Summary

This bill requires the Professional Educator Licensing and Standards Board (PELSB) to work with Minnesota teacher preparation programs to provide preparation programs for every teacher licensure area required by PELSB. Requires approved programs to be hybrid programs, and to offer at least 80 percent of required coursework online. Requires PELSB to enter into agreements with out-of-state providers if no Minnesota provider offers a program for a licensure area, and requires all the required coursework for the out-of-state provider to be available online.
