

The Minnesota Department of Transportation (MnDOT) identifies its core transportation planning and infrastructure management activities through several documents, which are maintained following various state and federal requirements.

MnDOT’s planning documents can be viewed as key work products associated with the department’s process to (1) develop policies, priorities, and strategic direction for the state’s transportation system; and (2) identify and commit to specific construction projects. The following tables outline some of the key documents.

Document Highlights

Document & Timeline	Summary of Functions
STIP 4 years State Transportation Improvement Program	Lists project commitments with state or federal funds
CHIP 10 years Capital Highway Investment Plan	Lists MnDOT’s STIP projects and other planned projects
MnSHIP 20 years Minnesota State Highway Investment Plan	Sets planned investments by category; identifies investment needs to meet performance goals
SMTP 20 years Statewide Multimodal Transportation Plan	Sets major policies & objectives
Minnesota GO Statewide Vision 50 years	Sets overall vision & strategic direction for the system
