

House Research Simulation Report: Property Tax

Simulation #9A4

Date 5/14/2009

Steve Hinze, Legislative Analyst (651-296-8956)

DESCRIPTION

BASELINE: Final Pay 2008

ALTERNATIVE: Actual Pay 2009 (Revised)

This report compares property taxes payable in 2009 to property taxes payable in 2008. This simulation is a minor revision of its predecessor, #9A3, which contained a fairly minor data error. The payable 2008 portion of the simulation is final data as reported by the counties to the Dept. of Revenue. The payable 2009 market value data is actual data supplied by the counties. The payable 2009 levies are the certified levies reported by the counties; the report is not considered "final" because there may be some slight differences in how taxes are spread, in TIF tax capacities, and in credit amounts, when the abstract of tax lists becomes available in mid-summer of 2009. The breakout of market value between existing properties and new construction is based on data reported by the counties to the Dept. of Revenue.

KEY POINTS

- **Statewide, property taxes are increasing by \$427 million, or 5.9%.** Approximately \$128 million of the \$427 million increase is borne by new construction - property appearing on the tax rolls for the first time in 2009. The overall tax increases are 6.2% in Greater Minnesota and 5.7% in the Metro area.
- **On a statewide average basis, property tax increases on existing properties vary** from 2 % (on residential homesteads) to 20.9% (on low-income apartments). Increases on the largest property types are 5.1% on residential non-homestead property, 2.8% on regular apartments, 6.2% on commercial-industrial property, 6.5% on agricultural property, and 8.2% on seasonal-recreational property.

The simulations are estimates only. House Research strives to make property tax simulations accurate, but simulations are only approximations of reality. Generally the results are most accurate on a statewide level, and tend to be less accurate as the jurisdiction under scrutiny gets smaller.

BASELINE: Final Pay 2008

- **Property values** (taxable market values) are actual values reported by county assessors on the abstracts of assessment. (Note that property value in JOBZ zones is not included in the figures shown.)
- **Local government levies** are levies reported by county auditors on the abstracts of tax lists.
- **Property tax credits** are as reported by county auditors on the abstracts of tax lists.

ALTERNATIVE: Actual Pay 2009 (Revised)

- **Market values** are actual values reported by county assessors on the abstracts of assessment. (Note that property value in JOBZ zones is not included in the figures shown, nor is value excluded under the disabled veterans exclusion.)
- **Local government levies** are the levies reported to the Dept. of Revenue by the county auditors.
- **The state levy** is \$776.7 million, which is the certified level set by the Dept. of Revenue.
- **Fiscal disparities** net tax capacities were taken from the abstracts of assessment. Distribution levies were provided by the Dept. of Revenue based on information provided by the administrative auditors of each program.
- **Tax increment financing (TIF) net tax capacities** were taken from the abstracts of assessment (note that sometimes the final TIF net tax capacities will differ from the ones reported on the abstracts of assessment).
- **Property tax credits** were modeled by the House Research Dept.

SIMULATION PARAMETERS

	Baseline	Alternative
Residential homestead:		
<\$500,000	1.0%	1.0%
>\$500,000	1.25	1.25
Residential non-homestead:
