## Overview

Psychiatric residential treatment facilities (PRTFs) are licensed by the Department of Human Services, to provide services to children and youth with complex mental health conditions. PRTFs are exempt from the federal IMD exclusion, and are a more intensive option than children's residential treatment, intensive treatment in foster care, or day treatment, but less intensive than a psychiatric hospital or a psychiatric unit of a general hospital. Currently, PRTF beds are capped at 150 in Minnesota.

This bill includes PRTFs in special education requirements for facilities, expands PRTF provider eligibility, expands children's intensive treatment in foster care eligibility, extends state-only medical assistance payments for children's residential treatment, and establishes grants for PRTF start-up costs.
