Delete everything after the enacting clause and insert:

"Section 1. Minnesota Statutes 2002, section 116C.71, subdivision 7, is amended to read:

Subd. 7. [RADIOACTIVE WASTE MANAGEMENT FACILITY.] "Radioactive waste management facility" means a geographic site, including buildings, structures, and equipment in or upon which radioactive waste is retrievably or irretrievably disposed by burial in soil or permanently stored. An independent spent fuel storage installation located on the site of a Minnesota nuclear generation facility for dry cask storage of spent nuclear fuel generated solely by that facility is not a radioactive waste management facility.

Sec. 2. Minnesota Statutes 2002, section 116C.779, is amended to read:

116C.779 [FUNDING FOR RENEWABLE DEVELOPMENT.]

Subd. 1. [APPLICABILITY.] This section applies only to any 17 casks filled and placed at the Prairie Island independent spent fuel storage installation.
Subd. 2.  [RENEWABLE DEVELOPMENT FUND.] (a) The public utility that operates owns the Prairie Island nuclear generating plant must transfer to a renewable development account $500,000 each year for each dry cask containing spent fuel that is located at the independent spent fuel storage installation at Prairie Island after January 1, 1999. The fund transfer must be made if waste is stored in a cask for any part of a year.

(b) Funds in the account may be expended only for development of renewable energy sources:

1. payments, not to exceed $2,500,000 annually, by the public utility under a settlement agreement with the Mdewakanton Dakota Tribal Council at Prairie Island, a federally recognized Indian tribe, for resolving outstanding disputes and to be used for, among other purposes, acquiring land in the state of Minnesota for placement in trust; and

2. Preference must be given to development of renewable energy source projects located within the state.

Payments from the fund in any year shall first be made to satisfy the terms of the settlement agreement described in clause (1). No more than a total of $25,000,000 may be spent from this account for payments by the public utility to the Mdewakanton Dakota Tribal Council. Only those projects that have a direct benefit to Minnesota citizens may be funded under this section.

(b) (c) Expenditures from the account for the purposes of paragraph (b), clause (2), may only be made after approval by order of the public utilities commission upon a petition by the public utility.

(d) Of the amount required to be spent annually from this account:

1. up to 25 percent each year must be spent for production incentives for small wind energy facilities, and production incentives under this section must not exceed 1.5 cents per kilowatt-hour for a period not greater than ten years; and

2. up to 25 percent a year may be used to provide low- or no-interest loans, grants, or other financial means to reduce the capital costs for the construction of small wind energy facilities. Capital assistance awards under this clause may be coordinated through nonprofit entities that provide financial assistance to rural areas, such as designated federal economic development districts.

(e) For the purposes of this section, "small wind energy facility" means a wind energy facility, or group of facilities, with a nameplate capacity of two megawatts or less that:

1. is owned by one or more natural persons who are residents of Minnesota and who own or rent the land where the facility is sited or is owned by a Minnesota school district;

2. is not enrolled in the renewable energy production incentive program under section 216C.41; and

Sec. 3.  [116C.83] [AUTHORIZATION FOR ADDITIONAL DRY CASK STORAGE.] 

Subdivision 1.  [AUTHORIZATION.] (a) Subject to the cask storage limits of the federal license for the independent spent fuel storage installation at Prairie Island, the public utility that owns the Prairie Island nuclear generation plant has authorization for sufficient dry cask storage capacity at that installation to allow:

1. the unit 1 reactor at Prairie Island to operate until the end of its current license in 2013; and
(2) the unit 2 reactor at Prairie Island to operate until the end of its current license in 2014.

(b) Notwithstanding any law to the contrary:

(1) except as provided in paragraph (a), authorization of any future nuclear storage facility or dry casks at either nuclear generation facility in this state is limited to approval by the public utilities commission pursuant to section 216B.243 and the commission’s certificate of need rules;

(2) in any proceeding pursuant to clause (1), the commission may make a decision that could result in a shut-down of a nuclear generation facility; and

(3) the storage of spent nuclear fuel in the pool and in dry casks at the Prairie Island nuclear generating plant must be managed to facilitate the shipment of waste out of state to a permanent or interim storage facility as soon as feasible in a manner that allows the continued operation of the plant consistent with sections 116C.71 to 116C.83 and 216B.1645, subdivision 2.

