Nothing makes people run for the hills quite like an audit. It doesn't matter if you're an individual taxpayer or a business — that notice can come at any time. It can also come to recipients of the state’s bond proceeds.

BY SONJA HEGMAN

While most of the discrepancies found in the state’s 2006 bonding law have been resolved or are working toward a resolution, the Office of the Legislative Auditor has advised the Legislature to examine its policies and possibly tighten its requirements to make sure future bonds are managed more responsibly.

“We prefer specificity (in the law) so we know exactly what you meant,” Legislative Auditor James Nobles told the House Capital Investment Finance Division Jan. 29. “If there has been a change in what you want or the entity wants, we ask that it be formalized.” Otherwise, there may be a lawsuit because of an unauthorized use of bond funds.

“You would literally have to cancel the bonds and reissue them for a different purpose,” said Rep. Alice Hausman (DFL-St. Paul), division chairwoman.

Being good stewards

Nobles said the audit was conducted because it was an area that needed more attention. Because of cost, his office will not be able to do this kind of audit on an annual basis. He also said a bond audit hasn’t been completed “in a long time.”

“This hearing says that you take it seriously,” he said. “You need to make sure you give proper heed to the law. You need to make sure your procedures are working.”

Since bonding money comes with tighter parameters and strings attached and a lot of the discussion taking place up front, Nobles said the discussion needs to be followed through the entire process as entities spend the money to avoid any confusion.

“There are lots of things one can learn from an audit,” Hausman said. “One of the things we need to ask ourselves is if rigidity is built in. Does language allow for flexibility? That’s the question that occurs to me as to our role in this.”

A construction project at the Minnesota Zoo is under way near Central Plaza. The zoo, along with several other entities, had some of its costs questioned in a recent bonding audit.

Bonding funds: Funding what?
Audit shows need for tightened policies and requirements
The Minnesota Zoo may not have complied with restrictions on bond funds designated for asset preservation for some expenditures, and did not submit reports on asset preservation projects to the Legislature, as required by the 2006 law.

MnSCU financed 95 percent of the $3.5 million purchase with general obligation bond proceeds by using its appropriation of $3.4 million from the law and used other funds for the remainder of the purchase price.

MnSCU must return revenues from the lease to Minnesota Management and Budget as required by statute. The lease revenues were deposited in the college’s operating account and total lease revenues over the three and a half year term of the lease will total more than $1 million.

Riebe said it is recommended that MnSCU pay 95 percent of the revenues from the lease to Minnesota Management and Budget to be in compliance with statute.

Minnesota Zoo
The Minnesota Zoo may not have complied with restrictions on bond funds designated for asset preservation for some expenditures, and did not submit reports on asset preservation projects to the Legislature, as required by statute.

The zoo used asset preservation bond funds for the following questionable expenses, according to the report:
- $160,000 for a new holding pool and surrounding area;
- $107,000 to purchase and situate newly acquired portable classrooms to replace classrooms that had been demolished as a result of the new Central Plaza construction; and
- $431,000 for new construction and additional space for the zoo’s Minnesota trail exhibit, as a part of major improvements to the exhibit. The zoo requested $1.9 million in asset preservation funds for this exhibit. However, neither the zoo nor Minnesota Management and Budget had evidence that justified the zoo’s use of asset preservation funds to finance the new construction portion of the trail renovations.

In addition, the zoo did not submit reports on asset preservation projects to the Legislature, as required. Although the zoo is generally exempt from this statute, it was unaware that the 2006 law specifically required compliance with this provision.

Using bonds for payroll
Some entities used bond funds for internal project management costs without clearly connecting those costs to authorized capital projects.

Riebe said Minnesota Management and Budget did not have a formal, written policy regarding the eligibility of paying internal project management costs from bond funds. Several entities charged payroll costs and, in some cases, supplies to bond funds; other entities charged a fixed percentage of payroll costs to bond accounts.

‘We found that controls were generally good. Some things just need some tightening. Agencies are out there trying to do the right thing; this is just a complicated area.’
— James Nobles
Legislative Auditor

The Minnesota Zoo, the Historical Society, and Minnesota State University, Mankato periodically charged their appropriations for payroll for various employees. As of March 31, 2008, these three entities had budgeted a total of $659,000 for these types of costs.

Rep. Al Juhnke (DFL-Willmar) said he was troubled to see any bonding money going to internal salaries.

“So we’re paying salary and benefits for that person to be there anyway, and then if you put bonds on top of that we’re paying twice to that entity or billing it through the department and they’re using it internally for other things, clearly,” he said. “But even above that you’re paying more because bond funds have interest to pay back. Now you’re paying a salary you have to pay back over 20 years and it costs you more. I think it is troubling and we need to be very careful.”
**AGRICULTURE**

**Ag21 program funding questioned**

A successful grant program that received one-time funding last year could see further funding, but at the expense of another program.

Overall the Department of Agriculture’s 2010-2011 biennial budget would see a 5 percent General Fund decrease ($1.6 million) to $77.9 million, under a plan proffered by Gov. Tim Pawlenty.

However, the plan includes nearly $9 million in new Clean Water Legacy program spending for pesticide monitoring and assessment, and more than $4 million in new funding for the Pesticide and Fertilizer Management Division.

But it is the proposed diversion of funds from a popular grant program that caught the attention of House Agriculture, Rural Economics and Veterans Affairs Finance Division members Feb. 3.

Last year the state provided one-time money for the Livestock Investment and Next Generation Energy grant programs to advance the agricultural and renewable energy industries.

Pawlenty’s proposed budget calls for continuing the investment by redirecting funds to a new initiative called the 21st Century Agricultural Reinvestment Program.

In each year of the next two biennia, the governor would redirect $500,000 from the Dairy Profitability and Enhancement Program for livestock producer grants. The program’s current funding is a little more than $1 million annually.

Rep. Andy Welti (DFL-Plainview) is concerned about taking funds from the successful dairy program. “I know that program has kept a lot of farmers on the farm.”

Quinn Cheney, director of policy development for the Agriculture Department, said the funding shift was made in consultation with the dairy industry, but she would not be specific about which groups gave input.

Rep. Al Juhnke (DFL-Willmar), the division chairman, said the concept sounds like an “either, or situation” — either shift the funds to livestock grants or lose it. “We’ve had $150 million of applications for livestock investment grants … realize that $500,000 isn’t getting us very far. We need to come up with some ideas to get some money into the program this year.”

He said one source could come from the $50 million in tax credits the governor is recommending for Main Street businesses. “Ten million of that could be directed to the livestock investment grant. … That is jobs on the ground and will support local industries,” he said.

Funding to support the Next Generation Energy grants, as proposed by the governor in the Ag21 program, would come from the scheduled phase out of the Ethanol Producer Payment Program.

**BONDING**

**Tool for ‘extraordinary time’**

As one solution to ease budget woes, Gov. Tim Pawlenty has a proposal to borrow against the state’s future tobacco settlement proceeds.

“This is a one-time budgeting tool in extraordinary times,” Tom Hanson, Minnesota Management and Budget commissioner, told the House Capital Investment Finance Division Feb. 3.

