

Hello, I am writing today in opposition to HF904. I am a small business owner and this business is the only source of income for me. So, please do not ban the menthol, mint, and wintergreen flavors. In addition to that, it will not help people to quit because they can get from other places and online as well. In this situation, I will end up losing money but people would not quit flavor. Thus, I am requesting that please do not ban flavors.
