

Please MN make this legal!! I suffer from pain due to an accident 8 years ago and I am allergic to all the pain medications they have tried with me. After four years of being a Ginny pig of trying to find a pill that would work. I gave up! The only time I have found relief is when I went to Colorado and tried it for my pain management . I was pain free all most instantly. I slept through the night for the first time in many years with no hang over!! Any kind of pain meds I could stomach made me have a hangover the next day.

I know it is medically legal here, but I can not afford to get my card.

Please please please let's get this legal.

Yes I will be one of the people to drive to South Dakota to purchase. I have no problem to give them revenue to keep me functional.

Everyone is worried that this is going to be on the streets more, but do you take your sleeping pill and go for a drive? When your in so much pain you could puke would you want to go in public?

This needs to be legalized not just for my personal reasons, but for so many more. It is sad this has been a hidden salvation for so many medical resources!!

Sincerely a hard working Minnesotan that just wants to be pain free!!