Hanson said sale of the state appropriation bonds would provide nearly $1 billion for the 2010-2011 biennium. The tobacco settlement money would be considered appropriation bonds, which differ from general obligation bonds in that there isn’t the same promise to repay the bonds. But the governor’s proposal would give the assurance that bond payments would be made regardless of what happened to tobacco settlement revenues. The proceeds from these bonds would be used directly for one-time, non-operating costs.

Because the state cannot constitutionally borrow long-term to pay today’s debts, the Legislature would have to vote for a special authorization to pass this measure, said Kathy Kardell, assistant commissioner at the agency.

And some members aren’t thrilled with the idea.

“This is a change in public policy to have the next generation pay for our debt,” said Rep. Jean Wagenius (DFL-Mpls). “We need to keep that foremost in our minds.”

Rep. Al Juhnke (DFL-Willmar) agreed, saying that he is troubled with the 20-year payback time.

“None of us are getting out of here without raising some revenue,” said Rep. Tom Rukavina (DFL-Virginia). “The question is are we gonna be honest about it. I think it’s shameful we are even sitting here today discussing this proposal.”

Legislators will have about three weeks from the anticipated March 4 release of the February Forecast to the first committee deadline. And they could be at the Capitol, instead of on a lake, for the state’s fishing opener.

The House approved a resolution Feb. 5 designating five committee deadlines for the 2009 session:

- March 27 at 8 p.m., committees to act favorably on bills in the house of origin;
- April 7 at 11:59 p.m., committees to act favorably on bills, or companions of bills, that met the first deadline in the other body;
- April 16, divisions of House and Senate finance committees to act favorably on omnibus appropriation bills;
- April 22, House and Senate finance and taxes committees, and the House Ways and Means Committee, to act favorably on omnibus appropriation and tax bills; and
- May 7, conference committees on omnibus appropriations and tax bills must report bills to the floor.

The first and second deadlines do not apply to the House Finance, Ways and Means, Taxes or Rules and Legislative Administration committees, or the Senate Capital Investment, Finance, Taxes, or Rules and Administration committees.

“If the process runs smooth we will be done ahead of time, or at least on time,” House Majority Leader Tony Sertich (DFL-Chisholm) said at the Feb. 4 House Rules and Legislative Administration Committee meeting.

“Although not in the resolution, Sertich and Sen-
Although the payments for the appropriation bonds wouldn’t technically impact the state’s 3 percent debt service guideline, they may count toward broader measures of state indebtedness used by rating agencies, Kardell said.

“You can say this is revenue or an increase in tax,” said Rep. Larry Howes (R-Walker). “We’re borrowing money to keep from taking money from the people of Minnesota. This may not be the right measure, but it’s a starting point.”

— S. Hegman

**CONSUMERS**

**The frontlines of food-borne illness**

The recall of many food products containing peanut butter is an example of the increasing number of food-borne illnesses. And the Departments of Health and Agriculture are on the frontlines of safeguarding the food supply and identifying problems when these outbreaks occur.

Annually about 7,500 food processors, grocery stores and delis across the state are inspected to ensure the safety of food products.

“In spite of our very best efforts, about 78 million people (nationwide) per year get ill with a food-borne and diarrheal disease,” John Besser, head of the Department of Health’s clinical laboratory, told the House Agriculture, Rural Economies and Veterans Affairs Committee at a Feb. 2 informational hearing. He clarified, however, that the increase in reported outbreaks may also relate to better reporting and tracking methods.

He said their work centers on identifying the underlying problems that can lead to these illnesses. “Every case of a food-borne disease can be considered a failure somewhere in our system.”

Rep. Kent Eken (DFL-Twin Valley) and other members asked about the state departments’ interaction with their federal counterparts. For example, he said the recent peanut butter case was sourced to a Georgia processor. “While we may be doing a good job here, we can’t do anything about the problems there.”

Ben Miller, supervisor for dairy and food inspections with the Department of Agriculture, explained the challenge they face because ingredients can be international or domestic in origin. “When you look at the way ingredients are manufactured and distributed worldwide, and all the products they end up in — for instance, in the peanut butter outbreak over 800 distinct products had been recalled — one of the biggest challenges is simply understanding where those key ingredients come from and where all those products go.”

— L. Schutz

During a Feb. 2 joint presentation by the Departments of Agriculture and Health on food safety and food-borne outbreaks, members of the House Agriculture, Rural Economies and Veterans Affairs Committee examine the “Smoking Tub,” the actual tub that contained salmonella-laced peanut butter.
Keeping children from chemicals
Protecting children from potentially toxic chemicals in products they use is the intent of a bill sponsored by Rep. Kate Knuth (DFL-New Brighton).

The Toxic Free Kids Act would not place an outright ban on the use of chemicals designated as “high concern” in children’s products, but would authorize the Pollution Control Agency to publish a list of these chemicals, if found, and require replacement with a safer alternative, if one is available.

The scope of regulation included in HF250 came into question when the bill was heard Feb. 3 by the House Health Care and Human Services Policy and Oversight Committee.

“Who is going to be doing the monitoring?” asked Rep. Steve Gottwald (R-St. Cloud).

Knuth stressed the bill asks for no new assessments of chemicals, but only study and evaluation of existing data of about five chemicals.

A mother of two, Heidi Niziolek told committee members of her frustration in locating healthy products for her children and information about toxins that could be harmful to them.

“I cannot tell you how many times we brought something home and found out that it contained something harmful. And we subsequently threw them away or disposed of them properly — probably thousands of dollars worth of things, pacifiers, toys, even furniture.”

She said that parents should not have to worry about the safety of products designed for children’s use. “As consumers, the cost of the item should contain the cost that ensures their safety.”

The bill was approved and referred to the House Environment Policy and Oversight Committee, where it is scheduled to be heard Feb. 10. Knuth said that would be the second of several expected committee stops.

A companion, SF225, sponsored by Sen. Linda Scheid (DFL-Brooklyn Park), awaits action by the Senate Environment and Natural Resources Committee.

— L. SCHUTZ

Crime alert notification assurance
Clarence Schadegg wants to know when a crime alert is issued for his Richfield neighborhood.

Because he is blind, it has not always been easy to learn of alerts.

“Any of us with a disability need to be informed when these incidents happen,” he told the House Crime Victims/Criminal Records Division Jan. 30. “The best way for us to be informed is to receive a crime alert formatted as a Word document.”

The problem, Schadegg said, is that the e-mail notification often comes as a PDF file attachment, something that is not compatible with all reader software.

“If a PDF is sent out as the only formatted document of a crime alert, then it singles us out as people who cannot read, and therefore we’re not informed,” he said. Schadegg has gotten the Richfield Police Department to send its alerts with both a PDF and Word file attached.

Sponsored by Rep. Paul Thissen (DFL-Mpls), HF254 states, “If a law enforcement agency provides a crime alert to citizens within its jurisdiction, the alerts and any accompanying documents must be in a format that a disabled person can access with commercially available text-based screen reader software.”

It received division approval and was sent to the House Public Safety Policy and Oversight Committee.

The bill would also classify as private the names and contact information of citizens requesting a crime alert.

