

Subject State Fish Hatcheries

Authors Hansen, R. and Lee, F.

Analyst Janelle Taylor

Date March 18, 2024

Summary

This bill would require the Department of Natural Resources (DNR) to install continuous water-quality monitoring devices at all state fish hatcheries to monitor incoming and outgoing water. It would also modify a previous fiscal year 2024 appropriation for modernizing fish hatcheries to provide that up to an unspecified amount of the appropriation is for installing the monitoring devices.