(c) The authorization for storage capacity pursuant to paragraphs (a) and (b) is limited to the storage of spent nuclear fuel generated by a Minnesota nuclear generation facility and stored on the site of that facility.

(d) The authority granted to the public utility in paragraphs (a) and (b) is contingent on the public utility maintaining the headquarters for the corporation in Minnesota. If the corporation moves its headquarters outside the state, the public utility must seek and receive express legislative authorization for any additional storage of spent nuclear fuel.

Subd. 2. [ENVIRONMENTAL REVIEW AND PROTECTION.] The siting, construction, and operation of an independent spent fuel storage installation located on the site of a Minnesota generation facility for dry cask storage of spent nuclear fuel generated solely by that facility is subject to all environmental review and protection provisions of chapters 115, 115B, 116, 116B, 116C, 116D, and 216B and rules associated with those chapters, except those statutes and rules that apply specifically to a radioactive waste management facility as defined in section 116C.71, subdivision 7.

Sec. 4. Minnesota Statutes 2002, section 216B.1645, subdivision 2, is amended to read:

Subd. 2. [COST RECOVERY.] The expenses incurred by the utility over the duration of the approved contract or useful life of the investment and expenditures made pursuant to section 116C.779 and expenditures under an agreement with the Mdewakanton Dakota Tribal Council at Prairie Island regarding the provisions of Laws 1994, chapter 641, article 1, section 4, to the extent that funds collected pursuant to section 116C.779 in any given year are insufficient to cover these settlement costs, shall be recoverable from the ratepayers of the utility, to the extent they are not offset by utility revenues attributable to the contracts, investments, or expenditures. Upon petition by a public utility, the commission shall approve or approve as modified a rate schedule providing for the automatic adjustment of charges to recover the expenses or costs approved by the commission, which, in the case of transmission expenditures, are limited to the portion of actual transmission costs that are directly allocable to the need to transmit power from the renewable sources of energy. The commission may not approve recovery of the costs for that portion of the power generated from sources governed by this section that the utility sells into the wholesale market.

Sec. 5. [216B.2412] [RENEWABLE ENERGY PROJECTS.]

Subdivision 1. [DEFINITIONS.] (a) For the purposes of this section, the terms defined in this subdivision and section 216B.241, subdivision 1, have the meanings given them.
(b) "Energy utility" means any public utility, cooperative electric association, or municipality subject to section 216B.241.

(c) "Renewable energy sources" means fuels and technologies to generate electricity through the use of any of the following resources:

(1) wind;

(2) hydrogen, provided that after January 1, 2010, the hydrogen must be generated from the resources listed in this paragraph;

(3) solar;

(4) geothermal;

(5) hydroelectric with a capacity of less than 60 megawatts;

(6) biomass;

(7) landfill gas; and

(8) refuse derived fuel and solid waste.

(d) "Biomass" includes:

(1) methane or other combustible gases derived from the processing of plant or animal material;

(2) alternative fuels derived from soybean and other agricultural plant oils or animal fats;

(3) combustion of barley hulls, corn, soy-based products, or other agricultural products; and

(4) wood residue from the wood products industry in Minnesota, or other wood products, such as short-rotation woody or fibrous agricultural crops.

(e) "Sustainable energy project" is a project to either conduct research into the development of renewable energy sources and technologies or to deploy technologies in Minnesota that utilize renewable energy sources in: (1) a distributed generation facility with an interconnected capacity of ten megawatts or less; (2) a combined heat and power generation facility; (3) a district energy system; or (4) other facility or application consistent with the commissioner's order under subdivision 6.