Rep. Paul Kohls (R-Victoria) said he is “sympathetic” to the reasoning behind the bill, but is concerned about issuing a local government mandate without accompanying dollars. “Cities that are currently doing crime alerts may elect not to do them if the costs are going to increase for doing it. They may just say ‘We’re not going to do this,’ and then don’t we have a whole group of people who are getting information now that is useful to them not getting it?”

— M. COOK

Domestic Abuse Awareness Month
An issue few people like to talk about could get a greater focus.

Sponsored by Rep. Al Doty (DFL-Royalton), HF139 would officially designate October as Domestic Violence Awareness Month in Minnesota.

Approved Jan. 30 by the House Crime Victims/Criminal Records Division, the bill was sent to the House Public Safety Policy and Oversight Committee.

Its companion, SF87, sponsored by Sen. Paul Koering (R-Fort Ripley), awaits action by the Senate Judiciary Committee.

“We have over 37,000 women and children that are served by community advocacy programs, and over 2,600 domestic assault cases a year in Minnesota,” Doty said, noting that more than 12,000 Orders for Protection are issued annually. “In a year when we are not going to be spending much money, increasing awareness is something that may prevent us from ruining a lot of lives and spending a lot of money.”

Cyndi Cook, executive director of the
Minnesota Coalition for Battered Women, said the federal government already recognizes October as Domestic Violence Awareness Month and, although not in law, governors have bipartisanly proclaimed the same in Minnesota. “Having a month that highlights the issue has given us an opportunity to increase public awareness to support events across the state.”

Johnnie Barthel, who works with women in domestic violence relationships, said many people would rather avoid the issue when they hear fighting next door or see a bruised woman. “It’s easier to turn up the volume on the television or radio than to pick up the phone and call 911,” she said. “It is easier for us to stand in a crowd of onlookers and watch a neighbor being taken away in an ambulance or a coroner’s car.”

While supportive of the measure, Rep. Paul Kohls (R-Victoria) is concerned it may not have much impact on such a troubling issue. “Hopefully we’ll do something more to get some awareness of the issue. … We have to be getting at the actual problem, and I’m not sure this is going to get us as far as we should go.”

— M. COOK

Schools favor local calendar control

Giving school districts local control over their calendar year is what Rep. Kim Norton (DFL-Rochester) intends with two bills approved by the House K-12 Education Policy and Oversight Committee Feb. 5.

State statute prohibits a school district from starting the school year before Labor Day, unless a specific exception applies.

HF195, as amended, would impose a moratorium on mandatory post-Labor Day school starts for two years and authorize a study of the impact of repealing the school-start law on Minnesota’s tourism industry. Findings would be reported to the House K-12 Education Finance Division and House K-12 Education Policy and Oversight Committee by January 2011. Supporters say district control over school calendars would help deliver higher quality education to students. “This is one of the top non-economic issues our boards want to see [happen] this year,” said Kirk Schneidawind, Minnesota School Boards Association associate director of governmental relations.

Resort owners testified that allowing a pre-Labor Day start would push school sports practices earlier into August, compounding a trend of declining resort business in the important month. “The Minnesota school calendar defines our season,” said Paul Bugbee, owner of the Bug-Bee Hive Resort in Paynesville. He said “the great Minnesota tradition” of family resort vacations is “going, going, gone.”

HF195 was sent to the House Finance Committee with the recommendation it be re-referred to the House K-12 Education Finance Division.

The committee also approved HF194, which would repeal the prohibition of starting the school year before Labor Day, and referred it to the House Finance Committee with the recommendation it be re-referred to the House Higher Education and Workforce Development Finance and Policy Division.

The companion bills, SF22 and SF23, both sponsored by Sen. Chuck Wiger (DFL-North St. Paul), await action by the Senate Education Committee.

— K. BERGGREN

Ratings for child care programs

The role of state government in rating child care programs was touted by some and questioned by others at a Jan. 29 hearing of the House Early Childhood Finance and Policy Division.

HF40, sponsored by Rep. Sandra Peterson (DFL-New Hope), and HF246, sponsored by Rep. Nora Slawik (DFL-Maplewood), would expand and fund efforts to improve child care quality. Both bills were held over for possible inclusion in an omnibus early childhood finance bill.

HF40 would create a statewide child care quality rating modeled after Parent Aware, a system that is currently in the pilot stages in the cities of Minneapolis, St. Paul, Wayzata, and Blue Earth and Nicollet counties.

Lisa Thompson, president of Child Care Providers Together, a union of family caregivers, said her peers have mixed feelings about quality ratings. Thompson, who has 15 years of experience running a licensed in-home child care program, said the ratings “could be the best thing that ever happened to family child care and the children and families we serve,” but should not be “one size fits all.”

Parent Aware rates care settings on a four-star scale. Thompson suggested the ratings may be biased toward larger centers which may have more expansive facilities or lower adult-to-child ratios. Accredited Head Start programs and centers automatically rate four stars.

HF246 would “allocate an additional $250,000 per year above the amount allocated in fiscal year 2009 in federal child care and development funds for Parent Aware star rating tool activities.” Thompson said it would help providers make technical improvements to boost their rating.

Opponents of a public rating system said it would unfairly drive the market. “When you expand regulations you raise the cost of doing business,” said Tom Prichard, president of the Minnesota Family Council. He also believes “the standard drives the system” and would reduce choice and options.

Peterson reiterated the rating system
would remain voluntary for parents and for providers.
A companion to HF40, SF72, sponsored by Sen. Tarryl Clark (DFL-St. Cloud), awaits action by the Senate Education Committee. There is no companion to HF246.  
— K. BERGGREN

Guaranteeing a license
A man who mentors disabled military veterans is hoping for legislative support of a bill that would give first preference to a greater number of veterans who seek hunting licenses.
Sponsored by Rep. Tim Sanders (R-Blaine), HF289 would amend the lottery system used by the Department of Natural Resources when selecting individuals for fish and game permits and licenses.
Those who are either currently serving in the U.S. armed forces (including the National Guard), or those who have served during the past 24 months now get preferential treatment.
The bill would add Purple Heart medal recipients and servicemen and servicewomen with a disability rating of 70 percent as defined by the U.S. Veterans Administration. Such persons could obtain a license to hunt turkey, bear and antlerless deer without going through the lottery process. The bill was held over Feb. 2 by the House Game, Fish and Forestry Division for possible inclusion in its omnibus bill. It has no Senate companion.
Under the bill, the commissioner would be required to give preference to service members and veterans. The commissioner can give preference now, but it is not required.
Ray LaPresto, who volunteers for a mentoring program through the United States Military Academy at West Point, said one of his mentees would like to hunt turkeys on LaPresto’s Dennison farm.
“I was afraid he wouldn’t get picked (in the lottery),” he said.  
— S. HEGARTY

