

**Subject** State lands

**Authors** Green

**Analyst** Colbey Sullivan

**Date** February 26, 2021

## Summary

This bill would require the Minnesota Department of Agriculture to monitor the amount of nitrogen in water on and below the state's outdoor recreation system lands and report its findings.

Outdoor recreation system lands include state parks, trails, forests, recreation areas, wildlife management areas, aquatic management areas, and water access sites (Minn. Stat. § 86A.04).