Subd. 2. [RENEWABLE ENERGY RESEARCH.] (a) An energy utility shall spend five percent of the total amount that utility is required to spend under section 216B.241 to support basic and applied research at the University of Minnesota for the development of the sustainable energy sources and technologies listed in subdivision 1, paragraph (c), clauses (2), (3), and (6). The University of Minnesota shall ensure that at least 25 percent of funds spent under this section are available for basic and applied research at least one rural campus or experiment station.
(b) Research funded under this subdivision must have a direct benefit to Minnesota. Research funded under paragraph (a) may focus on hydrogen, solar, and biomass and:

(1) conversion of state wind resources to hydrogen for energy storage and transportation to areas of energy demand;

(2) improvement of scalable hydrogen fuel cells for stationary combined electricity generation and heating/cooling function for residential and commercial use; and

(3) processing of agricultural and forestry products for production of hydrogen and other fuels and sequestration of carbon using a variety of means, including biocatalysis and fermentation.

(c) An energy utility may spend up to an additional five percent of the total amount that utility is required to spend under section 216B.241 on research for the development of the renewable energy sources and technologies listed in subdivision 1, paragraph (c), clauses (2), (3), and (6), in a research project consistent with determinations made by the commissioner pursuant to subdivision 6.

Subd. 3. [DEPLOYMENT OF RENEWABLE ENERGY SOURCES.] An energy utility shall spend ten percent, and may spend up to 25 percent, of the total amount to be spent under section 216B.241 for the deployment of technologies that use renewable energy sources. Funds under this section may also be used for incentives to convert existing Minnesota generation facilities to use renewable energy sources, either exclusively or in conjunction with other fuels. Expenditures under this subdivision must be consistent with the determination of the commissioner pursuant to subdivision 6. Electricity generated using a renewable energy resource may be counted toward the renewable energy goals in section 216B.1691.

Subd. 4. [POOLING OF RESOURCES OF MULTIPLE UTILITIES.] Two or more energy utilities may pool resources under this section to provide assistance jointly to proposed sustainable energy projects. The utilities shall negotiate and agree among themselves for allocation of benefits associated with a project, such as the ability to count energy generated by a project toward a utility's renewable energy objectives under section 216B.1691. The utilities shall provide a summary of the allocation of benefits to the commissioner.

Subd. 5. [CREDIT FOR PROJECTS OUTSIDE OF SERVICE TERRITORY.] An energy utility may spend funds under this section for sustainable energy projects in Minnesota that are outside the service territory of the utility. Upon application by an energy utility, the commission shall authorize a credit of three percent of the amount the energy utility contributed toward a sustainable energy project that is outside the energy utility's service territory. This credit shall be deducted from the utility's overall required spending under section 216B.241. The commissioner may extend that credit to up to ten percent of the amount the utility contributes to a project outside of its service territory, if the commissioner determines that the proposed project is important to the advancement of state policy goals under subdivision 6 and would not occur without the additional credit. This section does not apply to contributions toward research under subdivision 2, paragraph (a).

Subd. 6. [ELIGIBLE RESEARCH AND TECHNOLOGIES; DETERMINATION BY COMMISSIONER.] At least annually, and upon consultation by an energy utility, the commission shall, by order, identify research, technologies, and projects that are eligible for expenditures under this section. In identifying eligible technologies and projects, the commission shall consider the extent to which the technology or project advances state policy goals, such as: ensuring affordable, reliable energy for Minnesota consumers; use of Minnesota energy resources; and promoting local economic development and protecting Minnesota's environment. By January 15 of each year, the commission shall issue a report to the legislature detailing and evaluating expenditures under this section, as well as the process and criteria used by the commissioner to make decisions under this subdivision.
Sec. 6. Minnesota Statutes 2002, section 216B.2424, subdivision 6, is amended to read:

Subd. 6. [REMAINING MEGAWATT COMPLIANCE PROCESS.] (a) If there remain megawatts of biomass power generating capacity to fulfill the mandate in subdivision 5 after the commission has taken final action on all contracts filed by September 1, 2000, by a public utility under subdivision 9, this subdivision governs final compliance with the biomass energy mandate in subdivision 5 subject to the requirements of subdivisions 7 and 8.