GAME & FISH

Iran divestiture bill approved
A House committee approved a bill that would require the state to divest its holdings in certain companies doing active business with Iran.
HF111, sponsored by Rep. Ryan Winkler (DFL-Golden Valley), would require the State Board of Investment, which manages the state’s retirement and trust funds, to sell its investments in companies actively involved in Iran’s energy sector. Winkler said the goal is to make it more difficult for Iran to develop nuclear weapons.
Following Feb. 4 approval by the House State and Local Government Operations Reform, Technology and Elections Committee the bill now goes to the House floor. A companion, SF131, sponsored by Sen. Terri Bonoff (DFL-Minnetonka), awaits action by the full Senate.
Afsheen John Radsan, a professor at William Mitchell College of Law and an expert on Iran policy, said the country is a state sponsor of terrorism and a destabilizing force in the Middle East. He explained that divestiture represents an “intermediate option” for discouraging Iran from pursuing nuclear weapons.
“I don’t think we’re ready for military action, but I don’t think diplomacy enough will solve the problem,” Radsan said, adding that President Barack Obama supports the idea.
Howard Bicker, the board’s executive director, said the bill would affect approximately $280 million worth of state investments, or slightly more than 1 percent of the state’s total investment portfolio. He said the board has taken no official position on the bill; however, he stated his personal opinion that the bill might not be as effective as intended.
“Once you sell your stock, the company doesn’t care who you are. You’re gone. Your influence is gone on that day,” Bicker said. He added that a shareholder initiative, which would require no legislative action, might be more effective in changing companies’ behavior.
Rep. Mary Kiffmeyer (R-Big Lake), a former board member, expressed concern that the bill would “politicize” the SBI and distract it from its primary purpose of making good investments for the state’s current and future pensioners.
“We have commitments to those retirees. They have expectations. We have responsibilities. And if this fund isn’t as strong as it can be … it will fall to us to make up that difference,” Kiffmeyer said.
Winkler said he expects the Legislative Commission on Pensions and Retirement to hold a hearing on the bill before it comes up for a vote on the House floor.  
— N. BUSSE

HEALTH

Legislators react to proposed cuts
Significant changes in services to the sick as a result of the governor’s recommended

SAFETY

Seeing meth precursor log data
A pair of bills that would help law enforcement agents track potential methamphetamine manufacturers have some members questioning the potential for invasion of privacy.
Sponsored by Rep. Joe Mullery (DFL-Mpls) and Rep. Debra Hilstrom (DFL-Brooklyn Center), respectively, HF70 and HF145 were held over Jan. 29 by the House Public Safety Policy and Oversight Committee for possible omnibus bill inclusion.
Current law requires business establishments that sell over-the-counter methamphetamine precursor drugs to have the buyer, in part, “sign a written or electronic document detailing the date of the sale, the name of the buyer, and the amount of the drug sold.”
Bob Bushman, Statewide Gang and Drug
Task Force coordinator for the Department of Public Safety, said some task force members have had difficulty obtaining transaction information. “When the changes were made to this a couple years ago, there was no language put in there that requires them to retain that log information that they get when they sell the stuff, and there was no requirement that they make the logs available to law enforcement.”

Mullery’s bill would require businesses to keep the log for five years from the date of purchase. It would also provide immunity to the business or employee from any liability that comes from releasing sales information. Hilstrom’s measure would require the log “be open to the inspection of any law enforcement agency.”

Rep. Paul Kohls (R-Victoria) said this gets close to invasion of privacy on people’s health care. “It’s not prescription medication; but nonetheless, I’m not sure how I feel about law enforcement gathering information on my Sudafed purchases when there’s no reason to suspect that I’m involved the manufacture of methamphetamine.”

Bushman said the goal is to get at individuals or groups of people who buy their limit at one store and go to more stores over a number of days. They then put the product together to manufacture the illegal drug. “When you look at the logs, it’s very apparent,” he said.

— M. Cook

**TAXES**

**Tax cut plan criticized**

Some members of a House division questioned the wisdom of Gov. Tim Pawlenty’s proposal to cut corporate taxes during a Feb. 3 hearing on the Department of Employment and Economic Development’s proposed 2010-2011 biennial budget.

Rep. Ryan Winkler (DFL-Golden Valley) was among several members of the House Bioscience and Workforce Development Policy and Oversight Division who criticized the governor’s plan to cut the corporate franchise rate in half over the next six years. Winkler said that while the tax cut is intended to stimulate economic growth, there is no guarantee that it will; meanwhile, he noted, the governor also plans a 10 percent General Fund reduction for DEED programs that have already proven to be an economic boon to the state.

“I still don’t have an understanding of where the economic analysis comes from that we should be putting hundreds of millions of dollars for cutting this corporate tax,” Winkler said. “We could be using that money for lots of other good things that you’re doing.”

Rep. Larry Haw (R-St. Cloud) said that if the corporate tax cuts are intended to stimulate the economy, then measurable economic goals should be included in the governor’s plan.

“We’re getting rid of some things that are working, and I’m not too sure that the other is going to work,” he said.

Republican division members defended the governor’s plan.

“I’ve spent a number of years visiting manufacturers and employers in our area of the state and asking them specifically, ‘What are your challenges?’ And in almost every single instance tax and regulatory climate come up,” said Rep. Steve Gottwalt (R-St. Cloud).

Rep. Joyce Peppin (R-Rogers) said Minnesota is well-known to have the “third-highest” business tax rate in the industrialized world. She also challenged DFLers to come up with a budget plan of their own, rather than just criticizing the governor’s proposals.

DEED Commissioner Dan McElroy said Minnesota’s business climate is multifaceted and that taxes are not the only issue to consider; however, he predicted that the governor’s plan would make Minnesota more competitive with neighboring states over the long term.

— N. Busse

**Corporate tax cut concerns**

It might not be the right time for cutting the corporate franchise tax with the state facing a deficit, according to some House Taxes Committee members.

While Rep. Ann Lenczewski (DFL-Bloomington), the committee chairwoman, said this kind of tax is flawed, her issue is more with the timing of the proposal that is part of Gov. Tim Pawlenty’s budget.

“I didn’t hear a positive response from the governor when I wanted to do this last year,” she said during a Feb. 4 meeting. “It’s a very expensive ticket item and it’s very difficult because we have a deficit.”

The cut would take the business tax rate from 9.8 percent to 4.8 percent over six years beginning in 2010.

She added that a sales tax cut would help businesses more because they pay more in sales tax than in corporate franchise tax.

Revenue Commissioner Ward Einess said the governor wanted to do more than just satisfy the constitutional requirement to balance the budget and “just get by” for the biennium.

The cut would give the state a more competitive rate, which would help encourage businesses to grow and invest in Minnesota, Einess said. The current rate is one of the highest in the nation.

“When you say you’re reducing a tax by 50 percent that gets noticed not only here, but around the country,” he said. “We want to change the climate in Minnesota.”

Rep. Diane Loeffler (DFL-Mpls) agreed that the issue is timing. “We have long-term goals and things that we need to fix. We have to talk about which long-term goals should get implemented.”

Rep. Laura Brod (R-New Prague) said stopping at Minnesota’s borders was not the

— S. Hegeman

**Full funds for tax filers**

With time running out to make changes to the state’s tax law for the current filing season, Rep. Ann Lenczewski (DFL-Bloomington) wants to make sure Minnesota conforms to most of the federal changes enacted since Feb. 13, 2008, that Minnesota references for state tax administration purposes.

“(HF932) will keep people from having to file amended tax returns if this bill is passed later,” Lenczewski told the House Taxes Committee Feb. 3. “The timing only benefits the taxpayer.”

Approved by the committee, it now awaits action by the House Ways and Means Committee.

