85.12 account.

85.13 Sec. 7. [219.016] CRUDE OIL AND HAZARDOUS MATERIALS RAIL SAFETY
85.14 ACCOUNT AND GRANT PROGRAM.
85.15 Subdivision 1. Purpose. A hazardous materials rail safety program is established for
85.16 the purpose of reducing the risks associated with transporting hazardous material by rail.
85.17 Subd. 2. Creation of account. A hazardous materials rail safety program account is
85.18 established in the bond proceeds fund. Money in the account may only be used for capital
85.19 costs associated with planning, engineering, administration, and construction of public
85.20 highway-rail grade crossing improvements on rail corridors transporting crude oil and
85.21 other hazardous materials. Improvements may include upgrades to existing protection
85.22 systems, the closing of crossings and necessary roadwork, and reconstruction of at-grade
85.23 crossings to full grade separations.
85.24 Subd. 3. Grants. The commissioner may approve grants for financial assistance to
85.25 eligible applicants for capital costs associated with hazardous materials rail safety projects
85.26 on public highway-rail grade crossings. Qualifying capital costs include, but are not
85.27 limited to, upgrades to existing protection systems, the closing of crossings and necessary
85.28 roadwork, and reconstruction of at-grade crossings to full grade separations.
85.29 Subd. 4. Eligible applicants. Counties, statutory or home rule charter cities, or
85.30 towns that are responsible for establishing and maintaining public highway-rail grade
85.31 crossings on rail corridors transporting crude oil and other hazardous materials may apply
85.32 to the commissioner for financial assistance for the purposes in this section.
85.33 Subd. 5. Criteria for grant award. The commissioner shall consider the following
85.34 criteria to evaluate applications for a grant award for a hazardous materials rail safety
85.35 project:
85.36 (1) whether the crossing was identified as a potential candidate for grade separation
85.37 in MnDOT's crude by rail grade crossing study (Improvements to Highway Grade
85.38 Crossings and Rail Safety, December 2014);
86.7 (2) roadway traffic volumes and speeds;
86.8 (3) train volumes and speeds;
86.9 (4) adjacent land use;
86.10 (5) crash history;
86.11 (6) use of the crossing by emergency vehicles;
86.12 (7) use of the crossing by vehicles carrying hazardous materials;
86.13 (8) local financial contributions to the project; and
86.14 (9) private financial contributions to the project.

86.15 Sec. 8. Minnesota Statutes 2014, section 446A.072, is amended to read:
86.16 446A.072 WASTEWATER WATER INFRASTRUCTURE FUNDING
86.17 PROGRAM.
86.18 Subdivision 1. Establishment of program. The authority will establish a
86.19 wastewater water infrastructure funding program to provide supplemental assistance to
86.20 governmental units receiving funding through the clean water revolving fund program, the
86.21 drinking water revolving fund program, or the United States Department of Agriculture
86.22 Rural Economic and Community Development's (USDA/RECD) Water and Waste
86.23 Disposal Loans and Grants program for the predesign, design, and construction of
86.24 municipal wastewater treatment and drinking water systems, including purchase of land
86.25 and easements. The purpose of the program is to assist governmental units demonstrating
86.26 financial need to build cost-effective projects to address existing environmental or public
86.27 health problems. To implement the program, the authority shall establish a
86.28 infrastructure fund to provide grants and loans for the purposes authorized under
86.29 Title VI of the Federal Water Pollution Control Act and the federal Safe Drinking Water
86.30 Act. The fund shall be credited with all investment income from the fund and all
86.31 repayments of loans, grants, and penalties.