(b) To the extent not inconsistent with this subdivision, the provisions of subdivisions 2, 3, 4, and 5 apply to proposals subject to this subdivision.

(c) A public utility must submit proposals to the commission to complete the biomass mandate. The commission shall require a public utility subject to this section to issue a request for competitive proposals for projects for electric generation utilizing biomass as defined in paragraph (f) of this subdivision to provide the remaining megawatts of the mandate. The commission shall set an expedited schedule for submission of proposals to the utility, selection by the utility of proposals or projects, negotiation of contracts, and review by the commission of the contracts or projects submitted by the utility to the commission.

(d) Notwithstanding the provisions of subdivisions 1 to 5 but subject to the provisions of subdivisions 7 and 8, a new or existing facility proposed under this subdivision that is fueled either by biomass or by co-firing biomass with nonbiomass may satisfy the mandate in this section. Such a facility need not use biomass that complies with the definition in subdivision 1 if it uses biomass as defined in paragraph (f) of this subdivision. Generating capacity produced by co-firing of biomass that is operational as of April 25, 2000, does not meet the requirements of the mandate, except that additional co-firing capacity added at an existing facility after April 25, 2000, may be used to satisfy this mandate. Only the number of megawatts of capacity at a facility which co-fires biomass that are directly attributable to the biomass and that become operational after April 25, 2000, final commission action under subdivision 9 count toward meeting the biomass mandate in this section.

(e) Nothing in this subdivision precludes a facility proposed and approved under this subdivision from using fuel sources that are not biomass in compliance with subdivision 3.

(f) Notwithstanding the provisions of subdivision 1, for proposals subject to this subdivision, "biomass" includes:

1. farm-grown closed-loop biomass; agricultural wastes, including animal, poultry, and plant wastes
2. methane or other combustible gases derived from the processing of plant or animal material;
3. alternative fuels derived from soybean and other agricultural plant oils or animal fats;
4. combustion of barley hulls, corn, soy-based products or other agricultural products or wastes; and
5. waste wood, including chipped wood, bark, brush, residue wood, and sawdust.

(g) Nothing in this subdivision affects in any way contracts entered into as of April 25, 2000, to satisfy the mandate in subdivision 5.

(h) Nothing in this subdivision requires a public utility to retrofit its own power plants for the purpose of co-firing biomass fuel, nor is a utility prohibited from retrofitting its own power plants for the purpose of co-firing biomass fuel to meet the requirements of this subdivision.
Sec. 7. Minnesota Statutes 2002, section 216B.2424, subdivision 8, is amended to read:

Subd. 8. [AGRICULTURAL BIOMASS REQUIREMENT.] Of the 125 megawatts mandated in subdivision 5, at least 75 megawatts of the generating capacity must be generated by facilities that use agricultural biomass as the principal fuel source. For purposes of this subdivision, agricultural biomass includes only farm-grown closed-loop biomass and agricultural waste, including animal, poultry, and plant wastes those biomass fuel sources listed in subdivision 6, paragraph (f), clauses (1) to (4). For purposes of this subdivision, "principal fuel source" means a fuel source that satisfies at least 75 percent of the fuel requirements of an electric power generating facility. Nothing in this subdivision is intended to expand the fuel source requirements of subdivision 5.

Sec. 8. Minnesota Statutes 2002, section 216B.2424, is amended by adding a subdivision to read:

Subd. 9. [STATUS REVIEW.] In January of 2004, the public utilities commission shall conduct an initial review of all projects selected to satisfy a portion of the biomass mandate pursuant to this section, to make a preliminary determination of each project's status and viability. The commission shall conduct follow-up reviews in June of 2004, and December of 2004. By December 31, 2004, the commission shall:

1. make a final determination as to each project's viability;
2. cancel the contract for any project that is not yet producing electricity and that the commission determines is not viable; and
3. direct the public utility subject to the biomass mandate to request competitive proposals under subdivision 6 for the biomass capacity in the amount of the canceled contracts.