A companion, SF252, sponsored by Sen. Tom Balk (DFL-Cook), awaits action by the Senate Taxes Committee.

The changes include:

- counting nontaxable combat pay as earned income for members of the military for purposes of claiming the earned income credit and working family credit;
- allowing direct transfers to charities from traditional IRAs and Roth IRAs for tax years 2008 and 2009;
- extending of the special rule for contribution of conservation property by qualified farmers and ranchers;
- apportioning the exclusion of gain on the sale of an individual’s principal residence for time periods after Jan. 1, 2009, when the residence was not used as the principal residence;
- extending various provisions related to depreciation and expensing;
- providing preferential tax treatment within the Midwestern Disaster Relief Area and within other federally designated disaster areas; and
- changing requirements for employer-sponsored group health plans to qualify for the employee income exclusion.

LGA, renter concerns shared

Cities could see cuts in local government aid and renters’ refunds if Gov. Tim Pawlenty’s budget proposal becomes law.

It would reduce LGA by 23 percent — $77.8 million in Fiscal Year 2010 and $168 million in Fiscal Year 2011. Even with the reduction, 763 cities will divide $823 million in LGA for the biennium.

“LGA is going to be a big issue,” said Rep. Paul Marquart (DFL-Dilworth), chairman of the House Property and Local Sales Tax Division, which heard the proposal Feb. 4. “I appreciate what the governor has put out here as his way to balance the budget, but is it fair? My concern is disparity.

This proposal is coupled with market value credit reductions and is structured to fairly and evenly distribute the reductions across all cities, said Revenue Commissioner Ward Einess. The reduction would first come from certified 2009 LGA and then from the market value homestead credit if there is not enough aid.

Einess said a lot of time was spent looking at geographic disparity.

“The reality is what do you take when you’re taking everything they’ve got? We did our best to spread cuts around.”

“Haven’t our cities and local units of governments taken more than their share of the burden?” said Rep. Denise Dittrich (DFL-Chisholm). “I think they have been treated unfairly.”

Cities have limits to how much they can levy, but cities can go to their voters to increase their levies whenever they want to.

“We made some very tough decisions,” Einess said. “It’s not true that all the cities are taking the brunt of this. This is not an indictment of local governments at all.”

Rep. Morrie Lanning (R-Moorhead) has never really liked levy limits.

“I have argued against them repeatedly,” he said. “They’re hard to argue when you have increases in aid. But when you have cuts in aid, it’s hard to justify the continuation of levy limits.”

Another issue that arose was the reduction of the renter’s credit.

Currently, renters receive 19 percent of rent paid in the form of a refund. Under the governor’s proposal this would be reduced to 15 percent.

Rep. Diane Loeffler (DFL-Mpls) did not like this proposal.

“There’s real inequity when you just pick a number,” she said. “One-size-fits-all doesn’t really fit anybody. I don’t think our tax system should create so many winners and losers.”

—— S. Hegman

Mounting navigation devices

Some drivers struggle to watch where they are going while, at the same time, looking at a device telling them which route to take.

Rep. Al Juhnke (DFL-Willmar) admits he has taken his eyes off the road to look down at a global positioning system. He sponsors HF85, which would allow GPS or other navigation systems to be mounted or located near the bottom-most portion of a windshield.

Approved Jan. 29 by the House Public Safety and Oversight Committee, the bill now awaits action by the House Transportation Finance and Policy Division. A companion, SF323, sponsored by Sen. David Tomassoni (DFL-Chisholm), awaits action by the Senate Transportation Committee.

State law currently allows rearview mirrors, sun visors and electronic toll collection devices be mounted on a vehicle’s windshield, but many drivers illegally have their GPS unit attached as well.

“Take a gander as you’re driving home or as you’re commuting and notice how many GPS units are out there now, and how many you see either on the dash or on the lower part of the windshield mounted,” Juhnke said.

Rep. Tony Cornish (R-Good Thunder) successfully amended the bill to require the mounting be on lowest part of the windshield.

“It’s a good thing,” Juhnke said. “I don’t have to ask for directions anymore. Not that I did ever anyway.”

—— M. Cook

Stimulus for state projects

State leaders got a readiness warning from a man with some pull in our nation’s capitol.

U.S. Rep. James Oberstar told a Jan. 29 joint meeting of the House Transportation Finance and Policy Division and the Senate Transportation Committee that the state had best be ready with some transportation projects that could be funded with part of the proposed economic stimulus package approved one day earlier by the U.S. House of Representatives.

“We want to create jobs within 90 days,” said Oberstar, chairman of the House Transportation and Infrastructure Committee. He said the bill, which contains $66 billion for transportation purposes — including $477 million for Minnesota — would put 12,000 Minnesotans to work on transportation and infrastructure projects by June.

“With this investment, we expect to lay a base and get people back working,” Oberstar said, adding the workers would be off the unemployment rolls, paying taxes again and spending money in the marketplace.

The money would go for projects that are ready to go, except for funding. He said the projects would be funded solely with federal dollars, instead of the normal 80 percent federal-20 percent state split.

The Department of Transportation provided Oberstar a preliminary list of projects that could be funded through the stimulus package. They include asphalt and concrete work, bridge replacements and an expansion of Highway 610 in Brooklyn Park and Maple Grove.

The Twin Cities metropolitan area/Greater Minnesota split is about 50-50.

If awarded dollars are not used for specific projects, they will be returned and distributed to other states that are ready to put those dollars to work.
“I don’t want Minnesota to be stumbling around,” he said.

Oberstar said states would be expected to advertise bids for projects within 30 days of the bill’s signing into law. Projects are to be awarded, and contractors are to be on site, within 60 days of signing. Forty-seven days from signing Oberstar said there would be a hearing of his committee to receive from every state the list of contracts that have been awarded, the number of jobs on-site, description of those jobs and the payroll. Subsequent lists will be required every 30 days until the funds are expended.

— M. COOK

Type III bus driver change

Allison Porter said a 2008 law is having a negative impact on her school days this year. Through an interpreter, Porter told the House Transportation and Transit Policy and Oversight Division Feb. 4 that she and her Minnesota North Star Academy classmates have fewer opportunities for learning experiences because of vehicle driver requirements.

“In the past teachers could drive us where we needed to go, but now they can’t,” she said. “Now they also can’t use the vans to drive us to games in other states so our team can play against other deaf teams. Now we have to rent a bus to go to games, to go on field trips, go to our transition classes and any other school events.”

Rep. John Ward (DFL-Brainerd), the sponsor of HF116, said last year’s law required bus drivers to comply with a number of requirements, including a physical and drug test. However, the previous sponsors intended to exempt “temporary or incidental Type III school vehicle drivers” because driving would not be part of their “normal duties.” But he said the Department of Public Safety interpreted the law whereby anyone who might drive a Type III vehicle must meet the requirements.

Type III vehicles are passenger autos, vans and buses that hold no more than 10 people, and whose maximum gross weight is 10,000 pounds. They are used, for example, when a fine arts coach drives their team to a meet.

“The last thing we want is a district to either cut the program or, even worse, tell students they are to start driving themselves to events and meets,” Ward said.

