2022 State Fair Poll Results

Support grows for marijuana legalization, sports gambling Polltakers also favor tougher penalties for youth sports disruptions, eliminating state taxes on Social Security benefits and safety requirements for boaters

Support for the legalization of recreational marijuana and sports gambling appears to be on the rise, at least among attendees of the 2022 Minnesota State Fair.

A majority of those (61.4%) who responded to the annual House of Representatives State Fair Opinion Poll indicated they support allowing the recreational use of marijuana by those age 21 and over, while 30.2% oppose legalization and 8.4% are undecided or have no opinion on the issue.

That is a slight bump in support among fairgoers as, when the same question was asked in 2021, 58.3% said they favor legalization and 34.1% were against it.

Conducted by the nonpartisan House Public Information Services Office, the poll is an informal, unscientific survey of issues discussed in prior legislative sessions and that may again be topics of discussion in 2023. This year's poll was taken by 7,110 fairgoers, a significant increase from 2021, when 5,231 people took the poll, reflecting the overall increase in attendance at this year's fair.

Polltakers also expressed support for legalization and regulation of gambling on professional and collegiate sports, with 44.2% in favor, 40% opposed and 15.8% undecided. That is also an increase from the 2021 poll, when that same question found 40.7% of polltakers in favor, 40.3% opposed, and 19% undecided.

The 12-question poll also found wide support for increasing the penalties for those who disrupt youth sporting events (84.4% in favor), exempting all Social Security benefits from state taxes (77.5% in support) and requiring high school students to take a civics and personal finance class in order to graduate (90% in favor).

But the majority of respondents (57.2%) are opposed to establishing a school voucher system that would allow parents to choose the public or private school their child attends with state money following the child, with 32.8% in favor of the proposal.

The majority of polltakers also support:

- requiring anyone operating a boat or personal watercraft to complete a safety course and receive a permit;
- paying newly hired police officers a bonus of up to \$10,000 if they successfully complete their first year on the job;
- replacing Columbus Day with Indigenous Peoples Day as a state holiday;
- creation of an permanent absentee voter registration list; and
- allowing businesses to install and manage charging stations for electric vehicles at interstate highway rest areas.

Here are the final results of the 2022 House of Representatives State Fair Poll. All percentages are rounded to the nearest one-tenth. <u>Totals are for those who actually voted on the question.</u>