Sec. 9. Minnesota Statutes 2002, section 216C.052, subdivision 1, is amended to read:

Subdivision 1. [RESPONSIBILITIES.] (a) There is established the position of reliability administrator in the department of commerce. The administrator shall act as a source of independent expertise and a technical advisor to the commissioner, the commission, the public, and the legislative electric energy task force on issues related to the reliability of the electric system. In conducting its work, the administrator shall:

1. model and monitor the use and operation of the energy infrastructure in the state, including generation facilities, transmission lines, natural gas pipelines, and other energy infrastructure;
2. develop and present to the commission and parties technical analyses of proposed infrastructure projects, and provide technical advice to the commission;
3. present independent, factual, expert, and technical information on infrastructure proposals and reliability issues at public meetings hosted by the task force, the environmental quality board, the department, or the commission; and
4. in consultation and collaboration with experts within the industry, state government, and the University of Minnesota system, research and identify present and emerging energy issues, including adequacy of energy supply to consumers in the state, energy infrastructure issues, demand and delivery concerns, environmental constraints, emerging energy-related technologies fuels and applications, and reliability matters that affect energy prices paid by Minnesota consumers. In so doing, the administrator shall serve as an information resource to state agencies and legislators on energy issues affecting Minnesota consumers.
(b) Upon request and subject to resource constraints, the administrator shall provide technical assistance regarding matters unrelated to applications for infrastructure improvements to the task force, the department, or the commission.

(c) The administrator may not advocate for any particular outcome in a commission proceeding, but may give technical advice to the commission as to the impact on the reliability of the energy system of a particular project or projects. The administrator must not be considered a party or a participant in any proceeding before the commission.

Paulsen moved that the rules be so far suspended that Senate Concurrent Resolution No. 4 be now considered and be placed upon its adoption. The motion prevailed.

SENATE CONCURRENT RESOLUTION NO. 4

A Senate concurrent resolution adopting deadlines for the 2003 regular session.

Be It Resolved, by the Senate of the State of Minnesota, the House of Representatives concurring:

(a) In accordance with Joint Rule 2.03, the deadlines in this resolution apply to the 2003 regular session.

(b) The deadlines in this paragraph do not apply to the House Committee on Capital Investment, Ways and Means, Taxes, or Rules and Legislative Administration, or to the Senate Committee on Capital Investment, Finance, Taxes, or Rules and Administration.

(1) The first deadline, Friday, April 4, is for committees to act favorably on bills in the house of origin.

(2) The second deadline, Friday, April 11, is for committees to act favorably on bills, or companions of bills, that met the first deadline in the other house.

A committee has until the second deadline to act favorably on a bill, or the companion of a bill, that by the first deadline was referred to a finance committee. The omnibus appropriation bills are exempt from the first two deadlines.
(c) The third deadline, Tuesday, April 29, is for the House Committee on Ways and Means and the Senate Committee on Finance to act favorably on omnibus appropriation bills, other than a bill appropriating money for the acquisition and betterment of public lands and buildings and other public improvements of a capital nature.

(d) The omnibus appropriation bills are the following:

1. A bill appropriating money for education from early childhood through grade 12;
2. A bill appropriating money for higher education;
3. A bill in the House appropriating money for health and human services;
4. A bill in the Senate appropriating money for health, human services, and corrections;

12. A bill appropriating money for the acquisition and betterment of public lands and buildings and other public improvements of a capital nature.

(e) When a committee in either house acts favorably on a bill after a deadline established in this resolution, the bill must be referred in the Senate to the Committee on Rules and Administration or in the House of Representatives to the Committee on Rules and Legislative Administration for disposition. Either rules committee, when reporting a bill referred to the committee in accordance with Joint Rule 2.03 and this resolution, may waive the application of the Rule and resolution to subsequent actions on that bill by other committees.