While not jeopardizing safety provisions in the 2008 law aimed at persons with a school bus endorsement, the bill would allow a district employee with any class of commercial driver’s license to operate a Type III vehicle without having the physical exam or passing a drug and alcohol test. Drivers would need to have their license annually verified by an employer and they must notify the employer if convicted for certain DWI and traffic regulation offenses.

Representatives from Education Minnesota and the Minnesota School Boards Association spoke in support of the bill.

Approved by the division, the bill awaits action by the House Public Safety Policy and Oversight Committee.

Its companion, SF33, sponsored by Sen. Rick Olseen (DFL-Harris), awaits action by the Senate Judiciary Committee.

Native prayer
Higher education, lower funding
Minnesota colleges resist tuition cap, brace for budget cuts

BY NICK BUSSE

U.S. college tuition rates have skyrocketed over the last two decades, and Minnesota has not bucked the trend. No one knows this better than Jennifer Weil.

Weil, a student and working mother of two, is about to graduate from Minnesota State University Moorhead, approximately $40,000 in debt. Testifying before members of a House division Feb. 3, she said the loans she took out to pay for school were a necessary investment in her future, but she regrets the price tag.

“Looking forward, I know that I’m not going to be able to purchase a home for my family and have a yard for my kids to play in very soon,” Weil said. “It’s going to take a lot of years.”

Weil is not alone. According to the University of Minnesota’s Office of Institutional Research, undergraduate resident tuition at the university’s Twin Cities campus increased by nearly 400 percent over the last 20 years, with the Crookston, Duluth and Morris campuses all faring similarly. Schools in the 54-campus Minnesota State Colleges and Universities system remain a less expensive option, but the overall trend is the same, often forcing students to take out tens of thousands of dollars in loans to get their degrees.

This year, Weil and other debt-saddled students probably have little to look forward to in the way of relief. With the state facing a projected deficit of at least $4.8 billion, another round of budget cuts to higher education appears likely. In his budget proposal, Gov. Tim Pawlenty called for a reduction of nearly 11 percent to the state’s higher education funding, with a cut of approximately $151 million to the University of Minnesota and $146 million to MnSCU.

This plan mirrors similar cuts that were made during the state’s last major budget crisis in 2003, the net result of which was four consecutive years of double-digit tuition rate increases at the state’s public colleges and universities.

“Students are still paying the price today for the cuts that were made in 2003,” Weil said. She added that the additional burden has come at a time when student debt “has become a problem for nearly every student in our system.”

Capping tuition

To protect students from similar increases this time, the governor has called for the Legislature to cap tuition increases at an inflationary rate; however, college administrators and many lawmakers don’t like the idea.

“A freeze on tuition would be absolutely devastating,” University of Minnesota President Bob Bruininks said at a Jan. 22 hearing. Although he hopes to minimize any tuition increases, Bruininks said he and other

Spending new proceeds
Lessard Outdoor Heritage Council considers projects for new tax receipts

By Susan Hegarty

Last November, more than 55 percent of voters approved raising the state sales and use tax by three-eighths of 1 percent and dedicating the additional money to improving the environment and preserving the state’s cultural heritage.

This month, some of those voters will go a step further and present their ideas on spending the new tax dollars. They’ll address the Lessard Outdoor Heritage Council, the statutory body responsible for sorting through some of the proposals in order to make recommendations to the Legislature.

By March, the council is to supply the House Cultural and Outdoor Resources Finance Division with recommended projects to receive funding. A bill will be drafted for those projects, and it must be signed into law for funding to be allocated.

Some misconceptions about the scope and authority of the council have surfaced. Council members say it’s important to note that they are charged with making recommendations for only 33 percent of the dedicated tax revenue — specifically, funded projects that should “restore, protect and enhance wetlands, prairies, forests and habitat for game, fish and wildlife.”

The remaining money will be debated among other stakeholders and divided into the following three new funds: the Clean Water Fund (33 percent), the Parks and Trails Fund (14.25 percent), and the Arts and Cultural Heritage Fund (19.75 percent). Proposals for these categories bypass the Lessard Council and are directly heard by the House Cultural and Outdoor Resources Finance Division.

Although the tax won’t begin being collected until July 1, the division plans to introduce legislation this year so that initial projects are funded for 2010. Money will be appropriated each year through June 2034.

Rep. Rick Hansen (DFL-South St. Paul), a council member, co-sponsored the constitutional amendment that authorized the tax increase.

“I think we’ll have more presentations than there is money,” Hansen said.

Revenue projections keep dropping due to the harsh economic conditions, but the first round of appropriations will be key, Hansen said. “It’s important that this first year voters can look and say, ‘Yes, that’s what I voted for.’”

Lessard Council Hearing Schedule

Presentations are scheduled to begin Feb. 9 about how 33 percent of the new dedicated sales tax could be spent to restore, protect or enhance wetlands, prairies, forests and habitats.

The Lessard Outdoor Heritage Council meetings are open to the public and begin at 8 a.m. in room 500N of the State Office Building, across from the State Capitol. Space is limited and those wishing to present a proposal are asked to register in advance.

Monday, Feb. 9

Fish Habitat

To present a proposal, contact LOHC Acting Executive Director Bill Becker at bill.becker@state.mn.us or 651-259-5527. For more information, visit www.lohc.state.mn.us.

— S. Hegarty

Council composition

The council consists of 12 members with staggering terms. Four members were appointed by the governor; two citizens were appointed by the Speaker of the House; two citizens were appointed by a Senate subcommittee; and one DFL and one Republican legislator were chosen to serve from both the House and Senate: Hansen, Rep. Bob Gunther (R-Fairmont), Sen. Ellen Anderson (DFL-St. Paul) and Sen. Bill Ingebrigtsen (R-Alexandria). The council’s administration duties fall under the auspices of the Department of Natural Resources.

Although formal presentations are scheduled to begin Feb. 9, there was preliminary testimony in late January when authors of a Statewide Conservation and Preservation Plan spoke before the House Environment and Natural Resources Finance Division.

Commissioned by the Legislative-Citizen

Lessard continued on page 23
Skeptics say Q Comp, as the Quality Compensation for Teachers alternative compensation program is commonly known, is a stick that burdens school districts with greater costs, paperwork and compliance requirements and threatens collective bargaining agreements. Supporters think of it as a carrot that provides a much-needed monetary incentive promoting teacher professional development, improving classroom instruction and boosting students’ academic proficiency. Additional annual compensation paid to teachers in Q Comp has ranged from $68 to $2,500.

However, a program evaluation by the Office of the Legislative Auditor released Feb. 3 found “the effect of Q Comp on student achievement can’t be adequately measured with existing data.”

The report also highlights inconsistencies in application and oversight between districts. Judy Randall, a program evaluator with the Legislative Auditor’s office, said that smaller districts in particular have difficulty finding time and money to even apply for Q Comp.

Currently 44 school districts, or 13 percent of districts statewide, and 28 charter schools, 18 percent of all charter schools, partake in Q Comp plans. Participating districts receive up to an additional $250 per pupil beyond the regular education funding formula. Each district’s plan is self-determined within Education Department guidelines and must be approved by teachers.

Rep. Marsha Swails (DFL-Woodbury), an Advanced Placement English teacher in Woodbury, a Q Comp district, said she has enjoyed both the pay increase and collegiality from Q Comp, but said she is “very troubled” by the lack of “conclusive evidence that this is increasing to student performance.”

