Overview

This bill makes changes to the section of the Minnesota Government Data Practices Act that governs private “educational data” on students. It imposes new student privacy protections on “technology providers,” i.e. companies that contract with schools to issue technological devices (laptops, tablets, etc.) for student use and that receive educational data as a result of that contract. It also imposes new student privacy protections on school-issued technological devices. Postsecondary institutions are exempt from these new provisions, but — in a unique addition to this section of law — private K-12 schools (excluding home schools) are subject to the new provisions.
