: Prelim Pay 2004: TNT levies incl new referendums (revised 12/16)

- **Market values** (taxable market values) are actual values reported by county assessors on the abstracts of assessment. A number of counties revised their abstracts of assessment after the initial submission; this simulation is based on the revised abstracts. The breakdown of market value amounts between valuation changes on existing properties and new construction is based on new construction amounts reported on the fall mini-abstract of assessment.
- **Levies** are preliminary levies (also called truth-in-taxation, or TNT levies) reported by county auditors to the Dept. of Revenue. TNT levies have been augmented with information about referendum levies that have been approved after TNT levies were certified. In the aggregate, final certified levies will be less than TNT levies, although they may not be for any specific jurisdiction.
- **The state levy** is \$624.5 million, which is the certified level set by the Dept. of Revenue.
- **Tax increment financing net tax capacities** are derived from the abstracts of assessment; generally these figures will undergo some changes before final figures are determined.
- **Fiscal disparities** contribution and distribution net tax capacities are preliminary, based on data from the abstracts of assessment, with some adjustments applied based on Dept. of Revenue data. Fiscal disparities distribution tax amounts are preliminary.