Randall said the lack of conclusive results is partly due to the small sample size and short period of implementation — only 11 of the 72 districts and charter schools now participating in Q Comp have done so for all three years of its existence.

“Does (Q Comp) really help student performance? I say yes because I see it every day in some of my students,” LaCrescent-Hokah Public Schools second-grade teacher Jon Steffes told the House K-12 Education Policy and Oversight Committee Feb. 4. Although “there is more work involved” as a Q Comp participant, he estimates two-thirds of teachers “embrace Q Comp in our school. It helps them become better teachers, focus their instruction.”

Although Q Comp is often referred to as a merit pay program, Rep. Randy Demmer (R-Hayfield) said “the staff development part is probably just as revolutionary for the entire teaching staff” and “probably as effective for
Keeping it local
Anderson wants to help constituents from a different chair

BY SONIA HEGMAN

Rep. Paul Anderson (R-Starbuck) is no stranger to the difficulties counties and other local governments face.

Before running for state representative, Anderson was a Pope County commissioner.

“I saw a lot of frustration with how the state deals with local units of government,” he said. “I came to the conclusion that I could maybe do more for the people back home working on issues down here.”

When former Rep. Bud Heidgerken (R-Freepport) retired, Anderson thought this would be a good opportunity for him to run for office.

His biggest concern is cuts to local government aid. With more than 20 towns in his district, LGA has become a large part of their budgets. While some towns were exempted from the cuts that have occurred the last few years, Anderson said he’s worried about what might happen this year. “They need some direction pretty soon as to how much they can count on or how much they are going to lose,” he said.

Nursing homes are another concern for Anderson. He has five or six in his district, which are sometimes the biggest employers in smaller towns.

“Our rural nursing homes are really hurting in terms of pay equity and keeping up with inflation,” he said. A local newspaper in his district reported the state took over two nursing homes in rural Minnesota because the facilities were unable to meet their payrolls.

“I know funding is going to be really tight, but I really hope we can somehow find a way to give our nursing home employees some kind of an inflation bump (in their salaries),” he said.

Facing complex problems
For Champion, jobs are the starting point

BY LEE ANN SCHUTZ

Too many streets in north Minneapolis are dotted with homes in foreclosure, making the housing crisis very real for Rep. Bobby Joe Champion (DFL-Mpls).

The housing issue is among a host of “complex problems” faced by his constituents, Champion said. An attorney, born and raised in his district, he hadn’t considered running for public office, but the issues brought him to his own personal “crossroads”: be part of the solution or keep hoping someone else would step in and work for change.

“I felt like we needed a voice that was going to seek to make sure that issues important to our district are at least on the table,” he said.

The issues facing his district are interwoven, but it all starts with jobs or, more specifically, the lack of available work for many of his constituents. “If I don’t have a job, I don’t have housing. And I can’t pay for medical expenses or for my child to go to college,” he said.

Transportation can be a problem for those seeking work as well. Over the years, the job growth in the Twin Cities metropolitan area has occurred primarily in the suburbs. His district’s transportation needs are not well served, he said, and those relying on public transportation may not be able to get to the jobs.

Public safety is part of the mix, too, he said. Crime can stigmatize a neighborhood and make it an undesirable place to live if people perceive it is unsafe, no matter how affordable the housing. “We can’t arrest the problem away; we need to make substantial investments in the lives of people,” he said.

Married and the father of three, Champion’s law career has been diverse. He has served as an assistant attorney general under Skip Humphrey and Mike Hatch, and in-house counsel to music producers Jimmy Jam and Terry Lewis. But it is his involvement with several community organizations that prompts him to further his community to action.

A firm believer in communicating to face challenges, he plans to increase the number of town hall meetings; and at the Legislature, he sees the importance of reaching across the aisle to improve the quality of life for people in his district.
Planning for the future

Downey hopes to offer proactive ideas for state’s future

By SONIA HEGMAN

There wasn’t a specific catalyst that motivated Rep. Keith Downey (R-Edina) to run for office. “Mine was a much more gradual process,” he said. But his concern over how the state is preparing itself for the future was the motivator that got him thinking about public service.

“I looked at our state and thought very strongly that we weren’t preparing ourselves for the 21st Century,” he said. “What was happening globally and nationally; we weren’t keeping pace. Our state is modeled after ’60s, ’70s and ’80s programs and I really felt that we have an opportunity here in Minnesota.”

Downey worked for an accounting and consulting firm, where he consulted with state and local government personnel for eight years before running for office. He is not working there during session, and is unsure about his future at the firm.

Downey won party endorsement over the nine-term incumbent, Ron Erhardt, who chose to run as an Independent. Downey beat Erhardt by 4.79 percent and his DFL opponent by 5.34 percent, on Election Day.

The main issues Downey sees for his district are: “The economy and how do we recover,” he said. “Education really is probably the most important, absent of current economic conditions. Then it would be transportation and how we improve our infrastructure.”

He said Edina residents, in general, do not mind paying higher taxes provided they are getting a good return for their investment. He hopes his appointment to the House Taxes Committee will serve his district well.

Although he comes from a business and tax background, he said he has a lot to learn especially “in terms of broader policy dimensions and the direction we should be going.”

Downey also serves on three education committees and state government finance. “I think they fit me, they fit my district and they interestingly are at the very center of things considering the budgetary issues we face.”

‘Honesty, common sense’

Murdock comes to St. Paul with an open mind, no agenda

By NICK BUSSE

Politics has always been in the back of Rep. Mark Murdock’s mind. The Ottertail Republican has been wrapped in elections since childhood, when his mother, a DFL activist, campaigned for Democrats like former President Harry Truman.

“She still likes me even though I’m a Republican,” Murdock said.

In fact, when Murdock was asked last year to run for the seat vacated by former Rep. Dean Simpson (R-Perham), his mother even donated to his campaign. Murdock said he hopes his fellow lawmakers will cross party lines in a similar way to deal with the state’s budget deficit.

“We’re all going to have to work together. There’s going to be a lot of pain out there. There’s going to be a lot of cuts,” he said. “We just have to suck it up, watch our expenses and get through this thing.”

Murdock, a hardware store owner for 25 years, said he comes to the Capitol with no political agenda other than “honesty and common sense and an open mind.” He is guided by the philosophy that there is a difference between a real “representative” and a mere “politician:” a willingness to do what’s right for his constituents, regardless of politics.

“Politician, I think, sometimes might be a job, a career. ... Representative, I think, is the proper term. It’s what I want to be,” Murdock said.

According to Murdock, the number one issue for his constituents is jobs and the economy. As a business owner, he has been forced to reduce his employees’ hours. He supports Gov. Tim Pawlenty’s proposal to reduce taxes on businesses, arguing it will stimulate job growth — although he notes it would do more for larger employers than it will for small employers like him.

“Well, you can’t fix a budget by raising taxes. Raising taxes creates job loss,” Murdock said.

