

**Subject** Public safety: ignition interlock devices

**Authors** Lesch and others

**Analyst** Nathan Hopkins

**Date** March 5, 2019

## Overview

This bill amends the definition of “location tracking capabilities” in the ignition interlock device program statute to specify that the term includes direct or indirect location tracking via GPS or cell-site location information.

Current law prohibits enabling location tracking capabilities of an ignition interlock device without a court order.
