Overview

This bill makes various changes to the DWRS including defining “direct care staff,” modifying the automatic inflationary adjustments under DWRS, adding a competitive workforce factor to DWRS, removing the regional variance factor from DWRS rate calculations, requiring providers to annually submit labor market data to the commissioner, and requiring the Department of Human Services (DHS) to annually publish a report on provider and state-level labor market data.

The DWRS was enacted by the legislature in 2013 in order to comply with federal requirements that medical assistance (MA) rates be determined according to a statewide methodology. Prior to the implementation of DWRS, counties contracted with providers and set reimbursement rates. DHS administers the DWRS.

Enactment of the DWRS created a statewide framework within which reimbursement rates for services provided under the MA home and community-based services (HCBS) disability waivers are established. One element of the DWRS framework is a periodic inflationary increase, which requires DHS to: (1) update the base wage index component of the DWRS framework using data from the Bureau of Labor Statistics; and (2) update certain other DWRS component values based on changes in the Consumer Price Index-All Items, United States city average. The first inflationary increase occurred on July 1, 2017.

Section

Applicable services under DWRS are those authorized under the state's four MA HCBS disability waivers: brain injury waiver, waiver for persons with developmental disabilities, community access for disability inclusion waiver, and the community alternative care waiver.