Murdock, an avid outdoorsman, lives on Round Lake near Perham with his wife of 34 years, Pat. They have two adult sons and are expecting their first grandchild in August.
Altitude adjustment
Ag and water issues linked for Torkelson

By Susan Hegarty

A fourth-generation farmer, Rep. Paul Torkelson’s move to St. Paul to serve in the Legislature hasn’t been easy, especially living on the 28th floor of a downtown high-rise.

“It’s an adjustment for a country boy to come live in the city. There is no place in Brown, Redwood or Watonwan counties that you could even get to the 28th floor, unless you go up the grain elevator or water tower,” said Torkelson (R-Nelson Township).

He’s no stranger to adjusting, however. About 20 years ago, he changed careers. Torkelson earned a degree in instrumental music education from Gustavus Adolphus College, and taught music for a few years before the opportunity arose to live and work on his great-grandfather’s 1878 homestead. He now farms 1,400 acres. Music remains a part of his life; he’s the percussionist with a local area band called Attitude.

Torkelson has been interested in agricultural issues for years and recently served as vice president of the Minnesota Farm Bureau. Last March, he completed an 18-month study in the Minnesota Agriculture and Rural Leadership program.

Former district Rep. Brad Finstad (R-Comfrey) hand-picked Torkelson to run for his seat.

“My wife and I sat down and got out the sheet of paper with plus on one side and minus on the other. With my wife’s blessing, it all added up to ‘Yes, we’ll give this a shot,’” he said.

He hopes to be a voice for rural Minnesota and serves on the House Agriculture, Rural Economies and Veterans Affairs Finance Division.

As a member of the Clean Water Council since its inception in 2006, Torkelson intends to leverage that experience while serving on the House Environment and Natural Resources Finance Division and the House Cultural and Outdoor Resources Finance Division.

“Both of those committees will be working closely with the funds generated by the new constitutional amendment so I hope to have maximum input on how that all comes together, especially the clean water portion of it,” Torkelson said.

At the close of the 2009 session, Torkelson is looking forward to riding his 1999 Harley Davidson Road King once again across rural landscape.

Higher ed continued from page 13

University officials need to have all options on the table. “I’m making a plea to you as we go through some really tough times together ... I’m hoping that you’ll give us the kind of flexibility that we need to manage these changes in the most creative fashion,” he said.

Another critic of the tuition cap proposal is Rep. Tom Rukavina (DFL-Virginia), chairman of the House Higher Education and Workforce Development Finance and Policy Division. Rukavina said a tuition cap would basically guarantee staff and faculty layoffs. Aside from putting people out of work, he said this would also damage the quality of education students receive.

“I don’t think at this time, when people are getting laid off, losing their jobs and having to go back for retraining, that it’s wise to be cutting our higher education institutions,” Rukavina said.

Even some students are skeptical of the tuition cap idea. Alex Tenenbaum, a student legislative advocate for the University of Minnesota, testified at a Jan. 27 division meeting that although he would love to see tuition increases capped, he worries about what students would be giving up in return.

“There’s a lot of great programs, and if we’re going to be putting a cap and cutting funding, then we’re going to have to cut a lot of programs that mean a lot to people. We’re going to have to get rid of a lot of faculty,” he said.

The root problem

The reasons behind the state’s ever-rising college tuition rates are complex; to boil it down to basics, the costs associated with running a higher education institution have increased dramatically while state funding has essentially failed to keep pace, forcing colleges to make up the difference by putting a greater share of the financial burden on the students.

The fact that students are paying more doesn’t necessarily mean they’re getting more for their money, however. A report released in January by the Delta Project on Postsecondary Education Costs, Productivity and Accountability found that despite the inflated price tag on higher education, spending on actual classroom instruction decreased slightly throughout the United States between 2002 and 2006.

This begs the question of what is driving up the actual cost of higher education. Research points to everything from expanded student services to higher building operation costs; however, the largest factor, by far, appears to be personnel.

According to a 2006 issue paper from the U.S. Department of Education, 75 percent of college costs on average are taken up by faculty and staff salaries and benefits. In Minnesota, this has led to some questions about how colleges and universities are spending their money.

Cindy Phillips, a business professor and president of the faculty association at MSU Moorhead, said at the Feb. 3 hearing that MnSCU’s central administrative office was soaking up an increased amount of state funding at the same time campuses are being forced to make cutbacks. She said that if cuts were ultimately necessary, lawmakers should look at reprioritizing funds away from administration and toward actual classroom instruction.

Lessard continued from page 14

Commission on Minnesota Resources, the plan took 18 months to complete. Researched by dozens of institutions, including the University of Minnesota, it offers several recommendations based on an integrated assessment of the state’s natural resources.

“I think it’s challenging to look at all of these plans. We have to look at the testimony and at the credibility and capacity to do the projects. We have to look at whether it will result in an outcome,” Hansen said. “I believe we need to look at some balance regionally within each of these funds and across the funds.”

Gunther said some of the proposed projects, if funded, would utilize two-thirds of the estimated expenditures over the course of the funding. “I’m reluctant to say that I’d put all of my eggs in one basket,” he said. He expects lively debate will ensue over which projects should get the council’s nod.

Q Comp continued from page 15

growth as the whole merit pay idea.”

“I think what we are talking about is teacher empowerment,” Rep. Keith Downey (R-Edina) said. He supports Q Comp, but won’t yet say it should be mandatory.

Rep. Jim Davnie (DFL-Mpls), a middle school teacher, had harsh words for what he characterized as the prevailing mythology around merit pay. He told the House K-12 Education Policy and Oversight Committee Feb. 4 that he doesn’t believe “that the one missing component of student performance is teacher pay. And that if you just offer to pay me more I will get off my duff and get to work. As a teacher, I think that’s offensive but I also think it’s a ham-handed understanding of human motivation.” Yet, he said he is “still generally positive” about Q Comp’s effects on “the culture of my profession.”

“We would ask that when you make those cuts, you protect our core functions: the teaching and the learning — and that occurs on the campuses,” Phillips said.

College officials deny that administrative costs are the problem. Laura King, vice chancellor and chief financial officer for MnSCU, said at a Jan. 29 hearing that MnSCU ranks 46th in the nation for administrative spending on a per-student basis. Still, some lawmakers are skeptical. Rep. Bud Nornes (R-Fergus Falls), the lead Republican on higher education issues, said he’d like to see more data.

“I would like to see some kind of graph or a chart that indicates how has everything else been going up, for example: salaries, contracts and other fixed costs,” he said. “Have we just kind of fattened the system, so that it has to operate at that level? Or, ‘you raise more money or you have to lay off a lot of people?’”

Rukavina’s division has held a series of meetings in recent weeks to hear student and faculty reaction to the governor’s higher education budget proposals. He too said he would like to see more openness and information provided by MnSCU and the university on how they spend their money; however, he also said the short-term solution to higher education funding lies in a broader discussion about how to solve the state’s budget deficit.

“The way to fix this whole budget deficit is for the governor to come clean and say, ‘We can’t do this with just cuts.’ We have to raise some revenue, and when we raise some revenue, we can be a little more fair to higher education,” Rukavina said.
Child abuse, neglect and protection

Reports of child abuse or neglect in the state in 2007 .......................................................... 18,348
Number of children involved .................................................................................................. 26,561
Reports in 2005, 2003 .............................................................................................................. 18,674, 17,571
