This bill creates a pilot project in Dakota county for an integrated criminal justice information system and appropriates money for the pilot project.

1 **Criminal justice information system pilot project.**

**Subd. 1. Establishment.** Establishes a pilot project to develop an integrated criminal justice information system that facilitates the electronic sharing of data between all agencies managing criminal justice data in Dakota county. Requires the pilot project to:

- create a credible framework for integrating criminal justice information;
- define a core of criminal justice data that is needed and can be shared by agency partners;
- establish a set of standardized terms, policies and procedures for data entry, storage and retrieval;
- make technology improvements that are necessary for an integrated system; and
- improve the effective use of technology by providing users training in the application of technologies created.

**Subd. 2. Agencies in the pilot project.** Requires the pilot project, at a minimum, to include the following agencies in Dakota county: law enforcement, courts, prosecution, public defense, corrections, probation, and parole.

**Subd. 3. Sharing of project results.** Requires Dakota county to share the results of its pilot project with the state and other counties and cities and summarize the outcome of attempts to integrate Geographic Information System data, property records and assessing services data with the criminal justice information system.

**Subd. 4. Report.** Requires a report to the legislature from the Dakota county board by January 15, 2002, on the implementation and results of the pilot project.
**Subd. 5. Appropriation.** Appropriates $50,000 from the general fund to Dakota county for the pilot project.

2  **Effective date.** Day following final enactment.
