

READING AUDIT

Elementary Education, Early Childhood Education, Special Education, and Reading Licensure Programs

Beginning in 2023, the Professional Educator Licensing and Standards Board (PELSB) began a formal audit process to evaluate how teacher preparation programs provide instruction on the science of reading. All licensure programs in the areas of elementary education, early childhood education, special education, and reading are required to undergo the audit process by June 2025. Programs are being reviewed on a rolling basis. Programs are expected to address any weaknesses by June 2026.

A total of 165 programs will be audited by June 2025.
