Minnesota's school finance system generally limits a school district from counting a student as more than 1.0 pupils in average daily membership (ADM) for each school year for funding purposes. However, as part of the extended time aid formula, a school district may count additional hours of instruction for qualifying students participating in State Approved Alternative Programs (SAAP) including Area Learning Center and Alternative Learning Programs up to a maximum of 0.2 pupils in average daily membership.

The existing extended time funding formula provides funding for school districts for qualifying students equal to \$5,117 times the lesser of 0.2 or the ratio of extended hours to the required number of hours for the regular school year (for a secondary student carrying a pupil weighting of 1.2 this is a maximum of \$1,228).

H.F. 3190, allows a school district to include in its extended time hours the hours of instruction provided to students participating in career and technical programming outside of the regular school day, whether or not those hours are provided as part of SAAP.

Section

- 1 Extended time revenue.** Expands extended time revenue to students enrolled in a career and technical education course offered for secondary credit by a high school outside of the regular school day, whether or not those students qualify for SAAP.