43.20 (b) For a governmental unit receiving grant funding from the USDA/RECD,
43.21 applications must be made to the USDA/RECD with additional information submitted to
43.22 the authority as required by the authority. Eligible project costs and affordability criteria
43.23 shall be determined by the USDA/RECD.
43.24 (c) For a governmental unit not receiving grant funding from the USDA/RECD,
43.25 application must be made to the USDA/RECD on forms prescribed by the authority for the
43.26 clean water revolving fund program or the drinking water revolving fund program with
43.27 additional information as required by the authority. In accordance with section 116.182,
43.28 the Pollution Control Agency or the commissioner of health shall:
43.29 (1) calculate the essential project component percentage based on the portion of
43.30 project costs necessary to convey or treat the existing wastewater flows and loadings or,
43.31 for drinking water projects, to provide safe drinking water to meet existing needs, which
43.32 must be multiplied by the total project cost to determine the eligible project cost for the
43.33 program under this section; and
43.34 (2) review and certify approved projects to the authority.
43.35 (d) Each fiscal year the authority shall make funds available for projects based on
43.36 their ranking on the Pollution Control Agency's project priority list or the commissioner
43.41 of health's project priority list. The authority shall reserve funds for a project when
43.42 the applicant receives a funding commitment from the United States Department of
43.43 Agriculture Rural Development (USDA/RECD) or submit plans and specifications to
43.44 the project is certified by the Pollution Control Agency or the commissioner of health.
43.45 Funds must be reserved in an amount based on the project cost estimate submitted to the
43.46 authority prior to the appropriation of the funds and awarded based on the lesser of that
43.47 amount or the as-bid cost when the project is certified or the as-bid cost, whichever is less.
43.48 Subd. 5a. Type and amount of assistance. (a) For a governmental unit receiving
43.49 grant funding from the USDA/RECD, the authority may provide assistance in the form
43.10 of a grant of up to 65 percent of the eligible grant need determined by USDA/RECD. A
43.11 governmental unit may not receive a grant under this paragraph for more than $4,000,000.
43.12 $5,000,000 per project or $15,000 $20,000 per existing connection, whichever is less,
43.13 unless specifically approved by law.
87.5 (b) For a governmental unit receiving grant funding from the USDA/RECD,
87.6 applications must be made to the USDA/RECD with additional information submitted to
87.7 the authority as required by the authority. Eligible project costs and affordability criteria
87.8 shall be determined by the USDA/RECD.
87.9 (c) For a governmental unit not receiving grant funding from the USDA/RECD,
87.10 application must be made to the authority on forms prescribed by the authority for the
87.11 clean water revolving fund program or the drinking water revolving fund program with
87.12 additional information as required by the authority. In accordance with section 116.182,
87.13 the Pollution Control Agency or the commissioner of health shall:
87.14 (1) calculate the essential project component percentage based on the portion of
87.15 project costs necessary to convey or treat the existing wastewater flows and loadings or,
87.16 for drinking water projects, to provide safe drinking water to meet existing needs, which
87.17 must be multiplied by the total project cost to determine the eligible project cost for the
87.18 program under this section; and
87.19 (2) review and certify approved projects to the authority.
87.20 (d) Each fiscal year the authority shall make funds available for projects based on
87.21 their ranking on the Pollution Control Agency's project priority list or the commissioner
87.22 of health's project priority list. The authority shall reserve funds for a project when
87.23 the applicant receives a funding commitment from the United States Department of
87.24 Agriculture Rural Development (USDA/RECD) or submit plans and specifications to
87.25 the project is certified by the Pollution Control Agency or the commissioner of health.
87.26 Funds must be reserved in an amount based on the project cost estimate submitted to the
87.27 authority prior to the appropriation of the funds and awarded based on the lesser of that
