Overview

1 Composition. Creates a 29-member intergovernmental advisory council on technology. Specifies members representing various types of local government and regional governmental units and organizations of these units, a public librarian, eight state agencies, and Native American Indians.

2 Duties. Specifies duties for the council. These include:
   - collaboration and communication with state and local governments on technology issues.
   - recommendation of best practices on information systems;
   - providing technology-related education and training;
   - providing grants to demonstrate and transfer useful advances in information systems;
   - represent local government on the information policy council.

3 Other duties. Requires establishment of an executive committee of up to 7 members. Provides for the executive committee to select an executive director. Permits the council to create task forces, which may include persons other than council members. Requires development of a biennial plan.

4 Funding. Provides for the council's budget to be administered through the Department of Administration. Requires the department to provide administrative support to the council.

5 Transfer of appropriation. Provides that unexpended appropriations for the old council are transferred to the new council.

6 Appropriation. Appropriation to the council for the upcoming biennium.