87.28 amount or the as-bid cost when the project is certified or the as-bid cost, whichever is less.
87.29 Subd. 5a. Type and amount of assistance. (a) For a governmental unit receiving
87.30 grant funding from the USDA/RECD, the authority may provide assistance in the form
87.31 of a grant of up to 65 percent of the eligible grant need determined by USDA/RECD. A
87.32 governmental unit may not receive a grant under this paragraph for more than $4,000,000.
87.33 $5,000,000 per project or $15,000 $20,000 per existing connection, whichever is less,
87.34 unless specifically approved by law.
44.14 (b) For a governmental unit receiving a loan from the clean water revolving fund
44.15 under section 446A.07, the authority may provide assistance under this section in the form
44.16 of a grant if the average annual residential wastewater system cost after completion of the
44.17 project would otherwise exceed 1.4 percent of the median household income of the project
44.18 service area. In determining whether the average annual residential wastewater system
44.19 cost would exceed 1.4 percent, the authority must consider the total costs associated with
44.20 building, operating, and maintaining the wastewater system, including existing wastewater
44.21 debt service, debt service on the eligible project cost, and operation and maintenance
44.22 costs. Debt service costs for the proposed project are calculated based on the maximum
44.23 loan term permitted for the clean water revolving fund loan under section 446A.07,
44.24 subdivision 7. The amount of the grant is equal to 80 percent of the amount needed to
44.25 reduce the average annual residential wastewater system cost to 1.4 percent of median
44.26 household income to the project service area, to a maximum of $154,000 for $20,000 per
44.27 project or $5,000,000 for $20,000 per existing connection, whichever is less, unless specifically
44.28 approved by law. The eligible project cost is determined by multiplying the total project
44.29 costs minus any other grants by the essential project component percentage calculated
44.30 under subdivision 3, paragraph (c), clause (1). In no case may the amount of the grant
44.31 exceed 80 percent of the eligible project cost.
44.32 (c) For a governmental unit receiving a loan from the drinking water revolving
44.33 fund under section 446A.081, the authority may provide assistance under this section in
44.34 the form of a grant if the average annual residential drinking water system cost after
44.35 completion of the project would otherwise exceed 1.2 percent of the median household
44.36 income of the project service area. In determining whether the average annual residential
44.37 drinking water system cost would exceed 1.2 percent, the authority must consider the total
44.38 costs associated with building, operating, and maintaining the drinking water system,
44.39 including existing drinking water debt service, debt service on the eligible project cost,
44.40 and operation and maintenance costs. Debt service costs for the proposed project are
44.41 calculated based on the maximum loan term permitted for the drinking water revolving
44.42 fund loan under section 446A.081, subdivision 8, paragraph (c). The amount of the grant
44.43 is equal to 80 percent of the amount needed to reduce the average annual residential
44.44 drinking water system cost to 1.2 percent of median household income in the project
44.45 service area, to a maximum of $5,000,000 per project or $20,000 per existing connection,
44.46 whichever is less, unless specifically approved by law. The eligible project cost is
44.47 determined by multiplying the total project costs minus any other grants by the essential
44.48 project component percentage calculated under subdivision 3, paragraph (c), clause (1). In
44.49 no case may the amount of the grant exceed 80 percent of the eligible project cost.
44.50 (d) Notwithstanding the limits in paragraphs (a), (b), and (c), for a
44.51 governmental unit receiving supplemental assistance under this section after January 1,
44.52 2002, if the authority determines that the governmental unit's construction and installation
44.53 costs are significantly increased due to geological conditions of crystalline bedrock or karst
44.54 areas and discharge limits that are more stringent than secondary treatment, the maximum
44.55 19 award under this section shall not be more than $25,000 per existing connection.

45.20 Subd. 5b. Special assessment deferral. A governmental unit receiving a loan under subdivision 5a that levies special assessments to repay the loan under subdivision 5a or section 446A.07 may defer payment of such assessments under the provisions of sections 433.193 to 433.199.
45.24 Subd. 6. Disbursements. Disbursements of grants on loans awarded under this section by the authority to recipients must be made for eligible project costs as incurred by the recipients, and must be made by the authority in accordance with the project financing agreement and applicable state and federal laws and rules governing the payments.

45.28 Subd. 7. Loan repayments. Notwithstanding the limitations set forth in section 45.54, subdivision 1, this subdivision shall govern the maturities and mandatory sinking fund redemption payments of the loans.swing.
45.30 Fund redemption payments of the loan under this section. A governmental unit receiving a loan under this subdivision shall repay the loan in semiannual payment amounts determined by the authority. The payment amount must be based on the average payments on the governmental unit's clean water revolving fund loan or, if greater, the minimum amount required to fully repay the loan by the maturity date. Payments must begin within one year after the date of the governmental unit's final payment on the clean water revolving fund loan. The final maturity date of the loan under this section must be no later than 20 years from the date of the first payment on the loan under this section and no later than 40 years from the date of the first payment on the clean water revolving fund loan.
45.31 Subd. 8. Eligibility. A governmental unit is eligible for assistance under this section only after applying for grant funding from other sources and funding has been obtained, rejected, or the authority has determined that the potential funding is unlikely.
45.36 Subd. 9. Funding limitation. Supplemental assistance may not be used to reduce the sewer service charges of a significant wastewater contributor industrial user that has a separate service charge agreement with the recipient, or a single user that has caused the need for the project or whose current or projected loan and loan exceed usage exceeds one-half of the current wastewater treatment plant's or drinking water system capacity.
45.41 Subd. 11. Report on needs. By February 1 of each even-numbered year, the authority, in conjunction with the Pollution Control Agency and the commissioner of Natural Resources, shall prepare a report to the Finance Division of the Senate Environment and Natural Resources Finance Committee on wastewater and drinking water funding assistance needs of governmental units under this section.

PAGE R104
46.17 Subd. 12. System replacement fund. Each governmental unit receiving a loan or grant under this section shall establish a system replacement fund and shall annually deposit a minimum of $.50 per 1,000 gallons of flow for major rehabilitation or expansion, or replacement of the wastewater or drinking water system, or replacement of the treatment systems at the end of its useful life. Money must remain in the account for the life of the corresponding project loan from the authority or USDA/RECD, unless use of the fund is approved in writing by the authority for major rehabilitation, expansion, or replacement of the wastewater or drinking water systems. By March 1 each year 46.24 during the life of the loan, each recipient shall submit a report to the authority regarding the amount deposited and the fund balance for the prior calendar year. A recipient is not required to maintain a fund balance greater than the amount of the grant received. Failure to comply with the requirements of this subdivision shall result in the authority assessing a penalty fee to the recipient equal to one percent of the supplemental assistance amount for each 46.30 year of noncompliance. Failure to make the required deposit or pay the penalty fee as required constitutes a default on the loan.

46.32 Subd. 14. Consistency with land use plans. A governmental unit applying for a 46.33 project in an unsewered area shall include in its application to the authority a certification from the county in which the project is located that:

46.35 (1) the project is consistent with the county comprehensive land use plan, if the 46.36 county has adopted one; and

47.1 (2) the project is consistent with the county water plan, if the county has adopted 47.2 one; and

47.3 (3) the county has adopted specific land use ordinances or controls so as to meet or 47.4 exceed the requirements of Minnesota Rules, part 7080.0305.

47.5 Sec. 13. Minnesota Statutes 2014, section 446A.073, as amended by Laws 2015, First 47.6 Special Session chapter 4, article 4, sections 127, 128, and 129, is amended to read:

49.9 (4) a total nitrogen concentration or mass limit of that requires discharging ten milligrams per liter or less for a land-based treatment system as permitted design flow.
49.11 Subd. 2. Grant application. Application for a grant must be made to the authority in forms prescribed by the authority for the total maximum daily load grant program, with additional information as required by the authority, including a project schedule and cost estimate for the work necessary to comply with the point-source pollutant allocation requirements listed in subdivision 1. The Pollution Control Agency shall
49.12 (1) in accordance with section 116.182, calculate the essential project component percentage, which must be multiplied by the total project cost to determine the eligible project cost; and
